The Eminent Kidney and Bladder Specialist.

the Discoverer of Swamp-Root at Work in His Laboratory.

There is a disease prevailing in this country most dangerous because so decep-tive. Many sudden deaths are caused by heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, or the kidneys themselves break down and waste away cell by cell.
Then the richness of the blood—the albumen -leaks out and the sufferer has Bright's

PURPOSE IN ANIMALS.

Instances That Illustrate Deliber: ation with Which They Sometimes Act.

An amusing incident, which show that animals are subject to feeling very like those which occasionally rufle the bosoms of men, occurred son little time ago at the Jardin des Plants in Paris, says Youth's Companion.

A large elephant, formerly the coter of attraction, found himself sul planted in public favor by a new arriva a young camel. The camel was the latest acquisition, and very naturally engaged the attention of visitors.

The elephant for a long time shower signs of dissatisfaction, and at last it jealousy reached a point where it mus find expression. When the usual crows gathered about the camel, the elephan prepared for action. It filled its trun with water, and with deliberate air discharged the water all over the pecple who stood looking at the bab

This method of throwing cold wate upon the admirers of a rival brought : laugh even from its victims.

Equally wise in making its calcula tions was a cat that chose a peculiar spot for a bed. Comfort was the cat' object, and the chosen spot did not seem to be calculated to afford it. The eat was found fast asleep in a large shipbuilding yard, lying on what seemed to be a very muddy path.

It was found, however, that the spochosen by the eat for its couch was the point at which a lot of steam pipe passed under the road, so that the muwas baked into a warm, dry clay, which made not only a clean but an artificially heated ping place.

A Pennsylvania man has patented a form of jug that allows its contents to flow out quietly, without any sound of gurgling. The handle is hollow and so, it may be remarked, is the idea, The gurgle of a canteen just filled with spring water is certainly musical. 'The word "gargle" itself is really descriptive and pleasing. Mayor Smith, of Macon, Ga., has set in motion a bright plan for the systematic planting of trees in that city, the middle of whose streets are adorned with parks. The city sets a tree for every person who contributes 25 cents. and protects it with an iron box in which is cast any name desired by the donor. These are the cheapest and most lasting monuments yet devised.

CANCER

IS NOT INGURABLE Physicians and friends could give little relief or encouragement to one afflicted with this terrible disease. Even now doctors know of no remedy for this fearful melady; while admitting it to be one afficied with this terrible disease. Even now doctors know of no remeity for this fearful malady; while admitting it to be a blood disease, they still insist that there is no hope outside of a surgical operation, and advise you to have the Cancer cut out, but at the same time cannot assure you that it will not return. You may cut or draw out the sore, but another will come in its place, for the disease is in the blood—is deep-seated and destructive, and beyond the reach of the surgeon's krife or caustic, flesh-destroying plasters. The blood must be purified and strengthened, the system relieved of all poisonous, efforts

matter before the Cancer sore will heal. S. S. S. is the only medicine that can overcome this powerful and contaminating poison and force it out of the blood. Builds up and invigorates the old, and supplies new, rich, life-giving blood. S. S. S. is a purely vegetable remedy; no mineral

can be found in it; the roots and herbs from which it is made contain powerful purifying properties that act directly expect the blood system and make a safe and permanent cure of Cancer. It has cured thousands, why not you?

Cancer is not always inherited; your family may be free from any taint, yet your blood may become so polluted that a secure

Impure Blood Invites Disease, and stubborn form of the disease may develop from a sore or ulcer on your tonguit or other part of your body; a slight bruise

or hort, a little pimple on the eyebid, lips or nose, a small lump on the jaw or breast, a harmless looking wart or mole, and other causes so insignificant as to attract little or no attention. If you have an obstinate sore, don't rely upon salves or ointments to cure it—begin with S. S. S. at once; it will cleanse your blood and prevent the formation of cancerous cells.

Mrs. R. Shirer, La Plata, Mo., writes: "A small pimple came on my jaw about one inch below the ear on the left side of my face. At first it gave me no trouble, and I did not think it was anything serious until the jaw began to swell and became much inflamed. At the same time the sore began to spread and est into the flesh, and gave me intense pain. I tried everything I could hear of, but nothing did me any good. I then began the use of S. S. S. and after taking several bottles the Cancer healed, and there is now no sign of the disease. This was two years ago, and I am still enjoying perfect health." Send for our special book on Cancer; it contains much information that will interest

you; it is free. Write our physicians about your case, and for any advice or information wanted; they have made a life study of Cancer and all blood diseases. We make no charge whatAddress, THE SWIFT SPECIFIC COMPANY, ATLANTA, CA.
