The following came from U. P. at Philadelphia to cast their votes for the William McKinley and the whole Republican ticket: Wilfred Focht, B. M. Wagenseller, John and George Schoch.

An old folks' party was given at H. D. Schuure's in honor of Miss Landers of Thurmont, Md. The ladies were all dressed in ancient costume. Refreshments were served and a good time was had.

The Susquehanna football team went to Philadelphia Saturday last to play the P. R. R. Y. M. C. A., but it rained there most of the day and the grounds were unfit, so the game was called off. The boys report having had a good time at the courteous hands of the Y. M. C. A. The sub-team went to Northumberland to play there and were beaten 6 to 0.

The "Wanamaker Hippodrome" made its appearance Friday afternoon on schedule time. It was certainly in the hands of the Democrats. Curiosity to see and hear prompted many to go. From what your correspondent can learn he neither pleased the Democrats nor disgruntled Republicans. I have not heard of a single vote he made; he kept jumping from one thing to another, not finishing any point he wanted to make. Most of them fell flat.

**Only Thirty and Gray**

How is this? Perhaps sleepless nights caused it, or grief, or sickness, or perhaps it was care. No matter what the cause, you cannot wish to look old at thirty. Gray hair is starved hair. The hair bulbs have been deprived of proper food or proper nerve force.

**Ayer's Hair Vigor**

Increases the circulation in the scalp, gives more power to the nerves, supplies missing elements to the hair bulbs. Used according to directions, gray hair begins to show color in a few days. Soon it has all the softness and richness of youth and the color of early life returns. Would you like our book on the Hair? We will gladly send it to you.

**Write us!**

If you do not obtain all the benefits you expected from the Vigor, write the doctor about it. He may be able to suggest something of value to you. Address, Dr. J. C. Ayer Co., Lowell, Mass.

**MIDDLESWARTH.**

Through the kindness of Mr. Curtis, of Kansas, the country is offered an escape from further controversy about the ending of the century. A bill has been introduced in congress, says a Washington correspondent of the St. Louis Globe-Democrat, to settle the matter. It fixes the date. It declares that "100 years make a century each century beginning with the first day of the year designated by the number in that century and closing with the last day of the year designated by a termination of the two figures." In connection with this solution of the century problem the national St. James H. Crozer, tells congress that it is hard to raise through-out the United States what he calls "the grand old system of chronology," or "Crozer's Christian Chronology." The meat of the legislation Mr. Crozer seems to be in the provision which provides "that for the purpose of securing uniformity and method in all governmental papers and transactions the existing departments of the United States shall hereafter be required to employ the chronology with respect to Crozer's series of charts, including Crozer's Table, Years of Time, C. W. and A. D., Crozer's Circular Time Chart, a Perpetual Calendar, and Crozer's Angular Time Chart, a Perpetual Calendar, and in the computation of time the foregoing chart so supplied shall be final and supreme." Mr. Crozer's bill will reach the stage of printing and then repose in a pigeon-hole in the room of the committee on judiciary.

An American consul has been discussing the reasons Americans have for going abroad so frequently and in the numbers they do. He thinks they are principally three: first, the desire to educate their children in Europe; second, the greater cheapness in the cost of living; and, thirdly, a growing dislike of the American yellow press and its methods. The last is no doubt a factor in the case, for its tendency to vulgarize everything is very offensive to those who aim at refinement and the enjoyment of life. This apart, however, it is natural for such Americans as can afford it to seek change of atmosphere and surroundings in the older forms of civilization.

An expert in financial statistics says that the losses by business failures in the last ten years in the United States amount to \$1,800,000,000, which is more than twice the amount of the country's circulating medium. In the same time there was a loss of \$1,300,000,000 by fires, against which there was an insurance of \$800,000,000, leaving a net loss of \$500,000,000. The excess of liabilities over assets in the failures of the ten years represented a dead loss of \$1,200,000 to 150,000,000 creditors. Bad information and mal-administration, were responsible for this tremendous loss.

Among the features of the St. Louis exposition, to be held in 1903, will be a mammoth watch, which will lie flat on its back. It is to have a polished metal case just like that of the ordinary watch, and will be so large and roomy inside that people will be able to walk around in it among the moving wheels. The diameter of the mammoth time-piece will be 75 feet, and its height or thickness 40 feet. The balance wheel will weigh a ton, and what is called the "hairspring" in a small watch will be as thick as a man's wrist. The length of the mainspring will be 300 feet.
