Don't Fly Off The Hardle.

The editor of an exchange, who

has evidently had some experiencewrites the following sensible article: To run a newspaper without occasionally publishing an item that is incorrect, or gives offense, is like running a railroad without having smashups or accidents. It cannot be done. No man in the world is so much imposed upon as the editor of a newspaper. Pushed with work continually, he must rely upon second and third parties for information as to the events that transpire. Frequently statements are received from reliable people, but which are subsequently discovered to be without foundation in fact. If therefore, kind reader, you fancy yourself aggrieved a statement in your home paper, keep the above fact in mind. Donot "fly off the handle," but go to the editor and ask for a correction, and take our word for it, in nine cases: out of ten, if your case is just, you will be received like a gentleman and | the correction will be made with pleasure. But instead of doing this if you go around blowing about the editor and his paper, don't be surprised if you get treated with scant courtesy in the future. There are but few of us who are entirely fault

"Maywood" Bicycle is fully guaranteed for one year. , NAPAVINE, WASH., Feb. 10, 1896.

I consider your "Maywood" wheel the strongest and safest bicycle made for hard riding and rough roads, such as we have in this country. They are also light running and easy to adjust. The one-piece crank is a wonderful piece of mechanical simplicity in bicycle construction, and with the improvements I understand they are to have this year, it will be the best wheel made.
