

#### IMPLE HAY RACK.

Built at Small Expense and Easily Stored Away When Not in Use.

Hayrack illustrated herewith is on a common high farm wagon. It is two pieces two by four by 14 feet; for a low wagon two pieces two by four by 14 feet. To these attach pieces 1 1/2 by 3 inches on bottom of half-inch bolts run through the semicircular arms 3 inches. Two pieces of one by 3 inches on both ends of arms and on so that the hind wheels can be taken up through them. An arch (a or b) over hind three pieces of wood or iron

#### HOME-MADE HAY RACK.

In form of a half circle, or two out with an elongated circle and to the center by four inch strips covered with short pieces of thin wood, keep hay or grain from coming in contact with wheels. The front or standard should be fastened with means of a full length and just back of front arm and so as to be raised up or down, takes at rear end fastened in same manner. This renders it more convenient to store away under some low when not in use.—R. Logan, in and Home.

#### EXPENSE OF HAULING.

New Jersey It Has Been Reduced to a Minimum by the Building of Stone Roads.

Regarding the making of stone roads, the question is frequently asked whether increased taxation does not add to more than the advantages. State Commissioner Budd, of Jersey, reports that before the construction of good roads the expense of a few pounds of produce to get to market was so great that farmers, if possible, found it much cheaper to carry by ear or boat. But now they are purchasing broad tread wagons, heavy from 130 to 225 five-eighths baskets of vegetables and fruits, before they only carried from 30 baskets, and are returning with three to five-ton loads of manure, the heavy leading to the Philadelphia markets this year the passage of teams per day was counted car from three to five tons on each. Stone roads place the farmers at the door of the consumer, many intermediaries, all of whom have to have a profit. His expense in the service in transporting and the delivering of the produce to the grocer or consumer has resulted in saving to the farmer many dollars on each load.

#### WIDE TIRES NEEDED.

Do Not Destroy the Surfaces of Roads.

Frequently have pointed out in the columns the injury to public roads resulting from the use upon of narrow-tired vehicles, particularly heavy farm wagons of great burthen. It has been proven that wide tires

#### HUNTING THE ROAD'S BOTTOM.

Wide tires and travel more mud and at the same time maintain uniform evenness and smoothness of road's surface, which at once makes them as public benefactors. In the accompanying illustration the narrow tires "hunting the bottom of the earth," forming ruts that will travel rough and disagreeable weeks and weeks. Wide tires should be used in general use on country roads, no heavy farm wagon without should be driven upon any thoroughfare when the ground is saturated with water, or after heavy rains.—Farmers' Voice.

#### Wheelmen Urge Road Tax.

The Michigan division of the League of American Wheelmen is preparing a bill for introduction in the legislature providing for a road poll tax. It will provide that every able-bodied man in the state between and inclusive of the ages of 21 and 60 shall pay this tax, and the receipts will be used to build and repair roads in the county in which is collected, and where the petitioners for such roads will agree to pay their whole road tax in cash instead of labor. The plan has received satisfactory approval.

#### How to Economize Labor.

When too much land is cultivated the farmer is compelled to slight his crops to a certain extent, and what he gains from the area cultivated he loses in yield. It will be more profitable to cultivate only as much land as can be given careful attention. The manure that is sufficient for a small field, and which would increase the yield, will give but little benefit on a large surface. Small farms permit of greater economy of manure and can be made more fertile than large farms.

#### AMBASSADOR WHITE.

His Defense of the American Meat Industry Stamps Him One of the Ablest of Diplomats.

Andrew D. White, our minister to Germany has proved himself a valiant defender of all American interests in the Teutonic empire. Just now he is distinguished himself by his courageous battle for the American meat industry, threatened with hostile legislation. Minister White is known as an "educator, historian and diplomat." His diplomatic career commenced at

St. Petersburg, where he was an attaché of the American legation. He aided in the founding of Cornell University and was its president for 20 years. During this time President Grant made him a commissioner to investigate the proposed annexation of San Domingo. He favored the annexation. President Hayes in 1879 appointed Mr. White minister to Germany, and he remained at Berlin two years. After this, giving himself entirely to literary work and travel, Mr. White found in 1896 that the government again desired his services. President Cleveland appointed him as one of the commissioners to investigate the Venezuelan boundary dispute. President McKinley further honored him by making him ambassador to Germany. His services to this government at Berlin during the Spanish-American war were of incalculable value. He speaks German and French as readily as he does English.

#### SENEGALISE RIFLEMEN.

The French Colonial Troops That Took Possession of Insalah Oasis in North Africa.

