A monthly, sixteen-page journal containing in each number some twenty narratives of the South, chiefly descriptive and pictorial. The paper is undoubtedly the best illustrated journal in the world, and the only publication which presents glimpses of Southern life and Southern people. It is a favorite souvenir with those who have visited the South; and it serves a good purpose, in lieu of a visit, to those who have never been there.

SOUTHERN

PROGRESS.

The regular price of Southern Progress is fifty cents a year, but to introduce the paper we will send it three months for ten cents.

FRANK A. HEYWOOD. Editor and Publishes, Philadelphia. 211'S. 10th SL.

LAILORS COULDET SLEEP. 100000 Watching for Spanias

"It was a constant round of drills and picket duty on our ship at Day Torto-gas after the Maine was blown ug," said a recently returned navel officer to as Electrical Review man. "We were 70 miles at sea, with no source of news, and we didn't know when a Spanish fleet would heave in sight. We all method hards then enty chieffy to worked harder than ever, chiefly to keep our minds occupied. My division included what I considered the crack gun crew of the ship, and the way those boys handled the rapid-fire guns was something delightful.

something delightful. "After a week or two of this unusual drill, which developed a proficiency truly amazing, I noticed that my pet gun crew became listless and a triffs alow in their work. They seemed to lack heart. Sharp words and reprimands only served to stir them up temporarily. I was at loss to account for this change, and set out to discover the reason. I called up the old gunner's mate and asked him what he thought was the cause.

"'Don't know, sir. The boys is all right, sir-only I guess they don't sleep very well, sir."

"More puzzled than ever, I resolved to keep my eyes open. Jackie is a queer bird at times. The next night I was officer of the deck and had the mid-watch. Along about two bells I thought I heard voices forward, and went to investigate. There was that whole blessed crew stowed away as comfortably na possible upon the deck, looking out to sea. Some were lying down with their eyes glued on the water, others had their elbows on the guard rails with their chins on their arms looking out

over the waves. "I went aft and sent for one of my men, and asked him why he wasn't below in his hammock where he belonged.

Well, sir, we sin't a-goin' to get caught asleep down below in our ham-micks like those Maine boys, sir. We owe the Spanish something for that and something for ourselves. We are all tryin' to be first to sight a Spanlard, sir, so we're watchin'-that's all, sir.'

"Here was the explanation of my gun crew's listless performance. They were working as hard as men could work and getting little or no sleep. It wasn't fear that kept them awake-not by a long shot. It was simply the desire to be the first to sight a Spanish ship and the hope of getting the first shot at her. The suspense of inaction was what wor ried the boys."-Electrical Review.

KING OF NEWFOUNDLAND.

A Business Man Who Owns Miles o Land, But May Be Dis-

Newfoundland has a king and he is R. G. Reid. Many years ago in the face of much opposition the government started to build a railroad through the island, and the natives, ignorant fishermen, tore up part of it. Several con-tractors took hold, but they were unsuccessful too. Then the government started again, and the resumption of the work was partly responsible for wrecking all banks and nearly ruining the colony in 1893.

Then Mr. Reid, a contractor from Montreal, agreed to take hold if he were to get 5,000 acres of land for each mile of the railroad or its branches he con pleted. He introduced modern methods of construction and built a firstclass railroad. Now the government has turned over to him the scres promised, making 250 square miles, and has given him franchises for all electric callways, coal mines, copper mines, petroleum deposite, the government dry dock and the privilege of erecting pulp mills and other industries under the benefit of a protective tariff. All he paid for this was \$1,000,000, half of which is to be returned in subsidies. IMPHREVS' The bill was rushed through the legislature with only one dissenting voice, and no debate was allowed. The value of his gift is worth easily \$20,000,-000. Many privileges not mentioned are pomessed by him. A year ago a paper was read calling attention to the great mineral wealth of the island, and the paper was very much commanted upon. After the elections were over it was seen that a new governmenthad entire ly supplanted the old. Then this deal was beard of. The exspee for making it is that the govern-ment needed \$500,000 to take up some bonds and that the money could be ob tained in no other way. It may be that England will investigate and annul the whole proceeding. As things stand new Mr. Reid is the largest single owner of land in the world, and can make or unmake the government at his will-N. Y. PROME.

A long and the long of the second state further of any tors that some to the jull then are more white people than negro that cannot write their own name From 200 to 500 people visit the jail teach week. About half of them are negroes and half whites. Each visitor quired to sign his or her name in the fall register before going inside the cage where the prisoners are kept. Oc casionally a person comes along who cannot write his name, and in cases of this kind the deputy in charge at the time writes it for him. One of the dep-uties noticed that nearly all those who could not write were men or women who were getting old. He noticed, too, that more negroes could write than whites. This started him to keeping statisticson the visitors who could write and this is the result for two weeks "Last week there were \$12 visitors. Of these 195 were whites and 117 were negroes. Of these nine whites could not write their names and they were all men past middle age. Of the negroes there were only five who could not write, and each of them had been born inslavery. All the negroes of the younger generation could write and wrote in good hands. The week before last there were 680 visitors and about half were negroes. Seven negroes of this number could not write and 11 whites had to ask the deputy to sign the register for

It is said that all sorts of war jober poured in on the government attracted by the \$50,000,000 national defense appropriation. A southerner sent up word that palmetto cabbages make the best kind of fortifications and offered for a consideration, to buy up all in sight and deliver them to points for coast defense. A citizen of Kansas City wrote the hog bristles make bullet proof cloth which, in the form of thick mats, could be hung around on the sides of the war vessels. He added, incldentally, that, in anticipation of the adoption of his suggestion, he had seoured an option on all the hog bristles in the market.

