TIRES THAT LEAK.

The Morgan & Wright single-tube quick-repair tire must be regarded as a distinct improvement in bicycle tire construction. It has the following advantages:

While punctures in it can be repaired with plugs, or semi-liquid injections, as well as in any other single-tube tire, it can be permanently repaired by using the quick-repair strip inside the tire. See cut No. 1.

By injecting M. & W. quick-repair cement through the puncture, and then pressing down on the tire with the thumb, as in cut No. 2, the repair

strip inside is picked up by the cement, thus closing the puncture, as in cut

No. 3. The Morgan & Wright single-tube quick-repair tire is guaranteed not porous. This is on account of the way in which it is made. Nearly every rider has heard of tires that "leak

like a sieve." Many tires rot, because water gets into the fabric between the two layers of rubber. The Morgan & Wright fabric is proof against moisture.

Everybody knows how comfortable Morgan & Wright tires are, and yet how seldom they puncture. This is due to the fabric.

Ask any bicycle dealer whether other tires last as long as Morgan & Wright tires. Ask, also, what the Morgan & Wright guarantee means. Morgan & Wright tires are repaired free of charge, at the factory in Chicago or at any of the Morgan & Wright free repair shops, located in the principal cities.

N. B .- When you have a puncture, get right off. Riding a tire flat, when it has a tack or nail in it, may damage it considerably.
