

# MANY SUFFERERS.

That a Large Number of People are Enduring.  
A Distressing Condition in Which Many  
American People are Involved—The  
Only Way to Alleviate it.

From the Mountaineer, Walhalla, N. Dakota.

The removal of a guilty stomach is what  
very large majority of the people of this  
country are suffering with to-day. It is a  
well known fact that dyspepsia is a charac-  
teristic American disease and it is frequently  
said that "we are a nation of dyspeptics."  
It is a distressing ailment and because of  
many forms is difficult to treat. Some-  
times it is the result of improper modes  
of eating, improper food or mental worry  
and exhaustion; then again it may be sort of  
depressed condition of the body and treat-  
ment should be directed to the restoration of  
the health, without special attention to the  
stomach. In other instances, the disease is  
merely the result of inflammation of the  
stomach.

Any one of these conditions produce a lack  
of vitality in the system, by causing the  
food to lose its life-sustaining elements. The  
food is the vital element in our lives and  
should be carefully nurtured. Restore the  
food to its proper condition, dyspepsia will  
soon and perfect health follow.

For example, in the county of Pembina,  
North Dakota, a few miles from Walhalla,  
lives Mr. Ernest Salder; a man of sterling  
integrity, whose veracity cannot be doubted.  
He was formerly a resident of Laundowne,  
but, removed to the west and is now a  
prosperous farmer.

For three years he has been unable to do  
his work because he was ill with dyspepsia.  
"I became seriously ill about three years  
ago," he says, "and consulted a doctor who  
gave me some medicines and several physi-  
cians were called at intervals who gave me  
temporary relief, but the disease returned  
with all its accustomed severity."

"The distress after eating made me dread  
meal time. At times I became so dizzy as  
to be unable to stand. I had sour stomach,  
heartburn, palpitation of heart, and weak  
nerves. The doctors disagreed as to the nature  
of my disease but all agreed that the stomach  
was affected. I suffered intensely and life  
was a misery."

"I tried several well known remedies but  
was not benefited."

"I read in the newspapers articles regard-  
ing the wonderful curative powers of Dr.  
Williams' Pink Pills for Pale People, and  
finally, after some urging on the part of a  
friend I concluded to try the pills. I pur-  
chased six boxes. This was five months ago."

"I had not taken all of the first box be-  
fore I felt much relief. I continued taking  
the pills, and after using four boxes I was  
cured. I have none of those distressing sym-  
ptoms now, and am completely restored to  
health, and can do as much work as any of  
the laborers on my farm. I owe my restora-  
tion to health to Dr. Williams' Pink Pills for  
Pale People and gladly give my testi-  
monial, hoping it may prove beneficial to  
some persons similarly affected."

By restoring to the blood the requisite con-  
stituents of life, Dr. Williams' Pink Pills for  
Pale People renew the nerve force and en-  
able the stomach to promptly and properly  
assimilate the food, thus speedily and perma-  
nently curing the dyspeptic. These pills  
are a specific for all diseases having their  
origin in impoverished blood or disordered  
nerves. They contain every element requi-  
site to general nutrition, to restore strength  
to the weak, good health to the ailing. Phy-  
sicians prescribe them, druggists recommend  
them and every where the people use them.

CAGE FOR DEHORNING.  
It is Easily Set Down at a Scale Pen,  
the Opening of a Shed or  
End of a Lane.

Dimensions: Six feet long, 6 feet  
high, 3 1/2 feet wide at top in front and  
4 1/2 feet wide at top at back end. Bot-  
tom of foot board is 1 foot wide, with 7  
cleats 1 1/2 inches thick, 1 foot long,  
nailed across it to keep cattle from  
slipping. Foot board 2 inches thick,  
and rests on the three 2x4-inch cross  
pieces 4 feet long. To these are bolted  
upright pieces 7 feet long 2x4 inches  
for nailers for sides of cage. Across  
the top of cage are used two strips  
1x4 inches for each set of uprights,  
bolted one on each side of upright.  
The inside of this frame is boarded up

DEHORNING CAGE.

with inch planks of convenient widths.  
The lower 2 1/2 feet should close enough  
to prevent animals putting their feet  
through the cracks.

On the left side, 3 1/2 feet from bot-  
tom, should be used a board one foot  
wide, and one foot longer than the  
cage. In this board two one-inch holes  
four inches from sides of board.  
Through these put a piece of rope and  
tie off outside. This loop is put over  
the animal's nose and drawn tight by  
the use of a hand spike. An upright  
lever is used to catch back of the  
head and draw it to the left side of  
cage. This upright should be a  
strong 2x4-inch, 9 feet long, bolted to  
bottom cross piece near the right side,  
the upper end slipping back and forth  
between the cross pieces that hold the  
tops of the two front uprights in  
place. This lever is thrown to the  
right when open for the animal to  
enter. As soon as the head passes it  
is pushed to the left side and fastened  
as tight as required by a small iron  
pin slipped through the cross pieces  
at top back of it.

As soon as the head is fastened a  
hand spike is slipped through the cage  
back of the animal, and another over  
the neck to hold the head down. These  
remain in place usually without hold-  
ing, the operator standing in front  
while taking off the horns. The small-  
est animal having horns, up to a bull  
weighing 1,830 pounds, has been de-  
horned in this sized cage. Animals  
weighing up 1,200 pounds pass right  
through the cage when the holding  
lever is thrown back against the right  
side. Cows heavy in calf and larger ani-  
mals back out of the cage.

