

**Berlin washers are now largely patronizing London tailors.**

**No, Not One.**

There is not a human being physically perfect. Much of this imperfection comes from hereditary, much more from accident, neglect or ignorance. All of this mass of mortal suffering is manifest in aches and pains of more or less intensity, or in some kind of unnatural distress. Hence all strive for relief. The simplest and surest is of course the best, and true economy demands to have it always at hand. When we know that an ordinary sprain may make a cripple for life, we should seek the best remedy at once, and at once we know that it is found in a bottle of St. Jacobs Oil. Those who in any way doubt this experiment and be sure of cure. Thousands have done so.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and removes all impurities from the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials, free. Address: F. J. Cheney & Co., Toledo, O.

Sold by Druggists, 70c.

**Remember**

That good health, strong nerves, physical vigor, happiness and usefulness depend upon pure, rich, healthy blood. Remember that the blood can be made pure, rich and healthy, by taking

Many competing FOODS have come and gone and have been missed by few or none, but the popularity of this FOOD steadily increases!

Sold by DRUGGISTS EVERYWHERE!

**Dr. Maybe and Mustbe.**

You choose the old doctor before the young one. Why? Because you don't want to entrust your life in inexperienced hands. True, the young doctor may be experienced. But the old doctor must be. You take no chances with Dr. Maybe, when Dr. Mustbe is in reach. Same with medicines as with medicine makers—the long-tried remedy has your confidence. You prefer experience to experiment—when you are concerned. The new remedy may be good—but let somebody else prove it. The old remedy must be good—judged on its record of cures. Just one more reason for choosing AYER'S Sarsaparilla in preference to any other, it has been the standard household sarsaparilla for half a century. Its record inspires confidence—50 years of cures. If others may be good, Ayer's Sarsaparilla must be. You take no chances when you take AYER'S Sarsaparilla.

**WE HAVE AGE ENOUGH.**

No American Need Long for Objects of Veneration at Home.

We are accustomed to speak of everything in America as brand-new. It smells to us of varnish more than anything else, and when we go abroad we say of buildings and of institutions, "Alas, we have nothing at all of this sort in America!" There is truth in this, and yet perhaps we do not sufficiently realize how long our American civilization has been growing, and how much of the world's history has been made in the last 250 years. It is interesting to find a suggestion of this nature emanating from so thoroughly English a source as the London Spectator, the attention of which has been drawn to the age of our American colleges by a book of illustrations of our university buildings.

Let us follow out this suggestion, and, taking Harvard University as a measure of age, see where the world was standing at the time of the foundation of that institution. This was in 1638. Charles I. was on the throne of England. Cromwell was a young man, "guiltless of his country's blood," and had just been turned back from his plan of coming to America. The face of Germany was then deluged with the Thirty Years' war. Richelieu had just formed the French Academy, and was in the zenith of his power. The Spanish Inquisition was pursuing its relentless work, and Galileo was yet busy with his literary labors. It was sixty years before Peter the Great applied in London for his naval apprenticeship, and nearly 100 years before Frederick the Great came into his inheritance. We are apt to think of English literature as ante-dating our American civilization; yet at the time the New World had taken on the educational and moral strength which gave us Harvard College, English literature was practically unwritten, if we except Chaucer, Spenser and Shakespeare. "Paradise Lost" was only a dream of Milton, who was 80 years old in 1638, and then began his continental journeys. Dryden was 6 years old; Bunyan was 10, with no thought of serving under Cromwell or being jailed for his views. Pope, Swift, Addison, Bolingbroke, Bishop Berkeley, were yet unborn.

These reflections show us how large a part of human history belongs to the period since the foundation of our oldest university. Into the life of this young and growing republic all these things entered—the growing hatred of absolutism, the spread of religious toleration, the literary inspiration of Milton's day, the artistic spirit that breathed from St. Peter's dome. The American of to-day need not lack for objects of veneration in his own country. It is old enough. Its founders and those who have preserved it with sufferings and death, and sometimes harder service of living effort and denial, have left bright spots in the dark and devious straggles of the human race. To emulate rather than to disparage their character and service is the duty and privilege of the intelligent patriot of today. Moreover, to consider the matter from another point of view, the paradox is true that, if we are to look to antiquity, the present age is the oldest.

