The Pennsylvania Dutch.

During the last six years Rev. Dr. Hancher was the principal of the Keystone State Normal School at Kutztown, Berks county. The annual election of the institution took place a few days ago, and by a vote of 12 to 3 the Directors declined to re-elect him, for the reason that he is an alleged hater of the Pennsylvania Dutch and endeavored even to prohibit the use of the language in conversation among students on the premises.

It is stated that he is a native of Tennessee, and a minister of the Lutheran persuasion. If so, he is evidently in the wrong church pew, as there is, we venture to say, a stronger infusion of the straight Pennsylvania Dutch among the Lutherans than any other Christian sect. Evidently Dr. Hancher imagined when he came all the way up from Tennessee that his mission would be, not merely as a teacher under the prescribed rules of the school, but also to civilize, refine and dignify the stupid, illiterate, chuckle-headed bush-knuckle elements commonly known as the Pennsylvania Dutch, forgetting or ignoring the fact that many, if not most of the brightest pages of Pennsylvania history were made by such Pennsylvania Dutchmen as Governors Snyder, Wolf, Ritner, Shunk, Bigler and Hartman. And it is also truth self-evident that but few exceptions the counties or districts in which the Pennsylvania Dutch element predominates are in all respects the most productive and prosperous, and as to intelligence and morals they compare favorably with any and every other class of people of this or any other country. In one respect only their record is a failure compared with other elements of the human family. We refer to the criminal record. Only now and then, here or there, it happens that a Pennsylvania Dutch name gets on the list of penitentiary or jail inmates, and for this kind of short coming they are fairly excusable.—*Mauch Chunk Democrat.*

The New Bloomfield, (Perry Co.), Times says:

"A few evenings ago Constable Light of Miller township picked up an armful of hay, put it in the cutting box and commenced cutting, pushing the hay in with his hand. When the basket was about half full he noticed something jumping around in the basket in which he was catching the hay, and on examination, found he had cut a copper-head snake in two, the other piece being found in the cutting box.

COURT HOUSE CHIPS

Deeds Entered for Record.
Peter Baley and wife to Elmer Krumbine, house and two lots on the Isle of Que, Selinsgrove, for \$925.

Samuel McAllester and wife to Robert McAllester, 400 acres and 32 perches in Beaver township, Union (now Snyder) county, for \$100. Dated Dec. 27, 1841.

Marriage Licenses.

A PRACTICAL DAIRY.

Latest and Most Complete Exhibit of a Sterilizing Apparatus.

Philadelphia, June 28, 1899.

The Agricultural Building at the National Export Exposition, to be held in Philadelphia next fall, will have many novelties in the way of exhibits. Not only will the latest inventions in the way of agricultural machinery and implements be shown, but there will be a comprehensive display of carriages, wagons and every kind of vehicle. Among the working exhibits in this building will be a complete model dairy, with apparatus for the sterilizing of milk, the refrigeration of milk, butter and other dairy products, so they can be shipped to any distance. Road engines, traction machines, threshers, harrows, plows and the smallest of handy helps for farmers' housewives will be shown and every farmer will be benefited, not alone from the knowledge he will gain, but also because he will see how far the American manufacturer excels his foreign competitor.

Does Coffee Agree With You?

If not, drink Grain-O—made from pure grains. A lady writes: "The first time I make Grain-O I did not like it but after using it for one week nothing would induce me to go back to coffee." It nourishes and feeds the system. The children can drink it freely with great benefit. It is the strengthening substance of pure grains. Get a package today from your grocer, follow the directions in making it and you will have a delicious and healthful table beverage for old and young. 15c. and 25c.

A GREAT COPPER FIELD.

Thousands of Acres of Rich Deposits—The Property of the Boston and Texas Copper Company—Its Romantic History and Discovery.

In 1863, during the late civil war between the states, when almost every man, in the state of Texas, between the ages of fifteen and fifty years, who was physically able to serve his country, was in the Confederate Army, and the Comanche, Kiowa and Apache Indians made frequent forays into what is now the most prosperous and populous portion of Texas, Col. J. B. Barry, in command of a battalion of Texas rangers, pursued these predatory savages into what is now Archer county, then a beautiful picturesque terra incognita of gentle undulating hills and dale, covered with wild flowers and nutritious grasses, upon which were fattened thousands of wild deer, antelope, and buffalo, making it a favorite hunting ground of the nomadic, primitive red man.

