TO BOOM A TOWN.

PERCY PROCTER is the head of a movement to advertise the town of Cincinnati. He would tell of the advantages of the city in thirty newspapers in almost as many places. The advertisement would run once a week for one year.

In explaining his plan Mr. Procter says:—"Continuous advertising is not apt to strike at the right time. A man may have a plant in the wrong town. He knows it, but there is so much money in the plant he cannot afford to move. That night his buildings are destroyed by fire. He is insured. Then he recalls the advantages of Cincinnati, having read the advertisements and the book. He knows where to move to. In every state every day new companies are incorporated, but they cannot be reached by letter before they have decided upon a location, as that is generally done before they become incorporated. Having read about Cincinnati, however, they at least give it consideration. To-morrow evening groups of men may meet in private houses, in clubs or in hotels to discuss the formation of a company to push some invention. The question of location is an important one. Who can know who these men are or what they are thinking of so as to write them about Cincinnati? But if the city has been advertised they will consider its merits.

"The newspaper should be taken into the confidence of those who would have this work in charge. I know from personal experience that they are very willing to publish anything intended to help the city. They give up space and the cost of filling it with type annually to such enterprises worth thousands of dollars.

They are the best mediums for advertising Cincinnati. A merchant or manufacturer may read other things, but he must read his newspaper if he wishes to keep up with the times and to know what the trade conditions are. Advertisements on maps, hotel registers, convention souvenirs, etc., are of no account. The reiteration of advertisements before the same people in publications bought for the reading matter which they contain is the most profitable and successful advertising."

These are some valuable suggestions that should be followed by every town in Snyder County. In addition to the suggestions, the reasons given for the plans are so clear and in fact indisputable that no town wishing to improve can afford to ignore them.

MIDDLEBURG borough is the smallest voting precinct, both in area and population, in Snyder County and the Assessors' returns show that this district has the largest amount of money at interest of any district in Snyder County. This amount is exclusive of the bank stock held here, which also is quite an item. The town through the Board of Trade ought to offer free sites to every legitimate enterprise that agrees to employ a reasonable number of hands. While this action has not been specially authorized, the Post assumes the responsibility of saying that the Board of Trade will do that. We have some beautiful sites for manufacturing plants and plenty of room for the erection of houses for workmen. Let the industries come.

THE town of Adamsburg has organized a Board of Trade separate and in addition to the one at Beavertown. Now the towns of Selingsgrove, Beavertown, Adamsburg and Middleburg have boards of Trade. This is a good idea. Let all the towns of the county follow suit and do likewise. That is the only way to build up the towns of our county. Each new industry gained in any of the towns of the county is a step in the march of progress and opens new avenues for the prosperity of our people. The Post is ever ready to help along the era of prosperity and its columns are ever open for the discussion of such enterprises that bid far to enhance the industrial welfare of any town of Snyder County.

ONE result of the Board of Trade at Beavertown is the proposed location of a new wagon factory to be erected at that place by Mr. Swab of Elizabethtown. This is another proof that it pays to have an active Board of Trade. Organizations of this character place a town in a position to bid at a moment's notice for any enter-

prise that seeks a new location. Manufacturer's in large cities have learned that it pays to go to smaller towns where land and rents are low and they see where they can save money in running expenses of their plants. This means extra profits for them. We hope soon to hear of other towns in the county organize boards of trade and adding new industries.

THE recent rains have been a welcome visitation to farmers and fruit growers of the county. The falling rain added gold dollars to the pockets of agriculturists. The Post wishes to remind the farmers that it is to their interest also to advocate and assist the enterprising citizens of the various towns in the county to locate industries in their midst. As people are employed more regularly and new people come in, it will open new markets for truck farming which will mean extra revenue for every farmer. Let the march of progress continue.

THE electrical storm that passed over Snyder County Monday left disaster in its track. Grubb's church was twice struck by lightning and young Mengle was disabled and thrown from a load of oats near Fremont, while at Selingsgrove trees were badly shattered and torn.

IT is reported in a Juniata Co. paper that a vein of anthracite coal has been found on Shade Mountain, some four miles north of Millintown. The vein is five feet thick, as reported. The discovery however, is doubted, and the newspaper sensibly suggests that the best way to determine is to make a test of what is thought to be coal. A wheelbarrow load of it taken to the nearest coal stove will be sufficient to test it. If it burns and throws off heat what is the difference whether it is found in the lower silurian measures or in the carboniferous measures? If the report turns out all right it will be a great thing for that section of the country.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer one Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

MILLERS REFUSED DEMANDS.

Granted Men Increase Asked For, But Would Not Sign Contract.

Minneapolis, July 30.—At a conference yesterday afternoon between representatives of the packers and millers' union and the four millers, the latter, while granting the advance in wages asked, absolutely refused to sign a contract for a year or any other period. The union representatives withdrew to consider the situation.

The millers say it is unfair for the men to insist upon a contract, inasmuch as such an instrument must be made with irresponsible parties. By that they meant that the men, under a contract, would have them at a disadvantage, as there was nothing to prevent the packers and millers from employers in the lurch.