**A Curious Transformation.**

A fashionable audience in Paris recently listened to a lecture on chemistry by a celebrated chemist. At the conclusion of the lecture a lady and gentleman who were among the first to leave the hall had reached the opera, when the lady caught her escort staring at her. "What is the matter?" asked the madame, in surprise. "Par don me, but you are quite blue!" The lady returned to the hall and approached a mirror. She started back in horror. The rouge upon her cheeks had been converted into a beautiful blue by the chemical decomposition which had taken place under the influence of the gases which had been generated during the lecture. The majority of the women in the audience had suffered in a similar manner. There were all sorts of colors—blue, yellow, violet and black. Some whose vanity had induced them to put ivory on the skin, coral on the lips, rouge on the cheeks and black on the eyebrows had undergone a ludicrous transformation.—New York Tribune.

**Widow—"Do you know, Mr. Caller, that you remind me very much of my late husband?"** Mr. Caller (looking at watch)—"Why, it isn't, isn't it? Excuse me. I really had no idea of the time."—Richmond Dispatch.

**THE LABOR WORLD.**

Items of Interest to Laboring Men—New Industries.

The new plate mill under erection for some time by the Bellaire Nail Works, Bellaire, O., will probably not be ready for operation until next spring. This concern has under consideration the question of changing its title from Bellaire Nail Works to Bellaire Steel Company.

**Another Sweat Shop Strike.**

The members of the Clothing Contractors' Mutual and Protective Association of New York, have repudiated the contracts entered into by them with the members of the United Garment Workers of America in July, and another strike, involving 10,000 tailors in New York City, Brooklyn, Newark and Newark is precipitated. The contractors are under bonds in \$300 each to live up to the terms of the agreement for a year, made during the last conflict between themselves and the organized tailors, to whom the contractors had to yield and grant their demands at the close of the struggle which terminated three months ago.

**Pingree's Potato Patch.**

The Union Charity Association of Akron, Ohio, has practically decided that with the coming of spring, the plan of Mayor Pingree, of Detroit, of aiding the poor, will be tried. There is an abundance of land that can be readily secured and plenty of people who say they will be glad of the opportunity to aid themselves. Meanwhile this organization means to furnish aid only to those willing to work. An account will be opened with each person or family receiving supplies, and to balance the same the poor will be given various odd jobs, such as carrying coal, shoveling snow, etc. For this they will be paid from \$1.50 to \$2 a day. A salaried superintendent will have charge of the affairs of the association.

The Pittsburg Car Wheel Company has arranged to erect an addition to its present plant, and will manufacture car wheels. At present the works are only for the finishing of wheels. The plant will be located at Home and Hittfield streets, between Forty-sixth and Forty-seventh streets. It will have a daily capacity of 50 tons. It will be started next week.

Messrs. Byrne, Parsons & Co., Phoenixville, Pa., are to build a mill building 120 by 46 feet, three stories and basement, with boiler house 20 by 46 feet. An 80 horse-power boiler and a 50 to 60 horse-power engine, sprinker system, 100-light electric generator, freight elevator, tank, etc., are all required and not yet purchased.

The newly organized Brewer Tube Company, of Toledo, O., is negotiating for a location. Architects Mills & Wichter are preparing plans for a factory for them, which is to be 105 by 200 feet, and will be equipped throughout with the latest improved machinery for the manufacture of seamless tubing.

Samuel Gompers was elected president of the Federation of Labor by 18 vote over John McBride. M. M. Garland, president of the Amalgamated Association of Iron and Steel Workers was elected vice-president. The federation expressed decided disapproval of socialism.

The Indiana Manufacturing Company, Peru, Ind., which owns and operates the largest plant there, has recently made extensive improvements and additions, adding a two-story brick building 40 by 100 feet, and put in an electric light plant.

The Southwark Foundry and Machine Company, of Philadelphia, Pa., is turning its boiler shop into an erecting shop and will put in a number of cranes, etc., which will be of the most improved kind.

It is reported that the Monongahela Manufacturing Company, of Monongahela City, Pa., will increase the size of its plant to double the present capacity.

The Walker Foundry Company, of Erie, Pa., is to make an addition to its plant, 75 by 100 feet, and the pattern room is to be enlarged and a new office built.

