## ENGLAND BITTER.

### United States Said to Have a Swelled Head and to occupy a Mimor Position.

Much bitter feeling is being manifested at London toward the United States since the publication of the Behring Sea correspondence, The "Globe" printed a long editorial on the matter a few days ago, and after stat-ing the futility of arbitration with a power "which disregards alike the le-gal prescriptions and ordinary courte-

sal prescriptions and ordinary courte-sies of civilized nations," says:

"The shuffling, violent and insolent policy pursued toward this country at Washington demonstrates the absolute futility of arbitration. The 'Globe' would view with the greatest regret the prospect of war between this coun-try and the United States, but in her and the United States, but in her relations with England we are irre-sistibly reminded of a small boy relying upon the contemptuous good nature of a big fellow. America is the insig-nificant urchin, and the big boy who could swallow him at a mouthful is

"Lord Sallsbury has treated the United States with a kindness they do not deserve, always wearing the silk gleve, until America has forgotten the existence of the iron hand beneath it.

"The idea of our being afraid of a fourth-rate power like the United States could only have occurred to suf-ferers from a severe attack of swelled proportion and has forgotten she plays only a minor role in the affairs of the world.

We hope our relations with America will hereafter be distinguished by a firmer tone, as the only way to avert trouble is to make her plainly understand that we are determined not to be shouted out of our rights."

### TO PREVENT STARVATION.

### Secretary Alger Planning to Send Supplies to the Klondyke.

Secretary Alger is now engaged in an attempt to solve the question of how to get supplies into the Klondike gold regions and thereby prevent the threat-ened starvation of many miners. The great Yukon river is without doubt algreat Yukon river is without doubt already closed to navigation by boats, and the mountain passes via Chilkoot are almost impassable. The problem, therefore, is a hard one.

Now, however, it is believed by the Secretary that by means of a novel plan of transportation supplies may be pro-

of transportation supplies may be provided even in the midst of an Alaskan winter. He has opened correspondence indirectly with a Chicago inventor who makes a locomotive sled designed originally for use in logging camps, but which, it is hoped, may be readily adapted to the navigation of the Yukon when it is fragen thickly. With a few when it is frozen thickly. With a few of these machines placed on the river it is heped that a sufficient supply of food and other necessary stores can be carried up the Yukon to relieve distress attending the miners.

The Secretary has already had some experience with this kind of locomotive. When engaged in lumbering in the Northwest he tried the engine practically, and found it was capable of pulling many tons of logs on sleds at a good speed, even as high as 12 miles an hour. The engine is boxed in like a freight car, and the engineer and fireman are thereby protected from the rigors of the winter.

### Woman Dies in a Quarter Where Sixty People were Accustomed to Sleep.

Six new cases and one death was Sunday's record at New Orleans. The death was that of Joseph Gisfasy, an Italian. The report of Dr. Metz, the city chemist, on the condition of the Italian quarter, moved the board to prompt acceptance of the offer of the city of the Marine hospital as a refuge. Dr. Metz found as many as sixty people huddled together in the Italian quarter, living in squalor and filth. In one of the rooms a goat was found quarter, living in squalor and filth. In one of the rooms a goat was found sleeping nightly with the family. The woman Graffato, who died, having yellow fever, was taken from this quarter, and the board realized that unless semething was done at once the block in which the woman had lived was likely soon to become a plague spot. It was, therefore, decided to guard and thoroughly disinfect and fumigate the entire square, and to remove as soon as spossible most of the families to the as spossible most of the families to the

## IRRIGATION SCHEME.

### Waters of the Mississippi to be Diverted by Canal 1700 Miles in Length.

Ex-Lieut. Gov. Percy Daniels of To peka, Kans., has a gigantic plan to present to the irrigation congress, which is soon to be held in Nebraska and to which he is a delegate. Mr. Daniels proposes to tap the Missouri river at its junction with the Mik river, in Montana, and turn its waters into a canal that will empty into the Red river of Texas. The length of the canal by an air line would be 1,000 miles, but the length of the meandering in conformity with intercepting water courses would be 1,700 miles. The cost would be \$360,-000,000. The average width is to be 160 et and the depth 15.

Mr. Daniels estimates that with a fall of four inches to the mile the capacity of the channel in a current of one mile an hour would be 146,000 cubic feet of water per second. Thus the canal besides being used for irrigation through Nebraska, Kansas, Colorado, klahoma and Arkansas, would be able to take care of the surplus water which might otherwise cause disastrous floods on the Mississippi. He believes the canal could also be used as a waterway for hauling freight in competition with the railways.