According to the Army and Navy Journal, the first states that will be erste with those of the army in the will be New York, Pennsylvania, Massachusetts, Ohio and Illinois, which the war department regards as being the best equipped for prompt service. If the entire force from these states were called into service it would aggregate in round numbers 39,577 officers and

The donkey cure for whooping cough has been introduced in America. It is for the patient to take a ride on a donkey whose back is marked with a black cross. The remedy is certainly harmless, says an exchange, and the fresh air and fun of the thing ought to be beneficial. As whooping cough is almost wholly confined to very young gerous? ildren, it is hardly likely th

This sesson the wood colors and grays are the pfincipal colors, and the wood colors are smarter than the grays, for the last-mamed were worn all last sum mer, it will be remembered.

Buckles and fancy buttons are among the new things on the spring gowns. The buckles may not buckle and the buttons may not be used to fasten the waist, but they must needs be worn in order to give the proper finish to any amart gown. All the buttons are on the jeweled or-

der, with the exception of those in jet and gold, and these have the effect of ouyx and, are not like what are general-ly known as jet buttons.-Chicago Record.

Uses for Old Boiler Shells. When the old boller is so warn out that it is of no further use as a boiler. It may be that before it goes to the scrap heap, the final estate of all things iron, the shell-the tubes and heads having been removed—is made to serve as a part of a amokestack. The iron used in the boiler is heavier than the used in making stacks of a correspond-ing size, and so the old boiler shells seaks good smollestacks.- N. Y. Bun.

very singular remedy will prove pop ular.

It is reported that a sheep-eating horse has been carrying terror to the borses and farmers near Claysville, Mo. The horse some weeks ago developed a taste for sheep. He has killed 18 or 20 sheep in that neighborhood, and has esten three. He seems to thrive on his peculiar diet. Neighbors insist that he be shot, but the owner has had him fastened in the stable and thinks he will outgrow his peculiar appetfte.

All of us have listened to prosy talks and felt like yawning, if we did not actually yield to the inclination and give expression to "that bored feeling." But it is not often that the man who makes a dull speech owns up to the fact. The duke of Devonabire won great fame a few years ago by yawning in the mild dle of one of his own speeches, saying afterward that "he could not help it, it was so excessively dull."

Signs are misleading. For instance. that familiar sign with the scare headline: "Sputum Is Dangerous." A day or two ago, says a metropolitan exchange, a conductor saw a gentleman sait on the floor. He was told by the official to read the sign. "I did," he answered. "That's why I spit it out. I was afraid to swallow the sputum." Nature's first law is self-defense.

Secretary of Agriculture Wilson asures the American farmers that all the sugar imported into this country. amounting to \$100,000,000 a year, could be raised on 1,000,000 acres of land planted with beet root. The land is here, the men to cultivate it are here, the market for the product is hereall that is needed is to get the industry started.

The growth of cremation in popular favor has been one of the marvels of the last ten years. A new illustration is given in the incineration of the remains of that leader and exponent of the tenderest sentiments of women-Frances E. Willard.

The following conundrum and an The following conundrum and an-swer were propounded by a Summit (N. J.) elergyman: "What passage in Beripture is recalled by a visit to the large department stores in New York?" "All the days of my appointed time will " wait until my change bomes."

Little Jeanie, the three-year-old pet, was playing with her rag doll in the front room of her home not long since, when suddenly her quick eye rested upon one of those large, shiny, black bugs which occasionally fly indoors on summer nights and was slowly crawling along the carpet. The little observer came running out to the kitchen, with great excitement, exlaiming: "Mamma, mamma, there's a prune in the parlor! Come and see it walk."-Chicago Daily News.

WHY, OH, WHY?

Why isn't a wealthy actor a fixed star?

Why can't a man mave time by stopping his watch?

Why shouldn't a sleepy man be of a ettring disposition?

Why are not more sermons equally as deep as they are long?

Why does the average young lady pine for a spruce young man?

Why don't chattering teeth usurp the functions of the tengue?

Why should the wearer of a stove pipe hat take cold in his head?

Why does a sin look twice as big to man before he commits it as it does after?

Why is it that the man who drinks five-cent whisky and smokes three-forfive cigars never swears off?-Chicago Daily News.

ODD MARRIAGE CUSTOMS.

The wedding ring finger of the Ronans was the thumb.

The wedding ring, worn on the left hand, is symbolical of obedience.

Every finger of the hand has, at some time or other, been used for the wed-

ding ring. When Mary Stuart was married to Lord Darnley, four rings were used in the welding ceremony.

At a certain part of the marriage cer-emony in Java the bride washes the feet of the bridegroom.

Spanish peasants believe that the water in which a wedding ring has been dipped will cure weak eyes. The Bomen bride, when being dressed for the wedding, invariably had her bair parted with the point of a spear.

47. "This man calleth for Eliss" partly a misunderstanding, "Ell" for

"Elias," and partly a monkery. 46. "One of them:" The soldiers of bystanders. Because, as recorded is John, Jesus said: "I thirst:" This is the sole expression of bodily suffering. "Filled it with vinegar:" The poses, or common drink of the Roman soldiers, vis.: Cheep acid wine mingled with water. /"A reed:" In John: "Upon hyssop;" a hyssop stalk. "Gen Him to drink:" Hoffmann says that Jesus refused the intoxicating draught before the crucifixion began, that His senses might be kept clear; and the now He accepted the refreshing draught for the same purpose.

PRACTICAL SUGGESTIONS.

The deed transforms the place, as Calvary, the place of execution, has become the center of the world's his

tory and the world's salvation. The cost of salvation smites all in-difference to religion. If Christ was willing to die that we might be saved.

what ought not we to do? The ordes expresses God's feelings to ward ain, His readiness to forgive sin, the terrible evil and danger of an this costs such a satrifice for deliverance from it. No one would suffer so much to may others from a alight sell or liv-
