

THE AMERICAN MONTHLY REVIEW OF REVIEWS

It is impossible to promise particular features that will appear in the "AMERICAN MONTHLY" during the coming year, for it is, as the *Bookman* says, "a great monthly newspaper." As such, it prints for its readers an illustrated account of the notable things which make the history of the month, of the political, the economic, and literary happenings which are of value to intelligent men and women. The Editor's "Progress of the World" tells succinctly an illustrated story of the month. The "Leading Articles" give the best thought and information of the current magazines in five continents; the contributed articles furnish the character sketches of the man of the month, and give timely discussions by authorities on any question of immediate serious import.

The result of this comprehensive effort to edit in one monthly volume the information needed by intelligent people of "live" instincts is best gauged in the opinions which the readers of the AMERICAN MONTHLY have seen fit to express. These are thinking business men, clergymen, editors, lawyers, professors, engineers, the wide-awake women of America. They write that the AMERICAN MONTHLY "is indispensable"; "is simply invaluable"; "is a generous library in itself"; "is a historical cyclopedia of the world"; "the best means of aid for a busy man"; "the best periodical of the kind we have ever had"; "a triumph of editorial genius"; "the world under a field-glass," etc., etc.

For the current number and the two preceding issues.

ALASKA-KLONDYKE GOLD MINING CO.
Capital Stock, 500,000 Shares of \$10.00 each, fully paid and non-assessable, of which 250,000 Shares are now offered for subscriptions at par.

SPECIAL NOTICE.
There are many persons who desire to go to the gold fields of Alaska the coming season, who have not enough ready money available to enable them to do so.

To all such, we would advise the desirability of forming a local syndicate of three or more persons, and jointly purchase 500 shares of our stock, and select one of your number to go and prospect and mine for joint account.

With parties forming such syndicate, this Company will contract to send one of their number for each 500 shares of stock purchased from this par, and maintain such party there for one year from the date of arrival at the gold fields, supplying him with food, tools, and all things requisite to enable him to prospect for gold, and with help to develop and work all good claims located by him—the claims to be located in the name of the syndicate and the Alaska-Klondyke Gold Mining Co., and to be owned jointly and equally, share and share alike.

Isaac W. Scott, Deputy Collector, Cedar Rapids, Iowa;
Wm. F. McKnight, Attorney-at-Law, Grand Rapids, Mich.

The business of the Alaska-Klondyke Gold Mining Company will be to run a line of steamers on the Yukon River, and between Seattle and the different parts of Alaska, open supply stores at the different camps, do a general transportation, commercial and banking business, and, in addition, deal in Mining Claims, and work the mines already owned and that may hereafter be acquired by the Company.

The Company controls the following properties:
Eight Gold Placer Claims aggregating 100 Acres in 1st cent. located on Fort Mc Creek under United States mining laws. Development has proved the pay streak to be five feet thick and has yielded placer dirt that pays from \$10 to \$15 to the ton. Five Gold Placer Claims aggregating 100 Acres in extent, on Porcupine River, that pays from 25 cents to \$10 to a ton.
Ten Gold Placer Claims, aggregating 200 acres on the Tanna River, paying from \$10 to \$50 a yard.
A fine gold quartz lode in Alaska, which says from \$15 to \$500 per ton. The lode shows an enormous outcrop of free milling ore, vein at surface being 12 feet thick; on this property have made 12 locations of 100 feet by 300 feet, equaling 120 acres. We don't claim that it is the mother lode, but we do know it is without an equal for prospective values.
The estimates and statement above are of necessity based upon information obtained from our Superintendent, and are believed and accepted by the company.

This company having acquired extensive holdings of rich placer and gold quartz properties, capable of earning large dividends on its stock, offers to investors advantages that insure large and profitable returns.
Mr. George W. Morgan, our Superintendent, has been on the Yukon for the past year working in the interest of this company. Therefore, we are not asking any one to contribute to a project untried, but to one thoroughly matured. This company, with its able aids, extensive knowledge, and great resources, is certain to become one of the richest companies operating in Alaska.

Our President takes pleasure in referring you to the following list of references:

ON SEA AND RAIL

The Locust Point yards of the Baltimore & Ohio are completed and that ocean terminal at Baltimore now has a capacity for 3,600 cars.

The last of the bunch of 15 21x25 consolidation locomotives built by the Pittsburgh locomotive works for the Baltimore & Ohio railroad have been delivered and are in service on the second division between Brunswick and Cumberland.

A company of men and some officers of the British ship Intrepid were taken from Vera Cruz to the City of Mexico by the English colony of the capital city at an expense of \$3,000 and gave concerts there which captured the town. The men were well entertained and as well pleased as the citizens.