A severe battle was fought, after closing in with the Indians, in which through greater prowess and equipment the Texans were, as usual victorious. When about to break camp, copper ore of the richest quality was found scattered all over an area of twenty or thirty square miles on the surface of the ground and imbedded in the surface clay, and extending several feet below, ranging in size from a pea to a goose egg. The clay was running from the sides of the hills and where the soft alluvial soil had been washed away by rains, the ore veins, protruding from the hillside, were clearly visible, and in some places to the foot of the hill in chunks from two to five hundred pounds in weight each, and sometimes as large as a man's body; until, at the end of the day, it was estimated that there had been accumulated two thousand tons of copper. It was also found in the blue clay, which beginning at or within a few inches of the surface, would extend to a depth of eight inches to eight feet. This latter was apparently almost exhausted in quantity for whatever excavations were made a few inches deep, this copper ore was found in great quantities, and on load of the ore was hastily gathered, and hauled to Austin, the capital of the state, some three hundred miles distant, and assayed by the State Geologist and Chemist of Texas. His assay of the ore yielded from 43% to 78% per cent. copper, and the copper bearing clay contained about 15 per cent. with an indefinite quantity of silver, gold, nickel, cobalt, arsenic and malachite. A large percussion gun factory was at once erected at the surface, and operated successfully by Prof. De Ryke, and from that time to the close of the Civil War, in May 1865, nearly all the percussion caps and fuelling materials for the Confederate Army were supplied from these copper deposits.

State Geologist Wm. De Ryke was sent to investigate the source and volume of these copper deposits, and he reported that the copper ore of the greatest deposit of copper, the cheapest mined, the easiest smelted, and that would pay the largest net profit of any in the United States. At low level lead or mine, which had been opened, he made a cross cut about 15 feet, and in ten hours work, with four men, raised 1,000 pounds of ore, averaging 60 per cent. copper, leaving more than half as much again in small broken chunks, and nodules, aggregating some 7 or 8 tons, or about 1000 pounds to the foot. He also found extensive deposits of similar ores and clays at various other places on the property, notably at the Douglas, Ball, and Wild leads, showing the great diversity of the deposits. These four main leads being miles apart.

Prof. W. F. Cummins, who was, during four consecutive administrations of the State's Government, in charge of the geological bureau of the state of Texas, and who has since examined the property, confirmed Prof. De Ryke's report, and said: "The copper ore is practically on the surface. No great shafts to sink into the earth are needed. The ore is mined by water to contend with the ore, instead of passing through 7 different metallurgical processes, passes through only two, instead of eight or ten, and the cost of mining is an average of perhaps quite 15 per cent. instead of requiring millions of dollars for a plant to extract the metal, it will be liberated by simple electrolysis by chemical means at insignificant expense."

"After the most careful and thorough examination of this property at different times for years past, my conviction is firm that no more valuable property of the kind may not be developed on the property, that would very soon return most gratifying results to the stockholders."

The Federal Government at Washington, having learned of the existence of this copper ore, the Secretary of the Interior sent an exploring commission under charge of Prof. Roswell, a most competent, experienced officer, who made a complete and investigation as the hostile Indians would then permit. His report was exceedingly interesting, and fully sustained the positions taken by Prof. De Ryke. The geological reports of the U. S. Government.

Major G. Nelson Smith, late paymaster general in the U. S. Army, and for a number of years a Senator from Philadelphia, visited the property several times, hauled hundreds of tons of copper ore from the surface of the ground a distance of several hundred miles by wagon to the nearest railroad and then shipped it by rail about 120 miles to the copper smelters at Baltimore and Phoenixville, where it was announced the finest copper ore existence, and sold for from \$20 to \$40 per ton.

Prof. T. A. Genth, the consulting and analytical chemist of the University of Pennsylvania, and afterwards its president, assayed about 10,000 pounds of different samples of copper ore made by Senator Smith, which he certified averaged about 61 per cent. pure copper.

The land is also valuable for farming and stock raising. The soil consists of a dark, rich loam, and is well adapted to the growing of wheat, corn, cotton, sorghum, wheat, oats and other cereals, potatoes, fruits of every variety, and grapes equal to the best in the country. The climate is also perfect, being a happy medium between the long, bleak winters of the north, and the almost perpetual summer of the extreme south. The elevation of the land is about 1,200 feet, assuring perfect comfort and health the year round, such a thing as a sunstroke or prostration never having been heard of.

The property was profitably worked for several years for the time being, and the large amounts of the metal marketed in Baltimore and Philadelphia, at a time when the ore had to be hauled by wagons from 150 to 300 miles to the nearest railroad, and then shipped to the surface ore had been marketed; mining and a plant to work the ore on the ground beyond, became necessary. As in the early days of California mining, the time passed, and a system for treating the ore was devised, and a system of mining was established, and for hundreds of years on similar deposits, and will operate it for all time to come.

The deeds for the property call for 13,274 acres as patented by the State, but it is believed it will survey nearly 50,000 acres. It is some 3 1/2 miles wide and 10 to 12 miles long, and the equivalent of nearly 1,000 ordinary acres or mining claims. The highest expert and engineering authorities pronounce it one of the greatest copper properties in the world, and it is believed it will prove equal to the California ore fields, which have produced over \$60,000,000 in dividends, and returned \$500 for every dollar paid in on the stock.