The original demand of the men was for a five-years' contract at \$2.75 a day for packers and \$2.25 for millers, an increase of 25 cents a day each, but they finally concluded to be satisfied with a one-year contract provided they could get it.

A Minister's Good Work.

"I had a severe attack of bilious colic, Cholera and Diarrhoea. Colic, took two doses and was cured," says Rev. A. A. Power, Emporia, Kan. "My neighbor across the street was sick for one week, had two or three bottles medicine from the doctor. He treated him for some days and he had no relief, so discharged him to go home. He went over to him the next morning. He said his bowels were in a tenor flux, that they had been running so long that it was almost black. I asked him if he had had Chamberlain's Colic, Cholera and Diarrhoea Remedy and he said 'No.' I went home and brought my bottle and gave him one. He told him to take another dose fifteen or twenty minutes if he did not find relief, but he took no more and was entirely cured." For the Middleburg Drug Co.

He Wouldn't Be Busy. "Let me see the funny picture," urged the little one. "But I'm looking at it," replied father.

"Oh, well," she returned, "you look at it after supper, for you have to go out to play." Post.

In Williamsport, Pa., a waiter at a hotel upset a glass of milk on the clothes of a guest. She apologized nicely that the guest sought acquaintance, and shortly after she was married.

DRAWING FOR HOMES

The Government's Unique Lottery for Oklahoma Lands.

MANY THOUSANDS PRESENT

Names First Drawn Were Greeted With Wild Cheers—Crowd Suggested That Lucky Man and Woman Should Get Married.

El Reno, O. T., July 30.—Oklahoma's great land lottery was begun here in earnest yesterday, and when the commissioners appointed by the Federal government adjourned the drawings for the day 1,000 of the choice of the 13,000 160-acre claims in the Kiowa-Comanche country had been awarded.

The first name drawn from the wheels was that of Stephen A. Holcomb, of Paul's Valley, I. T., for a homestead in the El Reno district, and the second, Leonard Lamb, of Augusta, O. T. These two men select the two choicest claims in this district. The capital prize winners, however, proved to be James R. Wood, of Weatherford, O. T., whose name was the first to come from the Lawton district wheel, and Miss Mattie H. Beals, of Wichita, Kan., who drew second number in that district. They won the first filings in the Lawton district, and will undoubtedly choose the two quarter sections adjoining that town. These are considered the most valuable in the territory and are, it is estimated, worth from \$20,000 to \$40,000 each. It is estimated that fully 25,000 persons witnessed the drawing.

Every man who did not draw a prize from the wheels yesterday had steadfast faith that to-day or to-morrow will surely see him the possessor of a slip reading him a title clear to 160 acres of Oklahoma's land.

When the close of the drawing for the day was announced at 6 o'clock hundreds who had neither eaten nor drunk during the day sank to the ground where they stood from sheer fatigue or went wearily to find places for rent or to refreshment booths up town. The day was remarkably free from quarrels, and general satisfaction with the government's method of disposing of the land was felt.

It has been found that many hundred applicants have "repeated," and that others have applications so illegible that they will be thrown out. Over this much discord has resulted, and the outcome may be an appeal to the courts.

NEURALGIA cured by Dr. Miles' PAIN PILLS. "Who cut a doc." At all druggists

The first name brought out for the Lawton district was that of James R. Woods, of Weatherford, O. T., and the crowd went wild. This meant that Woods would be able to claim the quarter section adjoining Lawton town, one of the choicest in the entire country.

The second ticket was drawn, and Colonel Dyer cried out: "I have the pleasure to announce the name of the first woman to draw a prize, Mattie H. Beal, of Wichita, Kan."

Then Colonel Dyer gave her description as 23 years old, 5 feet 3 inches in height, "just the height of Woods." Instantly the crowd caught the humor of the situation, and thousands of throats sent up the shout: "They must get married."

The eighteenth winner in the Lawton district was Minerva McCintock, aged 25, of Oklahoma City. She was married Sunday, and by this act forfeits her right to the claim. She might have chosen a claim near a county seat town worth several thousand dollars.

HONORED THE REGICIDE.

Expatriated Anarchists Commemorated Humbert's Murder in Paterson. New York, July 30.—Barthold Hall, in Paterson, N. J., was packed yesterday by the friends of Bresci, the assassin of King Humbert, of Italy, this being the anniversary of the dead. Pedro Estene, editor of La Question Sociale, said: "I wish every country had a Bresci. Down with monarchy! Down with empires!"

It appeared from further remarks that two others had been selected to do the work which Bresci did, but they failed. One of them, Matteo, committed suicide. The other, Sulerondo, was let off on condition that he kill a shop foreman who was objectionable to the Italians.

Esteve, in conclusion, complimented the authorities of Paterson who permitted "these meetings, while the police of New York and Brooklyn prohibit them."

Choate Says Flogging Has Ceased. London, July 30.—Mr. Choate, presiding yesterday at a distribution of prizes to pupils of the London University School, alluded deprecatingly to the "delicate subject of flogging," which had been abandoned, he said, "years and years ago in America." His utterances have led to some editorial comment in the morning papers, the Standard defending the "ancient method."
