Gratifying Results From the Use of

Anti-Toxine Serum. Washington, Jan. 17.—The chief of the bureau of animal industry, Dr. D. E. Salmon, has submitted to Secretary Wilson a report upon the experiments made in the treatment of hogs for hog cholera with anti-toxine serum. This serum is made upon the same principle as the anti-toxine of diphtheria. It was last fall tested in Page county, Iowa, on several herds of swine, containing altogether 278 animals, and 39 died out of 244 animals treated, of which 86 were sick. Consequently 82.8 per cent of the animals in these herds were saved. Of untreated herds kept under observation during the period referred to about \$5 per cent of the animals died.

Secretary Wilson remarked that undoubtedly the results reported by Dr. Salmon were most encouraging to hog raisers. The cost of the serum, said the secretary, is but ten cents per head of animals treated, only one dose being required, and doubtless in course of time this light cost may be still further reduced. He said further:

"The losses from hog cholera are so enormous, and have weighed so heavily for years upon the farmers, that I cannot imagine that congress will for a moment hesitate to make the appropriations necessary to carry on this work thoroughly. It will be a great mistake, now that so great a discovery seems to have been made, not to finish the work by giving it a thorough an i extensive test."

On Wednesday Senator Davis concluded his speech in the senate, strongly urging Hawalian annexation asof paramount importance in the event of a conflict between Oriental powers or with this country. The annexationists despair of securing the solid Republican vote. The house on Wednesday passed an urgent deficiency bill carrying \$1,-741,843, including \$520,000 for the soldiers' home at Danville, Ills.

The greater number of white people do not seem to know that the black has now in his hands in this country all the resources of progress and future power, says the Kansas City Star. He has land; he has labor; he owns his land and he controls his labor, and the aggregate wealth of the colored population of the United States is yearly increased by millions. He has schools. hundreds and thousands of them, and scores of colleges and institutious of higher learning. If he chooses to remain ignorant he will be cheated and despoiled; if he chooses to be a vicious other wild beasts; but if he chooses to walk up the ascending way (and this the great majority do elect), then he sees into the high atmosphere of freedom and enlightenment, and a greater prospect spreads all around him.

California's largest nugget was 15 inches long, 6 wide and 4 thick, weighed 195 pounds and was worth \$43,000. Australia's largest weighed 224 pounds, and Chili holds the record with one of 400 pounds. The first piece of gold picked up by Marshall when he made his famous discovery in California was a grain worth 50 cents, but the second was a little \$5 nugget. It is reported that the recent shooting of striking miners at Hazleton, Pa., has been made the basis of a claim of indemnity by the Austrian government, on the ground that the Hungarians who were killed were Austrian subjects. Secretary Sherman has made inquiries of the state authorities as to the circumstances. The United States has several times recognized its responsibilbe taken. The house passed the con- ity for injury done to foreign subjects, the most recent instance being the case of several Italians who were lynched in Louisiana. But in such cases, hitherto. the victims were killed by mobs; in the Hazleton case they were shot by deputy sheriffs.

> We are told that Andree, as he was about to depart on his polar balloon, was asked how soon tidings from him might be expected. His answer was: "At least not before three months; and one year, perhaps two years, may elapse before you hear from us, and you may one day be surprised by news of our arrival somewhere. And if not-if you never hear from us-others will follow in our wake until the unknown regions of the north have been surveyed." Quite so. But there are many other editors whose ideas of figureial comfort are not so expansive. Some there are who would consider an assured income \$19,-000 sufficient to warrant them in counting themselves immensely wealthy.

How to be Handsome.

It is a mistake to suppose that the only way to be good looking is to be born so. Good health has more to do with good looks than anything else. Such diseases as constipation, dyspepaia, liver complaints. rifenmatism. nervous disorders, &c., not only shorten life, but spoil tempers and "looks." Bacon's Celery King for the nerves cures these troubles. W. d. Herman, Troxelville; Middleswarth & Uish, McClure; sell it and will give you a sample package free. Large sizes 25c and 50c.
