The Obliging Poet.

"I wish you would put your name nown for \$10 to this subscription," said the lady to the poet.

"Certainly," he said. "I'll put it down for nothing." Then he wrote his name. "Keep your \$10, Mrs. Patkins," he added, as he blotted the signature. "I would not charge the charity for so dight a service."-Harper's Bazar.

High, Low Jack,

Fine ice means very cold weather, then omes a high old time in skating rinks, and stating ponds, on slides and rides, and we go home tired and overheated. It's the same consectived and overheated. It's the same eld story of cooling off; off with wraps and on with all sorts of aches and pains, rheu-matic, neuralgia, sciatic, lurnbagic, includ-ing frost-bites, backache, of an toothache. They who dance must pay the piper. We est up Jack and are brought low by our own foily. What of it, the dance will go on, all the same. It is generally known that St. Jacobs Oil will cure all such aches and pains sparately or collectively, and the cry is, on with the dance.

Mrs. Browning commonly wrote one of her hort poems at a single sitting.

Deafness Cannot be Cured

Deafness Cannot be Cured local applications, as they cannot reach the saved portion of the ear. There is only one of the ours deafness, and that is by constitu-nal remedies. Deafness is caused by an in-med condition of the micrors lining of the stachan Tube. When this tube rets in-met you have a rumbling sound or imper-t hearing, and when it is entirely closed at as is the result, and unless the inflam-and the state of the micrors will be singled to 's normal condition, hearing will be singled or ever. Nine cases out of ten are used by catarrh, which is nothing but an in-met condition of the mucous surfaces. We will give One Hundred Dollars for any sof Deafness (caused by catarrh that can-ged be cured by Hall's Catarrh Cure. Send for mulars, free.

dars, free. J. CHENRY & Co., Toledo, O. Sold by Druggists, 75c.

hosphites alone are sufficient prevent and cure consumpion, if taken in time. Withnut doubt they exert great mod in the beginning stages; hey improve the appetite, pro-note digestion and tone up the nervous system. But they the peculiar medicinal roperties, and the fat, found cod-liver oil. The hypohosphites are valuable and te cod-liver oil is valuable

One of the Crazy

/ Times of intense general excitement lead to an unsetting of weak mind Mr. A. G. Riddle, in his "Recollection of War Times," remarks upon the nun ber of visionaries and fanatics who came to Washington in 1861 and 1865, some of them of the prophetic orde; others with a commission, as they fel: to take their places at the head of the government. One such unbalancel man, perhaps 35 years old, Mr. Riddle saw again and again hanging around about the hall of the House of Reprsentatives, of which Mr. Riddle was a member.

Once or twice he managed to remain in the hall till after prayer, and was then hustled out. He seemed to know no one-a harmless, moon-struck you g man, country grown, neatly clad in a

home-made suit of light brown. One morning when I had reached the hall early, this specially commission d young man came in, an unusual look f resolve on his meaningless face. Scing quick glances about, hesitated a moment, and then said:

"You are one of the Congress felleri. ain't you?"

"What makes you think so?" was m response.

"Wal, you are sittin' in one o' the seats, 'n I've seen you 'round talkin' and actin' like one on 'em."

"Well, if you won't tell on mewas my hesitating answer.

"No, no! I won't tell. I shouldn't think you'd want to have to git out. I won't tell on ve."

"Well, then I am one o' the Congress fellers."

"Wal," brightening, " you're one o' the very ones to help me."

"What is it?" I asked.

"Wal, you see," stopping near me and in a confidential tone, "you see, I'm sent here to take things in hand, and put 'em right-you understand?"

"Well," asked I, "why don't you take right hold? It needs somebody, the Lord knows!"

"Yes, but somehow I can't seem to gli hold. Can't git a-goin'. An' you fellers must help me, you see."

"Who sent you?" "God," solemnly,

"He did? Are you sure?"

"Oh, sure as I live." "As He used to send the prophets?" "Exactly. That's it-in the Old Testament times."

