A LABOR LYCEUM

Illinois Workingmen Move Against the Propagation of "Isms."

THE INDUSTRIAL WORLD.

The Illinois Labor Lyceum is the name of a new organization that has been launched in the labor movement. It has an important mission, according to its projectors, and was organized only after mature deliberation-The purposes of the organization are:

1. To furnish speakers on economic sub-jects; men thoroughly in accord with the trade union movement; men who have made a study of existing conditions, and who are interested in the abrogation of injustice to the

2. To furnish to organized labor, at cost

price, such literature as may be deemed bene-ficial to the labor movement. The workingmen of England, France and Germany have for years employed men to fight the battles of organized labor in the hght the battles of organized labor in the National Parliaments and elsewhere. Each Union contributes a per capita amount to a fund that is used to keep organizers in the field who will at all times be ready to do what ever is requested of them. In England, for instance, John Burns is employed by the Trade Unionists to do their work for them in the London County Council and in Parlia. the London County Council and in Parlia-

When a blg strike occurs he is expected to use the influence gained by his political po-sition to bring about a settlement. When-ever a union is to be organized he is always at the command of the interested parties to aid them in their efforts. In America it is different. Until trade unions are willing, it is said to pay salaries commensurate with the work to be done, it will be hard for them to secure the entire time of any labor leader

o advocate their cause. For that reason the Labor Lyceum has been organized. It was believed that vigor-ous action should be taken to keep workingmen headed toward the eight-hour day move ment and prevent them from drifting of into "isms." which, it is claimed, promise nothing but injury to the labor movement. Lyceums will be organized in every town and city in the State, and good men will be selected as as lecturers to answer any call that may be made. A State lecturer took the field about he middle of November.

### While He Slept.

Archibald Clarke, a farmer living near Grump, Ky., is without doubt the most remarkable somnambulist in Kentucky. He actually during the past summer cultivated four acres of land while asleep.

For a long time Mr. Clarke suspected his neighbors of stealing into his truck patches after night and doing the work, but finally one night, while nailing some boards on his backyard fence. he struck his thumb with a hatchet and awoke, thus realizing for the first time that he had been working in his sleep.

Among other things that he has done while in the somnambulistc state was to lay a worm fence for a distance of 200 yards. One night he fell asleep, thinking that he would rise early on the following day and cut a small ditch to drain a pond. But great was his surprise when the next morning he found that the pond had been ditched during the night.

On one occasion he got up shortly after he had fallen asleep and putting several pounds of butter in a basket took it to a near-by grocery and traded it for coffee and sugar. For a long time he was at a loss to account for the missing butter. Neither did he know whence came the coffee and sugar. However, since realizing that he is a confirmed somnambulist, he has questioned the grocer, who recollected the occurrence because of Mr. Character strange behavior at the time.

Mr. Clarke lived alone, but since he has discovered his condition has engaged the services of a young negro, who takes care that his employer does not get out of the house during his sleep.-Cincinnati Enquirer.

### BEMARRABLE AND ANTONISHING CURE OF AN EXTREME CASE OF ST. VITUS' DANCE.

#### How a Young Lady Regained the Use of Her Arms, Limbs and Speech In Three Weeks.

From the Standard-Union, Brooklyn, N. Y. Too much har l'study at school brought on St. Vitus' dance. Such was the common experience of Miss Glendora Rivers, daughter of Mrs. Amelia Rivers, of 69 Ryerson street, Brooklyn. The disease grew worsh every month, until the young lady's entire right side became paralyzed; but, now that a marvelous and permanent cure has been wrought, it will be interesting to read her own version of the efficacy of Dr. Willfams' Pink Pills.

"For more than a year," said Miss Rivers, "doctors attended me without effecting the slightest change in my condition. If anything, I grew worse under their treatment, until February of this year, when my condition became critical.

"I had lost the complete use of my arms and limbs and speech. I could only swallow liquids, and these only as they fed no with a spoon, when they could get my mouth open. I wanted to sleep all the time. The stupor I laid in was something like a trance, and nodoubt I would have died if they had not waked me up at intervals.

"The first week in March my mother, who Is a sick nurse, was a tyised by a neighbor to try Dr. Williams' Pink Pills in my case, Suc got some of the pills-a box from Neilson's drug store, at the corner of Myrtle avenue and Hall street. Before I had taken one-half the contents of the box a remarkable change was noticed in my condition.

change was noticed in my condition. "Gradually I regained the use of my arms and linbs and speech, and by the time the pills were gone I was up and about the house almost well. But my mother thought it wise to get another box of the pills, and this she did, and here you see me stand be-fore you with a sec to be seen as and before you with more strength and more ambition than I ever had.

"Some of our near neighbors attribute my regained body and health to some miraculous or supernatural agency; but my mother and most intimate friends know that the euro was effected by Dr. Williams' Piak Pills

#### Drowned by the Sultan.

A grim story is published in London taken from a private letter from Constantinopie, according to which a diver, while recently engaged in assisting in the work of driving piles for a new pier at the Golden Horn, on reaching the sea bottom was surprised to find himself surrounded by the bodies of a number of men apparently standing upright around him.

Upon investigation the diver discovered that they were the corpses of students, many of whom wore known to him personally, who were recently arrested by the Turkish police and afterwards taken out in beats and drowned in the Bosphorus for taking part in the recent disturbances at Stamboul. All the bodies had leaden weights attached to the feet, which kept them erect. The diver said there were from forty to fifty bodies in that spot alone.

The cases of sickness heretofore reported on board the British ship Helen, has developed into yellow fever. The Helen arrived at Galveston, Tex., Wednesday from Para, Brazil, with two sick seamen and an unclean bill of health. On that account the vessel was detained at quarrantine, where she now lies with six men on the sick list, one of whom has a well-developed case of yellow fever. The state health officer has been sent for and when he arrives, it is possible that the vessel will be ordered to East Ship Island, Miss. There is no danger of the disease spreading, because the vessel has not been nearer to tha city than the quarantine station, which is five miles out and no one has been allowed aboard of her except the local quarantine officers.

# You Will Realize that "They Live Well Who Live Cleanly," If You Use SAPOLIO

# nothing lost

Scott's Emulsion makes cod-liver oil taking next thing to a pleasure. You hardly taste it. The stomach knows nothing about it-it does not trouble you there. You feel it first in the strength that it brings: it shows in the color of the check, the rounding of the angles, the smoothing of the wrinkles.

It is cod-liver oil digested for you, slipping as easily into the blood and losing itself there as rain-drops lose themselves in the ocean.

What a satisfactory thing this is-to hide the odious taste of cod-liver oil, evade the tax on the stomach, take health by surprise.

There is no secret of what it is made of-the fish-fat taste is lost, but nothing is lost but the taste.