Copper mining is so uniformly successful and profitable that few know anything of the industry except the fortunate holders of securities. Over 500,000,000 pounds of copper is now produced in America, worth \$60,000,000, or within 10 per cent. of our total gold product, and this enormous production, netting \$25,000,000, is owned annually, is by about twenty properties located in small territories in Texas, Utah, Montana, Michigan, California and Arizona. The latter produces 10,000,000 lb., and the Boston and Texas Copper Company's great property on the same geographical line.

No industry equals copper mining in stability, prompt and uniformly successful results. It is the safest and best American investment. The best companies pay from 15 to 400 per cent. per annum dividends, and the future is more promising even than the past, for reason of the constantly increasing use of copper.

A portion of the full and unassailable stock of the Boston and Texas Copper Company which controls this great property may be secured at \$5.00 per share (one share for \$1.00) and the money for plan and development.

and it is believed that the company will soon be on a dividend paying basis, with the stock now offered at \$5.00 per share, will be worth par and more. The shares of the Calumet and Hecla Company which once sold in Boston at one dollar per share are now worth eight hundred dollars per share.

It is announced that the price will be advanced as soon as the amount is sold that is set aside for this purpose, and it is believed the stock will have a large value.

Hon. Emory M. Lowe, Mayor of Brockton, Mass. is president of the company. George W. Russell, Esq., paper manufacturer, Boston, vice president. Major F. M. Spaulding, second vice president and financial agent, Col. Edward B. Robbins, treasurer, Col. James M. Wheaton, Boston, secretary, and its directors are composed of strong men.

The company's officers are in the Lowell Building, 2 Becon St., Boston, Mass.

Remit by Check, P. O. Order or Registered Letter for stock desired to the Treasurer. Prospectus, reports and full information on application.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligation made by him.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price 75c. per bottle. Sold by all Druggists. Testimonials free.

Hall's Family Pills are the best.

PENNSYLVANIA CHAUTAUQUA.

Reduced Rates to Mt. Gretna via Penn. Railroad.

For the Pennsylvania Chautauqua, to be held at Mt. Gretna, Pa., July 4 to August 10, 1899, the Pennsylvania Railroad Company will sell special excursion tickets to Mt. Gretna from New York, Selinsgrove, Harrisburg, Frederick, Md., Canandaigua, and intermediate points, including all stations on its line in the State of Pennsylvania.

Tickets will be sold on June 25 to August 10, inclusive, and will be good to return until Aug. 15, inclusive.

after you have concluded that you ought not to drink coffee. It is not a medicine but doctors order it because it is healthful, invigorating and appetizing. It is made from pure grains and has that rich seal brown color and tastes like the finest grade of coffee and costs about 1/4 as much. Children like it and thrive on it because it is the genuine food drink containing nothing but nourishment. Ask your grocer for Grain-O, the new food drink. 15c and 25c.

SUMMER OUTINGS.

Personally Conducted Tours via Pennsylvania Railroad.

The Pennsylvania Railroad Company announces the following Personally Conducted Tours for the Summer and early Autumn of 1899.

To the North, including Niagara Falls, Toronto, Thousand Islands, the St. Lawrence, Montreal, Quebec, Kobovall (Lake St. John), Saguenay, Au Sable Chateau, Lakes Champlain and George, Saratoga, and a day limit ride through the Highlands of the Hudson, July 23 to August 7. Rate, \$12; August 10 to 26, visiting same points as first tour except Kobovall and Saguenay. Rate, \$100 for the round trip, from New York, Philadelphia, Baltimore, and Washington. Proportionate rates from other points.

To Niagara Falls, excursion tickets good to return within ten days will be sold on July 27, August 10 and 24, September 7 and 21, October 5 to 19, at rate of \$10 from Philadelphia, Baltimore and Washington. These tickets include transportation only and will permit stop over within limit at Buffalo, Rochester, Canandaigua and Watkins on the return trip.

Five-day tour to Gettysburg and Washington September 16 and 17, from New York, \$22 from Philadelphia. Proportionate rates from other points.

An eleven day excursion to Gettysburg, Lundy Caverns, Natural Bridge, Virginia Hot Springs, Richmond and Washington, October 10. Rate, \$65 from New York \$60 from Philadelphia, and proportionate rates from other points.

For itineraries and further information apply to ticket agents, or address Geo. W. Boyd, Assistant General Passenger Agent, Philadelphia.

THE BEST OF ALL.

For over fifty years Mrs. Winslow's Soothing Syrup has been used by mothers for their children while teething. Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so send at once and get a bottle of "Mrs. Winslow's Soothing Syrup" for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures diarrhoea, regulates the Stomach and Bowels, cures Wind Colic, softens the Gums, reduces Inflammation, and gives tone and energy to the whole system. "Mrs. Winslow's Soothing Syrup" for children teething is pleasant to the taste and is the prescription of one of the oldest and best female physicians and nurses in the United States and is for sale by all druggists throughout the world. Price, twenty-five cents a bottle. Be sure and get "Mrs. Winslow's Soothing Syrup."