"But don't you know that when He sent a man He always opened the way. provided the means? His man always knew how to get hold. If I were you, I would go right back for instructions." This was a new idea. He stood dazed and confused.

I saw him about for some time after that, waiting, perhaps, for instructions. He was not a solltary instance.

Controlled by a Hair.

One solitary human hair seems a very small thing, but it is the most important part of an important machine in the Capitol at Washington. The machine warms and ventilates the House, the Senate, and the various committee rooms and runs several electric dynamos. Its most curious feature is the appliance for telling the proper temperature of the air in the building. A dial arranged like a clock marks dif-

ferent degrees from zero to 100. Zero eaus perfectly dry air, 100 saturated

THE INDUSTRIAL OUTLOOK.

EMPLOYMENT AND WAGES.

Enlargements and New Industries Where Skilled Labor is Needed.

Abraham M. Zimmerman, of Blue Ball, Pa., has purchased ground in the borough of New Holland, on which he intends to crect a two-story machine shop, 25x40 feet.

The Eclipse Stove Company, Mansfield, Pa,.

has the foundation completed for an addition-al warehouse. It will be a brick building of three stories, 100x85 feet. A new wheel foundry to make all the wheels needed on the whole of the P. R. R. system, will be built by the company at Al-toona next summer

toona, next summer. The Roversford, Pa., machine company is enlarging its plant by erecting a foundry for making heavy machine castings. It will be 42x66 feet and of brick.

The Western Maryland is to build a new station at York, Pa. The building will be 35x-100 feet with a train shed 300 feet in length. It will be constructed of brick and iron with terra cotta and granite trimmings.

New Tack Factory.

New Kensington, Pa., is to have an im-mense tack factory that will give employ-ment to about 400 men. The Cold-Rolled Steel Works, which has been shut down for for H. two years or more, has been sold to B. Woodson Company, of Massachusette two years or more, has been sold to B. H. Woodson Company, of Massachusetts, and it is the intention of the concern to convert it into the tack factory. The machinery in the old steel works will be utilized in rolling out the tack sheets. It is proposed to place about 85 machines, making it one of the iargest plants of the kind in the country. Work on the factory will be commenced with in a few days. in a few days.

Consolidation of Iron Plants.

Reports have been in circulation of a pro-posed consolidation between the Mahoning Valley Iron Company, of Youngstown, and the Falcon Iron and Nail Company, of Niles, An official of the former said that the report of any sambles was without authority and of any combine was without authority and there has been no talk in that direction. It is claimed that the recent effort to organize a steel billet pool among the billet manufact-urers fell through by reason of parties declining to enter into it.

New Industry for Akrou.

O. C. Barber, president of the Diamond fatch Company, will crest a large chlorate potash factory at Barberton, south of f potash factory at Barberton, south of kron, O., the only one of the kind in the infted States. It will be of 3,000 electrical lorse power and will employ 300 men.

The Keystone Axie Co., which will erect a new plant at Beaver Falls, Fa., will manu-facture axies and car wheels by a patent pro-cess which dispenses with the use of a steam himmer and other ponderous machinery, and substitute a roller process which, it is claim-ed, will increase the tensile strength of an axie from 8,000 to 10,000 pounds to the square inch. The plant will be 800x200 feet in size and will contain a full equipment of michinery.

The Barnes Manufacturing Company has been incorporated at Mansfield, Ohio. The The company will manufacture a full line of brass and iron pumps, Ac. Work will soon be sor meneed on buildings for the plant. The machine shop will be two stories, 65 by 200 feet the foundry will be 100 by 110 feet, and there will be a separate building for engine-room, and rattling and grinding depart-

Mesars, Byrne, Parson & Co., Phoenixville, Pa., are to build a mill building 120x46 feet, three stories and basement, with boiler house 25x45 feet. An 80 horse-power boller house 25x45 feet. An 80 horse-power boller and a 100-1 ght electric generator, freight elevator, steat, radiators, tank, etc., are all required and not yet purchased.

ment

The American Manufacturing and Export Company, Atlanta, Ga., is to erect two build-ings 30x105 feet, two stories high and 50x80 four stories high. The steam plant will in-clude three bollers 66 inches diameter and 16 feet long and 350 horse-power engine,

TRADE IS SLUGGISH.