The occupation of the Insalah oasis by the column of French troops composed of the foreign legion and the Senegalese riflemen has called forth a protest from the sultan of Morocco, but no one in Paris imagines that any serious consequences will ensue. The frontier between Algeria and Tunisia is intentionally left undefined. France has often had trouble with Morocco, almost invariably caused by the occupation of villages in the vicinity of the border by French troops. M. Flamand, chief of the mission which took possession of Insalah, says that the question of the union of the Sahara to Algeria has been advanced 30 years by the present occupation, and that it will be settled by 1903. The French government has only to establish intermediary stations, one in the direction of Timbuktu and the other in that of Insalah, for the whole thing to be accomplished. Protests from France's neighbors in Africa may be expected.

#### SENEGALISE RIFLEMEN.

(The Bravest Body of Men in the French Colonial Force.)

but at the Quai d'Orsay it is thought that this will make no difference in the eventual result. M. Flamand is opposed on principle to the extension of France's colonial domain, and he considers that it would be better if the possessions already won were organized before the republic starts in search of new territory. But in his opinion France would be guilty of a serious error if she were to suffer the Morocco question to drag on when she can now settle it once for all to her own advantage.

#### Essays Written to Order.

A western firm claims to have been in the business of supplying graduating essays for 21 years. Its price list is as follows: High school orations and essays, \$3 to \$8; college essays, orations and debates, \$3 to \$15; political speeches, \$10 to \$30; lectures, \$10 and upward; sermons, from 50 cents to \$25.

This is Hard to Believe. A faster says that the discomforts of living without eating for several weeks are not serious, and after the first week of fasting they are hardly noticeable.

With so much talk as we hear nowadays about unhappy marriages, and with divorcees rived in number by nothing but trusts, it is a pleasure to see an ideal marriage, remarks the Detroit Free Press. Booker Washington, the negro educator, is developing a character that is commanding universal admiration. He might have married a woman who would have been willing to sit back and enjoy his honors in silence. But he didn't; he married one who can not only aid and sympathize with him in his work, but who can carry on a like work for the benefit of the negro women. Their case is a doubly interesting one. It is not only going to show what the colored man can do, but what the colored woman can do, as well.

Under the new army bill each regiment of infantry and artillery will have a band of 28 pieces, maintained at the expense of the government. Heretofore the army had no music of its own, except at the expense of the officers and the men, as the pay of the band was only that of privates, except as this was supplemented from these sources.

# SCROFULA

## The Blighting Disease of Heredity.

In many respects Scrofula and Consumption are alike; they develop from the same general causes, both are hereditary and dependent upon an impure and impoverished blood supply. In consumption the disease fastens itself upon the lungs; in Scrofula the glands of the neck and throat swell and suppurate, causing ugly running sores, the eyes are inflamed and weak; there is an almost continual discharge from the ears, the limbs swell, the bones ache, and white swelling is frequently a result, causing the diseased bones to work out through the skin, producing indescribable pain and suffering. Cutting away a sore or diseased gland does no good; the blood is poisoned. The old scrofulous taint which has probably come down through several generations has polluted every drop of blood.

Scrofula requires vigorous, persistent treatment. The blood must be brought back to a healthy condition before the terrible disease can be stopped in its work of destruction. Mercury, potash and other poisonous minerals usually given in such cases do more harm than good; they ruin the digestion, and leave the system in a worse condition than before.

S. S. S. is the only medicine that can reach deep-seated blood troubles like Scrofula. It goes down to the very roots of the disease and forces every vestige of poison out of the blood. S. S. S. is the only purely vegetable blood purifier known. The roots and herbs from which it is made contain wonderful blood purifying properties, which, however powerful, are long resisted. S. S. S. stimulates and purifies the blood, increases the appetite, aids the digestion and restores health and strength to the enfeebled body. If you have reason to think you have Scrofula, or the best blood purifier and blood builder known, as it contains no poisonous minerals. S. S. S. is pre-eminently a remedy for children.

When my daughter was an infant she had a severe case of Scrofula, for which she was under the constant care of physicians for more than two years. She was worse at the end of that time, however, and I almost despaired of her life. A few bottles of Swift's Specific cured her completely, as it seemed to go direct to the cause of the trouble. I do not believe it has an equal for stubborn cases of blood diseases which are beyond the power of other so-called blood remedies. S. I. BROWN, Monticello, Ga.

Our medical department is in charge of experienced physicians who have made Scrofula and other blood diseases a life study. Write them about your case, or any one you are interested in. Your letter will receive prompt and careful attention. We make no charge whatever for this.