The maker of this cage has re-  
modeled it three times to get it as  
described, and has used it nine years.  
The first year he dehorned 150; his  
work now running from 4,000 to 5,000  
from October through March.

Animals dehorned early in the season  
heal quickly because in good flesh.  
As an experiment, used saw and clip-  
pers on seven steers, cutting one horn  
off with clippers the other with saw.  
The saved stub healed in one-half  
the time required by the clipped. The  
latter crushes inside of the horn,  
which must decay and come out be-  
fore the wound can heal. The op-  
erator we refer to loads the cage  
across a common gravel box on a  
wagon and travels to convenient  
points, where the cattle are driven to  
him. He is a rapid workman. With  
two or three assistants to help drive  
and hold he once took horns off 33  
head of two-year-olds in 27 minutes.  
Another time he dehorned 60 head  
of 700-pound cattle in 49 minutes. The  
cage can be set down at any con-  
venient place, at a scale pen, opening  
of a shed, or end of lane. The accom-  
panying illustration will give the read-  
er a clear understanding of the cage.—

man.

Milk from Ailing Cows.  
Cows with sores on their teats or udd-  
ers should never be allowed to fur-  
nish milk for use by humans. It is bet-  
ter to dry them up or to dispose of  
them altogether. It takes honesty  
and principle to do this. It is always a  
great temptation to allow such ani-  
mals to continue to contribute to  
the supply of milk. If the cows  
to be kept in milk the milk  
should be at least thrown away  
during the whole period of trouble  
with the sores. Milk, being a great  
medium of contagion, may carry some  
of the worst diseases to the human  
family.—Dakota Field and Farm.

Extra Work Always Pays.  
When milk is made into butter at  
home do not think that a little extra  
pains will not pay. This determines  
the value of home-made butter and  
cheese. Have the butter molded into  
regulation size bricks, then have  
paraphernalia with the name of  
the farm and address of the owner  
printed thereon. This alone will be  
sufficient to enable patrons to refer  
some friend to this brand of butter, or  
other things produced at the home  
dairy.—Dakota Field and Farm.

Head to Swallow.  
There was a goat in our town,  
Who had wheels in his head;  
He tackled a newspaper once,  
And now poor Billy's dead.  
It was a yellow journal, and  
It choked him in a minute.  
Because he couldn't swallow  
The statements that were in it.  
—Chicago Daily News.

It Makes a Difference.  
Shopper—When I bought this piece  
of goods you said the colors would not  
run.  
Salesman—But that was before the  
war.

"What difference does that make?"  
Salesman—All the difference in the  
world. Red and yellow are the Span-  
ish colors.—N. Y. Journal.

The Whole Truth.  
Customer—I see you are recom-  
mending a new brand of condensed  
milk. Is it better than the others?  
The Boy (who is to sever his con-  
nection on Saturday night)—No,  
ma'am; but we make a cent a can  
more than we do on the other kinds.  
—Puck.

A Chance to Rise.  
Young Man—I see you advertise a  
vacancy in your establishment. I  
should like to have a position where  
there would be a chance to rise.  
Merchant—Well, I want a man to  
open up and sweep out. You will have  
a chance to rise every morning at five  
o'clock.—N. Y. Weekly.

A Natural Condition.  
"All flesh is dust," they say,  
And that, no doubt is why.  
Whatever the time of day,  
Some men are always dry.

HER GAGE.  
The Girl with the Jug—You think  
yourself very grand, don't you? But  
I'll bet my mother could fight you  
mother any day o' the week!—Ally  
Sloper.

A Warrior.  
"Pooh!" said the grim visaged native;  
"What to me is the harsh voice of Mars?  
I'm a veteran friend of full twenty  
Old-time, crack-a-jack family jars."  
—Philadelphia North American.

Handicapped, but Happy.  
Trivet—Queen Victoria is living to  
a good old age.  
Dicer—That is true, considering  
that she employs four doctors.  
—Harlem Life.

Chicago Fashion Note.  
Mrs. Lakeside—Have you noticed  
any change in the fashions this year?  
Mrs. Divorsey—Oh, yes; marriage  
ties are to be worn shorter than ever.  
—Town Topics.

A Good Cause.  
Bill—Trouble's wife had a shock last  
night.  
Findout—What caused it?  
Bill—Trouble came home sober.—  
Up to Date.

Why He Did So.  
"Why did you tell Wearlows that  
you didn't have time to listen to his  
fish story?"  
"I thought I had just as much right  
to tell a lie as he had."—Harlem Life.

Reason.  
He—What does your father see in me  
to object to?  
She—He doesn't see anything; that is  
why he objects.—Judy.

Deafness Cannot Be Cured  
by local application as they cannot reach the  
disease portion of the ear. There is only one  
way to cure deafness and that is by constitu-  
tional remedies. Deafness is caused by an in-  
flamed condition of the mucous lining of the  
Eustachian Tube. When this tube is inflamed  
it has a rumbling sound or imperfect hearing  
and when it is entirely closed, deafness is the  
result, and unless the inflammation can be  
taken out and this tube restored to its normal  
condition, hearing will be destroyed forever;  
nine cases out of ten are caused by Catarrh,  
which is nothing but an inflamed condition of  
the mucous surfaces.

We will give One Hundred Dollars for any case  
of Deafness (caused by catarrh) that cannot be  
cured by Hall's Catarrh Cure. Send for circulars  
free.