Piling up Goods Under the Effect of Advancing Prices is Now Making Itself Felt.

R. G. Dun & Co. say in their weekly review of trade: "With all the shrinkage in present business and prices it is encouraging to find but a small increase in failures. Li-

to find but a small increase in failures. Li-abilities for the four weeks of November were \$12,699,293, against \$10,581,973 last year. Manufacturing liabilities were \$3,-560,681, against \$6,242,849 last year, but trading liabilities were only \$6,728,912, against \$7,207,367 last year. Failures in the United States for the week have been 324 against 385 last year, and 52 in Canada against 40 last year. "Business is still sluggish, as if gorged by excessive buying when prices were advanc-ing. In nearly every branch stocks not yet distributed to consumers stand in the way of new orders, and competition of a producing

new orders, and competition of a producing force largely exceeding the present demand puts down prices that decline, retarding business yet more. After the holiday's men look for a larger demand. Financial influences have not hindered, and rarely has the opening of a session of Congress affected business so little,

"Wheat has advanced about a cent for the

"Wheat has advanced about a cent for the week. Corn moves from farms less freely than a year ago, the low prices hindering. "Iron and its products are lower, an-thracite No. 1 at \$13, plates at 1.5, and bar at 1.3 cents and beseemer pig \$12 at Valley mills, with billets at \$16.50. The average of all quotations is \$1₂ per cent below the high-est point in September, but actual sales are frequently made, below unstations. Small est point in September, but actual sales are frequently made below quotations. Small demand has broken the barbed wire com-bination, and the two nail and the two bar associations are now in session to consider their policy. Rails have not changed, while bessener pig has declined \$5 and billets \$6 per ton. The stock market his been weak, partly because of sales by London and partly because of disappointing returns of earn-ings." ings.

A TOWN HELD UP.

Three Robbers Made Some Citizens Stand and Deliver.

A special from Birch Tree, Mo., says that a series of sensational highway robberies or surred at Monteer, near that city, about 1 clock Tuesday afternoon. Three men rode into the little village, two of them going direct to the store of Charles Methods, which also contains the post offlice, while the others were stationed on the street to keep guard. One of the robbers at the store pointed a

One of the robbers at the store pointed a rifle and overawed all those present, telling them to turn out their pockets, while his companion gathered up the proceeds. They also robbed the post office of the cash box. Among those held up were G. W. Davis, principal of the school, who lost §65: Mrs. McClelland, John Little, Joseph Laplon and an unknown man

an unknown mun. Rev. Louis Dehles, pustor of the Methodist church was standing on the depot platform, and one of the robbers made him give up all the money he had. After robbing the pastor one of the men covered the bystanders, while the others took possession of McClelland's hora-a.

They fired two shots while in the store They then left in a southerly direction. They are well-mounted and armed. From their con-versation it is thought they intended to hold up the westbound passenger train due at 5:11 p. m., but so many people being in town they were evidently afraid to try it. A posse-has been organized and has started in pursuif.

All negotiations for settling the house-smiths' strike in New York are off, and the contest will continue.

A WOMAN'S DESPAIR. COULD SEE NOTHING AHEAD BUT A

LIFE OF PAIN. Tells & Reporter How Shy Suffered-She Life Has Hoen Brightened by

the Sanshine of Health. From the Drigch, Utica, N. Y.

Mrs. E. McLaughlin, who resides at \$3 Miller Street, Utlea, N. Y., but formerly lived at 110 Seymour Avenue, in the same city, is a lady nearly seventy years old. She was born at Marcy, Onelda County, N. Y., and has resided in Oneida County all her life and is well known there. It was reported in Utien that Mrs. McLaughlin had been wonderfully cured of a severe attack of rheumatism, as well as indigestion, by the use of Dr. Williams's Pink Pills for Pale People; a reporter of Drych was sent to interview her on the subject and get the true facta.