The Powers Triple Cylinder Engine Company, St. Paul, Minn., is contemplating the erection of a plant for the manufacture of the new Powers steam engine.

The Union Foundry Company, of Grand Rapids, Mich., is to enlarge its plant and has bought 100 square feet of land on which to erect a new building.

The Walker Foundry Company, of Erie, Pa., is to make an addition to its plant 72x100 feet, and the pattern room is to be enlarged and a new office built.

The Dettweiler Company, of Toledo, O., has about completed all details for erecting a new manufacturing plant for the construction of steel tubing.

Further improvements are being made in the Archusa Iron Works, New Castle, Pa. This plant was practically rebuilt last summer.

A new wheel foundry to make all the wheels needed on the Pennsylvania system, will be built at Altoona in 1906.

Philadelphia traction line employees will likely strike for 19 consecutive hours' work and extra for overtime.

Jackson & Carey are building an extensive foundry and machine shop at Shelby, N. C.

The strike of shipbuilders at Glasgow and Belfast is still on.

**A GREAT GOLD COUNTRY.**

Correspondent Price, of London, on the Coolgardie Field.

Among the passengers by the steamer Miowera, from Australia to Vancouver, B. C., was Julius M. Price, F. R. G. S., who is on his way home to England from the Coolgardie gold fields, where he had been in the interest of the Illustrated London News.

When asked about his impressions regarding Coolgardie, Mr. Price said he thought it was the most wonderful gold-bearing country in the world, and in his opinion there would be some big fortunes made there before the fields are exhausted. The water question will not, in his opinion, affect the future of the mines, as, if the water and Australian government does not remedy this evil, the capitalists interested in the mines will.

Mr. Price thinks that an aqueduct can be built from the sea, and that plenty of water can be easily secured. In the district, canals are the principal means of locomotion, and traveling is necessarily very expensive. Mr. Price contemplates visiting the Kootenay country in the interest of his paper at an early date.

**TEMPERANCE EDUCATION.**

May be made a Feature of the New American University.

The American University at Washington has just completed an agreement with the Board of Council of the Temperance Educational Association by which the latter agrees to secure and transfer to the University \$250,000 on condition that there shall be inaugurated as one of its departments a college of scientific temperance.

The scheme originated with Mrs. Mary H. Hunt, of Boston, the well-known leader in scientific temperance instruction, and Vice-Chancellor Belter.

It is the purpose of that department, like all others, shall be post-graduated and devoted chiefly to original research.

A dispatch from Sagua La Grande, province of Santa Clara, says that the insurgents in that neighborhood have hanged four peaceable countrymen.

**FOREIGN NEWS.**

Shot Down After They Had Been Induced to Surrender.

The steamer City of Peking arrived at San Francisco from Hong Kong and Yokohama bringing the following advices:

The Tien Tsin correspondent of the North China Mail says that on October 24 there were five Russian men-of-war inside of Port Arthur and nine outside.

News has been received of the massacre of 25 Manila soldiers who had deserted from Tatum, a military station. The Spanish gunboat Marquis del Duero visited Sandakan in search of the deserters. The men were decoyed to the beach, and gave up their arms. They were surrounded by a force of Spanish marines, and borne to Dyaks. At a given signal fire was opened upon the deserters. Some rushed into the water, where they were slaughtered, and all perished. Many of the bodies were mutilated.

The loss of life upon the steamer Kung Fai, which blew up at sea, was 550 instead of 800, as has been reported. In addition 150 were badly scalded and burned. Of the officers and crew, only 13 were saved. Most of the killed were Chinese soldiers.

As a result of the recent attempt of Hong Kong Chinese conspirators to capture Canton, 50 Chinese have been executed.

The Hainan-Fa correspondent of the North China Daily News writes that the Mohammedan rebels in the Northwest are spreading. So far, the Moslems are having it all their own way, as the Chinese are unwilling to fight. The imperial troops sent against them have been annihilated, 20 battalions being utterly routed.

At Chemulpo, November 13, 48 men of H. M. S. Edgar were drowned. A company of 71 men were returning from shore in a boat, which was capsized by heavy seas. All were drowned except three officers and eighteen men.

