

NEWS FROM WASHINGTON.

THE U. S. ARMY.

Annual Report of the Secretary of War Lamont.

The annual report of Daniel S. Lamont, Secretary of War, says that never in its history has the present condition of the army been surpassed.

For the last two years the department has steadily pursued the policy of restoring officers to their commands and reducing wherever possible the number of those on detached duty.

The Secretary recommends a change in the law governing the appointments of chiefs of staff departments, so that the class shall include the whole staff.

The Secretary recommends that the President be permitted to name 10 cadets at large each year to the West Point Military Academy, in order to keep it full.

Of the National guard of the States, he says the conditions are favorable to the development of a volunteer force of upward of 100,000 men, of the highest efficiency and prepared for the service.

The Secretary again urges the prosecution of work on the laws of the United States relating to the militia were enacted in 1792.

Under the plan 27 posts were to be defended. At the present rate of appropriations it will require 70 years to complete the work.

As to river and harbor improvements, the Secretary says the engineer in charge of the work has made estimates of appropriations amounting to \$48,837,627 for the next year.

As to river and harbor improvements, the Secretary says the engineer in charge of the work has made estimates of appropriations amounting to \$48,837,627 for the next year.

PRICES SHRINKING.

Iron Market Really Weaker Than Quotations Indicate.

R. G. Dun & Co.'s review of Trade says: Business has not improved, though there is very little change, except in the shrinkage of prices which a period of inaction usually causes.

The iron market is decidedly weaker again, and while Bessemer pig has declined to \$12.35 and Phosphoric acid to \$12.25 and plates to \$1.50 at Philadelphia, so that the average of all quotations is about 1 per cent lower than last week, the markets are really much weaker than the quotations, as concessions are generally given by manufacturers in order to secure business.

The iron market is decidedly weaker again, and while Bessemer pig has declined to \$12.35 and Phosphoric acid to \$12.25 and plates to \$1.50 at Philadelphia, so that the average of all quotations is about 1 per cent lower than last week, the markets are really much weaker than the quotations, as concessions are generally given by manufacturers in order to secure business.

The iron market is decidedly weaker again, and while Bessemer pig has declined to \$12.35 and Phosphoric acid to \$12.25 and plates to \$1.50 at Philadelphia, so that the average of all quotations is about 1 per cent lower than last week, the markets are really much weaker than the quotations, as concessions are generally given by manufacturers in order to secure business.

MANY MINERS KILLED

IN A SHAFT.

Many Yet Entombed in the Piles of Ore and Stone.

An accident, resulting in the loss of 13 or 14 lives, occurred at the Tilly Foster mines at Carmel, N. Y. Foreman Patrick was descending into the pit to take the time of two gangs of laborers, numbering about 35 men, who were working at the bottom, when a vast weight of earth and rock slid with the force of an avalanche from the mouth of the pit to the bottom, a distance of 30 feet.

The earth crashed over the men with tremendous force. Out of one gang of seven only five came out alive, and three of the men employed in another gang were taken out dead.

Among those known to be dead are Michael Gracian, foreman; Patrick H. Murtha, foreman; John Pagan, boarding house keeper; Thomas Dennis, James Smith, and an Austrian, name unknown, No. 234.

An Austrian known as No. 374 received a fracture of the skull and will probably die. The names of the others killed are at present a mystery. Several of the workmen were seriously injured.

The cave-in caused the greatest excitement but as soon as possible gangs of men were set to work to remove the bodies of those known to be under the masses of earth. Supt. Tomlinson and Foreman Lynch took charge of the work, and up to 5 o'clock five dead bodies had been brought to the surface. Murtha was taken out alive, but he died five minutes after he was taken home. Darkness prevented the continuance of the work of the rescue, and it will not be until Friday morning that further effort will be made to clear away the ruins.

It is thought that all the others in the pit are Italians and Austrians. There was some difficulty experienced in identifying some of the bodies, owing to the terrible disfigurement they had undergone.

The accident occurred at Tilly Foster, a small town located near Carmel. The first intimation to those below was the great pieces of rock and ore were carried along in the avalanche.

One of the first to be brought to the surface was Foreman Murtha. He was found near the top, pinned down by a huge piece of rock. The rescuing party dug him out, and bore him, still alive, to the fresh air. Murtha was badly mangled and his clothes were almost torn from his back. He was taken to his home, but a short distance away, but died almost immediately after reaching there.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder ABSOLUTELY PURE

Russians Are Economical.

The Russian workman spends very little for food, lodging and dress, as compared with the foreign artisan. Coming from the village, he is very modest in his demands. His food is very simple, but it is abundant and answers to his taste. In Moscow, for example, the board of a workman amounts to not more than 10 shillings per month.

Coaling on the Run at Sea.

A remarkable experiment of a system of coaling at sea was recently made by the French battleship Richelieu. By a novel system of transfer with a collier alongside she took in, while running at the speed of six and a half knots, about 100 tons of coal in three hours.

