DR. FENNER'S

WORK FOR GOOD ROADS.

Considerable Has Been Accomplished in the Course of One Decade of Agitation.

Ten years of agitation has resulted in a national movement for good roads, but it is only within three years that a tangible progress has been made.

Up to that time there had been a number of state associations. Later these were made to include a number of states, until in 1897 a national convention was called at St. Louis. Twenty-two states responded to the call, with over 2,200 delegates. Other and larger conventions were held in 1898, 1899 and 1900. Several years ago President Moore originated the idea of trips of road instruction. Last year he took a train through Minnesota, Wisconsin, Iowa, Illinois and other western states. The train traveled over 38,000 miles on the trip, built 32 miles of model road, held 38 conventions and addressed 105,000 people. The trip was paid for with tion, but Colonel Parran is much the \$14,000 appropriated by congress for favorite in the running. the purpose. Following this trip, the last national convention was held in OF VITAL IMPORTANCE TO LABOR Chicago. Thirty-eight states were represented.

It was then determined to secure an appropriation of \$150,000 and arrange a trip which would result in a mile of model road being built in each state in the union. At the same time the convention secured the drafting of a good roads plank in the national platforms.

The association failed to get the appropriation asked for, but with the assistance of Secretary of Agriculture Wilson secured \$20,000, which was available for the work since July 1. After the failure to get the money President Moore went to New York and discussed the plan of a southern trip with President Stuyvesant Fish of the Illinois Central. He was enthusiastic over the plan, and at once offered to provide the train and pay a large proportion of the incidental expenses.

The association intends to push the good roads work. Congress and each state will be asked to pass legislation favorable to road improvement. Good roads are conceded to be the opening wedge for every other improvement to follow. One idea advanced is to work the convlet- of a state on its road construction. Over 200 miles of model road could thus be built each year. Tramps and vagrants are forced to build roads in Germany and England.

October 20 is to be Good Honds day in every state in the union. The that day instruction in good road ballding will be given everywhere, in schools, through the press, and, if the day is on Sunday, the pulpit will be asked to assist the cause of good roads.

SAFE FARM BRIDGES.

Truss Arrangement Shown in the Picture Assures a Structure That Cannot Be Improved.

Where streams or ravines on the farm must be crossed by teams, it pays to build substantial bridges; for the other kind are of short life and are a constant menace to the safety of both team and driver. Some bridges are so short that three stout "sleepers" can be thrown across, hav- Whole Families Trying to Exist on ing supports only at the ends, but where the bridges must be longer, a

SUBSTANTIAL FARM BRIDGE.

and for this purpose the truss arrangement shown in the accompanying diagram cannot be improved. Such a bridge cannot well break down so long as the end foundations remain in noon, in which William Rodabaugh, place. The iron rods and bolis show aged 22, was blown to atoms. Rodaplainly the method of construction, and the manner in which support for with 800 quarts of the explosive, and the center is gained. A center sup- when nearing the tracks of the Cinport that is placed beneath the bridge is constantly working loose by the action of frost and the weight of heavy load , a criticism that cannot be ap plied to the form of bridge shown here. N. Y. Tribune.

The Old Strawberry Red.

A Maryland strawberry grower says: My way of bandling old strawherry rows, which I wish to keep for another year is na follows: As soon as they are done bearing I mow off the tops as close as possible, and then apply well-rotted manure, bone meal, if I have it, and wood ashes. This is applied when the weather is damp. After mowing I burn the stalks and leaves. It is now easy to remove all weeds and cultivate close to the plants. This is the time to pile on the fertilizer. Plants then start out a new growth and make a fine bed by fall, when I cover them with straw after the ground freezes.

Trees Restore Fertility.

Many of the worn-out farms of the east may be restored to fertility by growing forest trees upon them for a series of years, and many of them are better suited for the production of timber than for any other purpose. It is fortunately true that worn-out farm lands throughout the region once wooded will usually revert to their previous condition if protected from fire and stock. The process is naturally slow, and the result may be materially hastened and more valuable forest may be grown by the judicious planting of useful species.

PLATT MAY BE NAMED.

By Maryland Republicans As Their Candidate for State Controller. Baltimore, Md., Aug. 6 .- Republican leaders from all parts of the state are in Baltimore this morning getting ready for their state convention, which is held here today. The work before them is the nomination of candidates for state controller and clerk of the court of appeals and the formulation of a platform. But little time will be taken up in carrying out the programme already mapped out. Either Dr. Isaac N. Barber, of Talbot county, or Herman S. Platt, of Baltimore city, will be selected to head the ticket. with the chances in favor of the latter, although it is understood that Dr. Barber, who has served his party in congress, could have it if he wanted to make a fight for it. The court of appeals clerkship will in all probability go to Colonel Thomas S. Parran, of Calvert. Messrs. John E.

Belt, of Prince George, and John E. Waddell, of Dorchester, will also be put in nomination before the conven-

Is Victory For Steel Workers, Says

Building Union. New York, Aug. 6 .- A meeting of the board of delegates of the building trades of this city was held vesterday and the strike of the Amalgamated Association of Iron and Steel Workers was considered. After some discussion a set of resolutions was adopted attacking the United States Steel Corporation, charging that corporation with an attempt to break up the organization of the workers. The concluding paragraph of the resolutions

reads: "Resolved, That we pledge our moral and financial support to the utmost extent to the steel workers in their great struggle, and that if the American Federation of Labor considers it necessary to do so we will refuse to hardie the product of the steel trust as long as the strike lasts. We believe that the winning of this strike by the Amalgamated Association is of vital importance to organized labor all over the United States."

FRISCO'S STRIKE A LONG ONE.

Mayor Phelan's Efforts As An Arbitra-

tor Failed Dismally. San Francisco, Aug. 6.—The outlook for an amicable settlement of the strike has considerably diminished and today indications are that the contest will be a protracted one. The efforts of Mayor Phelan to bring about an understanding between the opposing interests have failed. The belief is general that the strike is to be widely extended. Power to act has been placed in the hands of the labor council, which can call out 50 additional unions, or 25,000 men. Three important organizations, the Sand Teamsters, the Bakers' and Electrical Workers have been already ordered to hold themselves in readiness to quit work at a moment's notice.

A strike of the bakers would shut off the local supply of bread, and if the sand teamsters were to leave their pelled to leave work.

RUSSIA'S GREAT FAMINE.