The navy is to return to the old-fashioned practice of instructing naval cadets on sailing vessels, against the protest of many of the officers of advanced ideas, but with the hearty approval of the old admirals, who contend that no such experience can be gained for young officers as is secured in working ship under sail power.

There are 60 modern steamships fit for cruising now available by the United States navy in case of war, exclusive of regular war vessels building or in commission, and there are rapid fire guns enough to equip 15 of them within a week. These ships are the ocean liners and coast steamships carrying the American flag.

The Italian minister of public works is a practical man. He has abolished the "complaint book," which used to be a feature of Italian railway stations. Instead complaints must be written on stamped sheets, which may be purchased at the station and dropped in a box provided for that purpose. Thus the state will profit by those complaints, but, as they cost money, people will be less ready to make them.

COURT DECISIONS.

The drunkenness of a trespasser who sits down on a railroad track is held, in *Priest vs. Philadelphia, W. & B. R. Co. (Md.)*, 36 L. R. A. 213, not to excuse him from the effects of his negligence.

An assessment on a burial ground for water pipes in a street in front of it is held in *Philadelphia vs. Union Burial Ground (Pa.)*, 36 L. R. A. 263, not to be a tax within the exemptions of such ground from taxation.

A public square in a town or village treated as such for more than 80 years is held, in *Sturmer vs. county court (W. Va.)*, 36 L. R. A. 300, to be irrevocably dedicated for public use and the county court is denied the power to sell such square to private persons for the erection of private buildings thereon.

A lien for a street assessment is held in *Dreman vs. Farmers and T. National bank (Ky.)*, 36 L. R. A. 121, to be the necessary implication prior in rank to an antecedent mortgage, where the city charter authorizes such assessments with a lien therefor without expressly declaring their right.

An agreement between several persons to subscribe for stock for the purpose of establishing a cooperative store under the control of three persons as directors with a division of the profits in proportion to the amount contributed is held in *Carter, D. & Co., vs. McClure, L. & Co. (Tenn.)*, 36 L. R. A. 282, to constitute a partnership, and where the shares are made transferable a sale of some of them does not dissolve the partnership.—Chicago News.

FARM AND HOUSEHOLD.

Good pasturage should not prevent good feeding at the barn. There is at times too much dependence on the pasture supply, but when an animal is a producer, like the cow, grain is also important. Dry food will be relished at all seasons, as vitality is essential for digestion and health.

To have choice pansies next year plant the seed now, in a cold frame, and as soon as they are large enough thin them out or transplant them, placing the plants six inches apart. Protect during the winter with covering or mulch, keeping them in a frame, and set them out in the open air in the spring.

It is not safe to grow a crop in the peach orchard, but growers have found that when phosphates and potash are applied to the land a crop of crimson clover, seed down this month and plowed under in the spring, will be an advantage. The clover covers the ground during the winter and provides nitrogen in the spring when turned under.

Warm, wet weather is favorable to blight or rot, and every effort should be made to destroy it or prevent its spread. This is the season of the year when the ground may contain spores of fungus diseases for next year's propagation, and the fruit grower can do more effectual work now than he can at any other time. Every limb, twig, apple, pear or grape that is affected should be consigned to the flames.

TO BE ERECT.

Hold the arms behind the back. Roll the shoulders backward and downward. Try to look at the top of your high-cut vest or necktie. Put the hands on the hips, with elbows back and fingers forward. Try to squeeze the shoulder blades together many times a day. Walk or stand with hands clasped behind the head, elbows out. Walk or even run upstairs with from ten to forty pounds on the head. Carry a cane or umbrella behind the small of the back or behind the neck. Practice the arm movements of breast stroke swimming while standing or walking. Stand erect at short intervals during the day with head up, chin in, chest out, shoulders back.

Stand now and then during the day against a wall, with your heels, shoulders and head touching it.

MANY THINK!

when the Creator said to woman, "In sorrow shalt thou bring forth children," that a curse was pronounced against the human race, but the joy felt by every Mother when she first presses to her heart her babe, proves the contrary.

Danger and suffering lurk in the pathway of the Expectant Mother, and should be avoided, that she may reach the hour when the hope of her heart is to be realized, in full vigor and strength.

MOTHER'S FRIEND

so relaxes the system and assists Nature, that the necessary change takes place without Nausea, Headache, Nervous or Gloomy Foreboding of danger, and the trying hour is robbed of its pain and suffering, as so many happy mothers have experienced. Nothing but "Mother's Friend" does this. Don't be deceived or persuaded to use anything else.

"Mother's Friend" is the greatest remedy ever put on the market, and all our customers praise it highly.—W. H. KING & Co., Whitworth, Tex.