Mrs. McLaughlin said she had been afflicted with rheumatism for about twenty years, and was at times unable to rise from her chair. Her suffering was intense, and she was sometimes driven nearly wild with the agonizing pain. Of late she had also been troubled with indigestion and her health had become gravity understand the been troubled with indigestion and her health had become greatty undermined. She was almost discouraged, being unable to get relief either from the doctors or through the numerous remedies which she tried. Mrs. McLaughlin had often read of the cures ef-fected by Dr. Williams' Pink Pills for Pale People but after her earny follows in other People, but, after her many failures to ob-tain relief through other remedies she had but little confidence that anything would but little confidence that anything would help her. She continued to grow worse from day to day and had given up all hope of ever being restored to health. One day Mrs. McLaughlin spoke of Pink Fills to a friend who was calling upon her. It happened that this friend had had some experience with Fink Fills and knew their value. She urgently advised Mrs. McLaughlin to give them a trial, which she consented to do. Sho procured one tox and before its contents had been entirely used also noticed onite an improcured one tox and before its contents had been entirely used she noticed quite an im-provement in her health. She waited some time before getting another. After a while she decided to keep on with them, and when she had taken three boxes was completely cured. She is no longer troubled with indi-gestion, and when seen by the representative of Jrych was walking around as briskly as anyone of her age could be expected to do. 8 abscribed and sworn to before me this 4th day of July, 1895. 4th day of July, 1895.

G. H. HUMPHREY, Notary Public, Oneida Co., N. Y. Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing specific for such diseases as loco-motor staxia, partial paralysis, St. Vitus's dance, s tatica, neuralgia, rheumatism, nervous headuche, the after effect of la grippe, pulpitation of the heart, pale and sallow complexions, all forms of weakness either in make or female, and all diseases resulting from villated humors of the blood, Pink Pills are sold by all dealers, or will be sent post paid on receipt of price (50 cents a box, or six boxes for \$2.50), by addressing Williams' Medicine Company, Schenectady, N. Y.

The Largest Oak Tree,

The largest oak board ever sawed was ripped from the body of a mam moth tree which formerly stood near Scottsburg, Ind. The tree was 27 feet in circumference, and was said to be the largest perfectly round oak in the State, It was purchased by H. Hermann, the New York lumber dealer, for the sum of \$75, and was cut down and sawed into boards. The largest of these boards was 10 inches thick, b feet 21/2 inches wide at the butt and feet exactly at the top. It was 35 feet long and required the combined strength of two yoke of oxen and eight horses a whole day to remove it one and one-half miles on a "broad tread" wagon from the saw mill to the depot. Lumber men say that this was the largest oak board ever sawed in Ameri-

The

Best. Rest. Test.

There are two kinds of sarsaparilla : The best - and the

rest. The trouble is they look alike. And when the rest

dress like the best who's to tell them apart? Well, "the tree

is known by its fruit." That's an old test and a safe one.

And the taller the tree the deeper the root. That's another

test. What's the root, - the record of these sarsaparillas? The

one with the deepest root is Ayer's. The one with the richest

fruit; that, too, is Ayer's. Ayer's Sarsaparilla has a record of

half a century of cures ; a record of many medals and awards -

culminating in the medal of the Chicago World's Fair, which,

admitting Ayer's Sarsaparilla as the best-shut its doors against

the rest. That was greater honor than the medal, to be the only

Sarsaparilla admitted as an exhibit at the World's Fair. If you

want to get the best sarsaparilla of your druggist, here's an

Infallible rule : Ask for the best and you'll get Ayer's. Ask

for Ayer's and you'll get the best.

air; i. e., air carrying all the moisture it will hold. Human hair absorbs moisture like a rope, becoming shorter when it is wet. The hair here is six inches long. The difference in length between it when wet and when dry stands for the 100 degree of moisture on the dial, and as the moisture of the hair varies the pointer on the dial moves. According to the necessity more steam is thrown in or steam is allowed to escape, the atmosphere being in this way regulated and kept at a healthy point.