All the Year Round.

The avocations of men go on just the same in winter as in summer, and those who labor hard with hands, body and muscles know this full well. The sports also are just as festive and are attended with many accidents. The chances of accident are about the same to all, but to the laboring man a mishap means very much. For instance, a sprain may cripple badly and mean loss of time, place and money, were it not that we all know how readily St. Jacobs Oil will cure a sprain, and prevent all these misgivings. So let us enjoy ourselves without fear.

To Double Their Typewriter Plant.

The decision of the Remington Typewriter Company practically to double the capacity of their already extensive works at Ilion, N. Y., is very significant of a general improvement in the business outlook, for the typewriter is now so intimately connected with every form of National activity that the prosperity of its manufacturing industry serves as a convenient barometer of general trade conditions.

The Remington people will erect an additional building, 150x24 feet, six stories high. This is to be completed at once, and will be equipped as speedily as possible, for the demand is so large as to tax the present capacity of the plant to its utmost, and leaves no margin for the future increase of the business which is in sight.—From New York Tribune, October 25, 1893.

A Complete Set of British Birds' Eggs is Worth about 200 pounds.

FITS stopped free by DR. KLINE'S GREAT NERVE RESTORER. No fits after first day's use. Marvelous cures. Treatise and \$2.00 trial bottle free. Dr. Kline, 633 Arch St., Phila., Pa.

An Editor.

Some boys were asked the other day to define "editor." Here are some of their definitions: "An editor is a man who handles words." "An editor makes his living out of the English language." "An editor is somebody who does not do anything himself, and when somebody else does, goes and tells other people all about it." "An editor is a man who has the industry of a beaver, the instincts of a bee and the patience of an ass."—Book Buyer.

Mistaken Identity.

"You go around to the back door," she said, "and carry in a few sticks of wood, and I'll give you your supper." "Go clear around to the back door!" "Yes." "An' carry in wood! 'Sense me, ma'am, but I guess it's a case of mistaken identity. I ain't no athlete." And he started on a four-mile trip to the next house.

SYRUP OF FIGS

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most healthy and agreeable substances, its many excellent qualities commend it to all and have made it the most popular remedy known.

Syrup of Figs is for sale in 50 cent bottles by all leading druggists. Any reliable druggist who may not have it cure it promptly for any one wishes to try it. Do not accept a substitute.

Chinese Laundry Tickets.

The Chinese washermen have a system of ticketing a bundle of soiled clothes based on the many gods and goddesses of the laundry. Though it is complicated, the laundryman seldom delivers a bundle of washed clothes to the wrong person.

Furthermore, if the ticket is lost, the chances are that you will not get your clothes, unless you are a particular friend of the proprietor. Instances are on record where an American has gone to court to force the Chinese to yield up the washing, but the judge was not convinced that the case of the white man was a good one.

The Chinese laundryman at the beginning of each week makes out a batch of checks, in duplicate, to be used as wash tickets. He selects the name of some god or goddess, or of some object, as the sun, the moon, or the stars. To this name he prefixes a number, as "Moon, No. 1," "Moon, No. 2," and so on.

In the space between the two legends—the signs are repeated twice—he has his own name, as, for instance, "Wah Lee."

When a customer takes a bundle of washing to the laundry, the Chinese, first tearing a ticket in two in a ragged fashion, puts one-half on the packet for reference; the other half he gives as a receipt to the person who has brought the package of laundry.

It must be presented when the laundry is demanded, and no fears need be entertained that the package of clean clothes will not be forthcoming, for they are scrupulously exact in these matters.

An English Gunpowder Factory.

The royal gunpowder factory at Waltham, England, bears more the appearance of a pleasure resort than of the usual plant that such a purpose involves. The factory covers in all its branches a beautiful stretch of wooded land, some 400 acres in extent, intersected by four miles of running streams. Electric launches ply between the different buildings, while barges of explosives are conveyed by canals, so as to reduce the liability to danger to a minimum. The threshold of the "danger building" is barred with board, which not even the inspector may step over without having a special pair of large overboots on his feet, to keep his shoes from taking grit from the ground. The water from the nitro-glycerine factory is drained. This extraordinary lake is exploded every Saturday afternoon with a dynamite cartridge, to prevent too great an accumulation of nitro-glycerine. Some times the holes are already so much in the water that they are all blown away.

The Fastest Boat.

The fastest war vessel afloat is owned by France. The sea going torpedo boat, the Forban, recently tried, built under a contract for a speed of 29 to 30 knots, easily made 30.2 knots, or 35.2 miles per hour, despite a heavy sea and high wind, which shows to be faster than any other ship in the world. The Forban is 144 feet long, 16 feet 6 inches beam, and draws 3 feet water. She has two screws, and her engines are capable of developing 3,200 horse power. She carries two 37-millimeter (1.45 inches) quick-firing guns, two torpedo tubes above water.
