Skilled Mechanics Very Generally Employed.-Restoration of Wages.

A very careful canvass made in a number of large manufacturing cities and centers of population reveals the fact that there is now a very small percentage of the skilled mechanies out of employment, and that the ratio would be still largely reduced but for the continuation of a few strikes and labor difcontinuation of a few strikes and labor dif-ferences. There is yet a contiderable num-ber of unemployed in the ranks of common labor, though this class is finding work as the season advances and opportunity is af-forded for the opening of such work as they depend upon. Municipal and public im-provements on large scales are reported from all parts of the country, which will absorb the surplus of labor that now exists, and with the completion of many new manufacturing enterprises now being started and contem-plated, there is every reason to believe that plated, there is every reason to believe that all classes of labor will be very generally employed before the summer has far advanc-ed, which will stimulate every branch of business, and hasten the complete return of prosperous times.

The most significant of all the encouraging signs of changing conditions—the restor-ation of wages to the standards which pre-vailed before the advent of the depression— has continued and increased during the pass week to such an extent as to indicate that there already has been more thorough and rapid improvement during the past few weeks than had been realized. White perhaps a majority of these restorations do not equal the total of the reductions made, it is still unquestionably convincing evidence that there has been a remarkable change that en-abled the manufacturers to make one abled the manufacturers to make any advances whatever, since it has been universal ly conceded that the cuts made were also-lutely necessary at the time. #### IRON-CLADS SIGNED.

New York & Cleveland Diggers Contract For Five Months.

All hopes of bringing out the miners employed by the New York and Cleveland gas coal company about Pittsburg have been abandoned by the striking miners. It has been learned that more than 500 of them signed iron-clad contracts to work at the 55-cent rate until November I. Some of the operators claim that some signed to work for

day to don her walking jacket, and as to cents.

The Shaper mine, which has been idle for reveral days, resumed work at the 60-cent rate. Last week the miners' officials succeded in bringing the men out on a strike, and their going back is keenly feit by the strikers. The striking miners at Hlythe's works at Blythedale, a few miles above McKeesport, it is aid, returned to work at the 60-cent rate. When they struck they were getting 59 cents and they de nanded 69 cents.

#### COAL CONSOLIDATION.

Five Large Concerns of Illinois Combine to Fight Competitors.

Five of the largest coal mining companies in Northern Illinois have combined in a fight for business against their competitors in other sections, as a result of the refusal of the railroads to make a satisfactory adjust-ment of freight rates. The combination has been incorporated under the name of the Gen. Wilmington Coal Company and com-prises mines at Bradwood, Carbon Hill, Gardiner and Diamond, Ili. The combine has a daily output of from 8,000 to 10,000

This is believed by coal men to be the initial step toward the formation of a virtual trust, in which every company operating mines in the northern section of Illinois will be directly interested.

#### TRADE PROSPECTS BRIGHTER.

Plenty of Money Let Loose to Stimulate Business-The Crop Outlook is Also Greatly Improved.

R. G. Dun & Company's "Weekly Review of Trade" says: Safety for the summer means much for all business, and the bond syndicate deems it so fully assured that it distributes 40 per cent of the money advanc-ed by the associates, which relieves a large amount to stimulate operations in securities and products. Crop prospects also have greatly improved, and this is of still higher importance, as it will do much to determine the character of the volume of all busin after summer uncertainties are over. In dition, business is reviving, though the gain in great industries is retarded by many strikes.
