Niagara Falls, One of the Seven Wonders of the World.

THE FALLS OF NIAGARA.

Greatest Auxiliary Attraction to the Pan-American Exposition.

The importance of the great Falls, Rapids and Gorge of the Niagara River as auxiliaries to the many and varied attractions of the Pan-American Exposition to be held in Buffalo, May 1st to Nov. 1st., 1901, cannot well be overestimated. In its immense flow of waters, its grand scenery and its historic lore, the Niagara is one of the most renowned rivers of the world. Its great cataract has defied the descriptive powers of the poets and philosophers and baffled the delineative skill of painters and photographers. The grandeur of the environment renders the Falls perennially interesting at all seasons of the year and very few of those who visit the Pan-American Exposition but desire also to visit them. The trip from Buffalo can be made in half an hour. There are many points of view and places of interest and the visitor can plan his itinerary according to the leisure time at his disposal. If time will permit, the cataract should be viewed from both sides of the river and trips should be made the length of the Gorge, either along the cliffs above or over the trolley roads which run close to the water's edge. Perhaps the most comprehensive near-views of the Falls are those obtained on the Canadian side of the Gorge, especially that from Falls View Station. Here is seen a complete panorama, embracing the rushing and turbulent currents of the upper rapids and the whole sweep of the falling waters, reaching from end to end nearly four-fifths of a mile, with the great Horseshoe Fall in the foreground separated by Goat Island from the American Fall, which is 158 feet high, and 1,881 feet wide. In the river below flies the little steamer "The Maid of the Mist," carrying visitors close to the foot of the Falls at various points and affording splendid views of the descending waters. The State Reservation on the American side and Queen Victoria Park, across the river in Canada, are delightful observation grounds, both open for the enjoyment of the public free of any charge. To the scientific visitor the electrical power development at the Falls will be especially interesting. On the American side there are great corporations utilizing the current of the Niagara river for developing electric power used in many industries at the Falls. The power thus generated by one of these corporations is also transmitted to Buffalo, 25 miles distant, for use for the electric lighting of the city, for operating a great electric trolley car

system and in many important manufacturing establishments. The power thus transmitted will likewise be extensively used for the purpose of the Exposition.

GENTLEMEN:—I must say in regard to GRAIN O that there is nothing better or healthier. We have used it for years. My brother was a great coffee drinker. He was taken sick and the doctor said coffee was the cause of it, and told us to use GRAIN O. We got a package, but did not like it at first, but now would not be without it. My brother has been well ever since we started to use it. Yours truly, LILLIE SOCOR.

He Replies in Kind.

There is a justice of the peace over in Bedford county named Heltzer. A young couple lately applied to a minister to get married, but not having a license the minister very kindly remarked, "I can't marry you; take your girl and go to Heltzer." Whereupon the young man bristled up and replied, "You go to hell yourself, sir."

Card of Thanks.

The undersigned hereby return their heartfelt thanks to the many friends who so kindly assisted them during the illness and after the death of Mrs. Amelia Erdley.