It Was Suspicious.

One of the principal men in the bureau of printing and engraving had a somewhat peculiar experience in New York recently.

He had occasion to visit the metropolis on business, and after a stay of several days at one of the principal hotels he called for his bill. When it was given him he tendered in payment a brand new \$20 silver certificate. The clork looked at it and then passed it back.

"What's the matter?" said the official.

"I can't take that," replied the clerk. "I don't think it's good." "Not good!" exclaimed the official. "Not good. Why, man, it's good; I made It myself."

"Yes," said the clerk, "so I thought." -Washington Post,

The

The sewer pipe works operated by the Pittsburg Clay Manufacturing Company, New Brighton shut down for an indefinite period, Brighton shut 200 men out of employment. A surplus amount of ware on hands is the assigned.

The Hughes Shear Co., Clyde, O., whose plant was recently destroyed by fire, has re-organized under the firm name of the Clip-per Shear Co. The factory has been rebuilt and equipped with the latest improved FI machinery.

The Berger Manufacturing company, of Canton, O., have decided to build and operate a rolling mill in which they will prepare thair own sheet iron.

The Birmingham (Ala.) Engine Works are building an addition 100x256 feet to contain new and improved machinery.

MINERS' AGREEMENT.

The Operators and Miners of the Pittsburg District Come to Terms.

"This agreement, made and entered into p this 5th day of December, 1895, by and between the coal mine operators and coal b miners of the Pittsburg Railroad district, is miners of the Pittsburg Railroad district, le that the price of mining coal screened over a la one and one-half inch screen shall be 64 cents has per ton of 2,000, from January 1 to March 4, and 70 lecents from March 1 to Decomber 31, 1896; and that the day and deadwork scale agreed to by the joint convention of October 10, 11 and 12, 1895, is hereby reaffirmed and becomes a part of this agreement. "It is further understood and agreed that this contract is contingent on the following conditions:

conditions:

"That all stores owned by coal companies and individual coal operators be abolished in

and individual coal operators to abolished in accordance with a joint resolution of October 12, 1825, as follows: "That all stores owned by coal companies, and known as company stores, be abolished January 1, 1896, and that after that date no January I, 1896, and that after that date no mine owner, superintendent, mine clerk or mine boss shall be directly or indirectly interested in or connected with such stores. "That a committee of five operators and five miners shall be appointed by this con-vention, to which shall be referred all ques-tions of difference arising under this con-tract. tract.

"The pay days shall be on the 10th and 25th of each month. On the 10th the minures shall be paid the wages earned during the last fifteen days of the preceding month, and on the 35th the second seco on the 25th the wages carned during the first fifteen days of the current month; provided, however, that nothing in this contract shall shall be construed to prevent operators who now pay every two weeks from continuing to do so."

Another Hatfield Murderer.

Near Williamson, in Mingo county, W. Va. 'Yoy Hatfield shot Dan Craig four times with Toy Hatfield shot Dan Craig four times with a winchester, instantly killing him. Hatfield is only 14 years old and is the son of Devil Anse Hatfield, well-known over the country owing to his late feud with the McCoys. The trouble arose over a young girl whom Hat-field was in love with. The affair has caused the greatest excitement. Hatfield is at his father's home and the authorities have been notified not to attempt to make an arrest. The Hatfields are dangerous people and blood will flow before they surrender. A posse will probably be formed to make the arrest. Craig was a young man and was well known.

An explosion in the barracks at Teguci-galpa, Honduras, killed four soldlers and seriously wounded about 20 others.

The great success of the chocolate preparations of the house of Waiter Baker & Co. (established in 1780) has led to the placing on the market many misleading and unscrupulous imitations of their name, labels, and wrappers. Walter Baker & Co. are the oldest and largest manufacturers of pure and high-grade Cocoas and Chocolates on this continent. No chemicals are used in their manufactures.

Consumers should ask for, and be sure that they get, the genuine Walter Baker & Co.'s goods.
