omy. The individual drops out of the

ranks to form a center around which

home springs up, but another woman, not a man, takes her place. The type remains. More and more places are being made for women, to such an extent that a recent census builetin re-

ports the increase in the number of

women employed in gainful occupa-tions during the period between 1870

and 1890 to have been 113 per cent.,

while in trade and transportation the

increase was 1,051 per cent. This

change is significant. It is, in fact, a

revolution. Twenty, or indeed, ten

years ago the girls of an ordinary mid-

dle class family in which the father

was a small business man, an expert

mechanic, or a farmer capable of sup-

porting his family with decency if not

absolute comfort, were expected to stay

at home and help with the housework

until they went to preside over homes

of their own. It was considered some-

thing of a slur to say that a man's

daughters were obliged to go out to

work. Nowadays this sentiment is re-

versed. A business training is as much

a matter of course for the daughters as

for the sons. And no one is surprised

when the daughters prefer putting the

training into practice instead of devot-

ing their time to household duties en-

livened with social amusements. The

growth of the idea that woman is an

individual, not an appendage, that she

has social duties and moral responsi-

bilities as well as men, is really at the

bottom of the revolution.-Lippincott's.

Merit Wins.

The invention of Alabastine marked a new era in wall coatings, and from the standpoint of the building owner was a most important discovery. It has from a small beginning branched out into every country of the civilized world. The name "kalsomine" has become so offensive to property owners that manufacturers of cheap kalsomine preparations are now calling them by some other name, and attempting to sell on the Alabastine company's reputation.

Through extensive advertising and personal ase, the merits of the durable Alabastine are so thoroughly known that the reopic insist on getting these goods and will take no chance of spoiling their walls for a possible saving of at the most but a few cents. Thus it is again demonstrated that merit wins, and that manufacturers of first-class articles will be supported by the people.

PICKED UP ON BROADWAY.

A True Incident.—A woman was picked up in the street in an unconscious con dition and hurried to the nearest hospital. On examination her body was found to be covered with sores caused by the hypodermic injection of morphine. This mere wreck of a woman had once held an honorable and lucrative

position in a large publishing house in New York. Her health began to fail. Instead of taking rest and medical treatment, she resorted to the stimulus of morphine. The hospital physicians discor-

ered that her primary trouble was an affection of the womb, which could readily have been cured in the first stages. If, when she had felt those se-

vere pains in the back, the terrible headaches, the constant sense of fullness, soreness and pain in the pelvic region, she had used Lydia E. Pinkham's Vegetable Compound, it would have dissolved and passed off that polypus in the womb, and to-day she would have been a well woman sitting in her office.

Why will women let themselves go in this way? It seems passing strange that a woman like this one, so highly educated, and so well placed should have de-

pended on morphine, instead of seeking a radical cure. There is no excuse for any woman who suffers—she need not go without help. Mrs. Pinkham stands ready to help any woman; her address is Lynn, Mass. Write to her; it will cost you nothing. In the meantime get a bottle of Lydia E. Pinkham's Vegetable Compound at the nearest drug store. The following letter from one of your sisters will encourage you:

Mrs. Bertha Lehrman, No. 1 Eric St., 27th Ward, Pittsburg, Pa., writes to Mrs. Pinkham: "I can hardly find words with which to thank you for what you have done for me. I suffered nearly seven years with backnehe and sideache, lencorrhora, and the worst forms of womb troubles,

" Doctors failed to do me any good. Thave taken four bottles of Lydia E. Pinkham's Vegetable Compound and one box of Liver Pills, and used one package of Sanative Wash, and now can say I am well and have been steadily gaining flesh; am stouter and heartier now than I have been for years. I am recommending your Vegetable Compound to my friends. Again I thank you for the good health I am enjoying."

A Southern farmer, whose home is somewhat in the backwoods, in an interview with a newspaper correspondent said: "I am 61 years old, and until I was nigh unto 50 years old I was always well and peart, then for a long while I suffered with indigestion and could not cat anything hardly at all.