**ORIENTAL QUESTION REOPENED.**

The Powers Demand that the Japanese Quit Korea.

The Berlin correspondent of the Standard, London, says that the powers have addressed to Japan a peremptory demand for the evacuation of Korea.

A dispatch from Shanghai says that several Russian warships watched the formal re-entry of the Chinese into Port Arthur.

It is believed that China, as a reward for Russia's intervention in her favor with Japan after the war, will permit the Russian Pacific fleet to winter in Kiao-Chau bay.

**MANY WILL BE DROPPED.**

Chicago Brewers Will Shut Down 1,700 Saloons.

Chicago brewers are tired of being saloon keepers, and have decided that after January 1 next there will be 1,700 less saloons in that city than at present. Those that remain must pay a third or a half more for beer than they are paying now. There is general alarm among saloon keepers whose licenses are owned and whose rents are paid by the brewers, and 2,000 or more of them are wondering who will have to go out of business. For many years the policy of the brewers has been to establish saloons wherever there was a possibility of selling enough beer to make a paying investment. Competition has been so close that their profit has been cut down to nothing.

The dropping of 1,700 saloons means a severe loss of revenue to the city, as each saloon pays a license of \$500.

**National economy.**

There's room for a little more of it. Too many women are wasting time and strength over a wash-board; rubbing their clothes to pieces; wasting their money. You'd be astonished if you could figure up the actual money saving in a year by the use of Pearline. Millions of women are using it now, but just suppose that all women were equally careful and thrifty, and that every one used Pearline! It's too much to hope for—but the whole country would be the richer for it.

Send Peddlers and some unscrupulous grocers will tell you "this is as good as" or "the same as" Pearline. IT'S FALSE—Pearline is never peddled, and if your grocer sends you something in place of Pearline, be honest—send it back.

**"DON'T BORROW TROUBLE." BUY**

**SAPOLIO**

IT'S CHEAPER IN THE END

**Two Thousand a Week.**

An expert employed by a New York house earns a salary of \$8,000 a year for just four weeks' work—two in the autumn and two in the spring. His business is to go to Hamburg, and out of thousands of designs made there and submitted to him for "edgings" to select those that shall be manufactured for the American market.

**REPORTER CALLED ON WEDNESDAY**

Evening, May 8, 1896, at the residence of Mr. William McMahon, No. 1688 Pearl street, Brooklyn village (Cleveland), O., to learn, if possible, the cause of the noticeable improvement in his physical condition ever that of a year ago, when he was a sufferer from indigestion and various organic disorders. "You see," began Mr. McMahon, "to start with, my work—that of setting type in the case—allows me little chance for bodily exercise, and is altogether too confining for anybody who is in the least subject to indigestion or dyspepsia. Perhaps not more so than many another mechanic or artisan who is constantly indoors and under severe mental strain, while the physical development is sadly in need of something to keep it in trim. Well, that has been my complaint for years, and some months ago I became very bilious, and constipation made life miserable for me at times. Then it took a seat in my LIVER, which became noticeably inactive, and I became alarmed about it. The first thing I turned my attention to was to secure a 'liver regulator,' which, however, failed to regulate; next I sought relief in 'liver pills,' which so pained and griped me that the cure was, I thought, worse than the disease. The next thing I did was to throw away the whole 'shooting match,' and resolve to take no more proprietary medicines. However, on hearing my tale of woe, one day, at the office, a fellow-workman offered me a small Tabule—Bipans he called it—which, he said, he would guarantee to act on the liver. I took it under protest, expecting to be doubled up about fifteen minutes with the 'gripes.' But, to my agreeably surprised in its action, as was very gentle, and I resolved to try a box. Since then I have gradually noted an entire change in the working of my system, and think that Ripans Tabules are the best remedy for liver and stomach troubles this side of anywhere. They are really a substitute for physical exercise. Have one before you go!" And Mr. McMahon produced his box of "stand-bys" from his inside pocket as the reporter took his leave.

Ripans Tabules are sold by druggists, or by mail if the price 50 cents a box is sent to The Ripans Chemical Company, No. 10 Spruce St., New York. Sample vial, 10 cents.

**ELASTIC TRUSS**

POSITIVELY HOLDS RUPTURE
