Over-Work Weakens Your Kidneys.

Unhealthy Eldneys Make Impure Blood.

All the blood in your body passes through our Minnys once every three minutes. The kidneys are your blood purifiers, they fil-ter out the waste or

impurities in the blood.

If they are sick or out

of order, they fail to do

Pains, aches and rheu-

matism come from ex-

cess of uric acid in the

bloed, due to neglected

idney trouble

Kidney trouble causes quick or unsteady theart beats, and makes one feel as though they had heart trouble, because the heart is over-working in pumping thick, kidneypoisoned blood through veins and arteries. It used to be considered that only urinary

troubles were to be traced to the kidneys, but now modern science proves that nearly all constitutional diseases have their beginning in kidney wouble. If you are sick you can make no mistake

by first doctoring your kidneys. The mild and the extraordinary effect of Dr. Kilmer's Swamp-Root, the great kidney remedy is soon realized. It stands the highest for its wonderful cures of the most distressing cases

and is sold on its merits FE by all druggists in fifty-cent and one-dellar siz-es. You may have a sample bottle by mail Home of Breamp Root. free, also pamphlet telling you how to find out if you have kidney or bladder trouble. Mention this paper when writing Dr. Kilmer & Co., Binghamton, N. Y.

CANTON FILLED WITH MOURNERS

LAST RITES AT CANTON.

Grief and Respect Shown On All Sides. Mrs. McKinley Was Prostrated and Unable to Take Any Part In Funeral

Ceremonies-The Religious Services. Canton, O., Sept. 20 .-- With majestic solemnity, surrounded by his countrymen and his townspeople, in the presonce of the president of the United States, the cabinet, justices of the United States supreme court, senators and representatives in congress, the heads of the military and naval establishments, the governors of states and a great concourse of people who had known and loved him, all that is mortal of the third president to fall by an to fall by an assassin was laid away.

It was a spectacle of mournful grandeur. Canton ceased to be a town and swelled to the proportions of a great

south, and from the east and west, the human tide flowed into the town until 100,000 people were within its gates, here to pay their last tribute to the fallen chief. The final scenes at the First Methodist church where the funeral services was held, and at the beauthul Westlawn cemetery, where the bady was consinged to the vault, were simple and impressive.

The service at the church consisted of a brief oration, prayers by the misisters of three denominations and singing by a quartette. The body was then taken to Westlawn cemetery and placed in a receiving vault, pending the time when it will be finally laid to rest beside the dead children who were buried years ago. The funeral procession was very imposing and included not only the representatives of army and navy of the United States, but the entire military strength of the state of Ohio and hundreds of civic organizations. One of the most pathetic features of the day was the absence of Mrs. Mc-Kinley from the funeral services at the church and from the cemetery when the body of her husband was laid to rest. Since the first shock of the shooting, then of death, and through the ordeal of state ceremonies, she had borne up bravely. But there was a limit to human endurance and when yesterday came it found her too weak to pass through the trials of the final ceremonies. Through the open door of her room she heard the prayer of the minister as the body was borne out of the house. After that, Dr. Rivey remained close by her side and although the full force of the calamity had come upon her it was believed by those about her that there was a providential mercy in her tears, as they gave some relief to the anguish of the heart within.

YOUNG BELGIAN HARES.

Are Very Susceptible to Densights and Caunot Stand as Much Cold as the Old Ones.

From the time of weaning until the young have passed through their first moult, is, perhaps, the time the most ie should be taken in feeting, of any time during the animal's entire life.

It depends somewhat on the kind of feed the mother had been given as to what the little hares can be fed. If the mother had been fed green weeds with a little hay and grain the young ones can be fed the same kind of feed, only the quantity of green feed should be diminished and the dry hay and grain increased in proportion. It is well for the first week or two to feed a little sweet milk or milk and bread after weaning. The little hares soon learn to cat, and look forward to feeding time the same as the older They are perhaps the most ones. easily reared after the stage of weaning of any domestic animal.

We find it better to feed a little oftener at this age than we feed our older hares, or at least to have plenty of good, sweet hay before them all city. From every city and hamlet in the time. When they reach the age of three months we feed them as we do

the others. At three months of age they should be gone over carefully, and the does and bucks separated. Those not good enough to use as breeders may be sent to the table or saved until they are older and heavier, and then killed. Young hares are susceptible to Iraughts and cannot stand as much cold as grown ones. To keep snuffles out of your rabbitry it is important that you provide comfortable quarters for the young haves.

Plenty of room for exercise should bo given the growing stock, for they enjoy a good run quite as much as they do a good feed of oats, and will run in a circle around a pen five feet by five feet if a larger pen is not provided to get the required exercise. Hares that have all the room they need in which to exercise will not cause their owners as much trouble as those penned in small butches or runs. The large run does not have to be cleansed as often as the hutch, and ali kinds of green stuff is fed with impunity as long as they have a variety to choose from.

We always keep a lump of rock saft where our hares can get it at any time, and whenever feeding corn chop we mix a little salt in it and occasionally add a spoonful of oil meal to each quart of the chop, moistening all slightly with hot water. The mash is still warm when it reaches them, and is an excellent food for haves of any age, but more particularly those just weaned.-National Rural.

VENTILATING A STACK.

Stake and Trough System Which Some Farmers Consider to the Without an Equal.

the field to dry out before they are taken into the barn or other buildings. If three stakes are driven into

For Her Sake. "You don't mean to say that you

have taken to smoking!" "Yes," answered the young man with red cheeks and pearly teeth. "But I thought you disliked tobacco."

"I don't core much for it. But I have not succeeded in making the impression I haped for with the dearest young woman in the world. So I thought I would make arrangements. even at some personal inconvenience to give up smoking for her sake. That always appears to make such a profound impression."-Washington Star.

May Know Too Much.

"Do women who have had the advantage of advanced education make good wives?" asked the bachelor. thoughtfully.

At this the benedict took him to one side, where he could speak confidentially.

"If you ever marry," he said, "and find occasion to frame up a real good excuse for a protracted session at the elub you will discover that it is possible for a woman to know too much."-Chicago Post.

A Useful Gift.

"Does Josh use that nice new alarm clock I sent him from the city?" asked Farmer Corntossel. "Yes," answered the young man's

mother. "He seems perfectly fascinated. He carries it around with him all the time." "But does he use it to get up by?" "No. He uses it more'n that. He

sets it twice a day, once fur dinner an' once fur supper. He says he ain't so pertickler about breakfast."-Washington Star.

Side Lights on History. Now, Jonah, after the termination

of his three days' engagement with the whale, started for his old home to tell the neighbors. A thought struck him.

"No," he said, "I shall not say a word about it. They would say it was nothing but a fish story." But it leaked out in spite of him.-Chicago Tribune.

Got Hhs Standing.

Miss Coy-Do you really think # girl can find out who her husband will be by consulting a fortune-teller? Miss Wise-Perhaps not, but I found out who my husband wouldn't be by that method not long ago. Miss Coy-Really? What fortune teller did you consult?

MARCH TO THE GRAVE

Final Chapter In the World-wide Tragedy is Closed.

Canton, O., Sept. 20 .- No greater rev erence has ever been shown to any man, living or dead, than was exhibited toward the dead president in Canton yesterday. As the funeral car passed through the streets men and women sobbed convulsively. Soldiers formed an unbroken line on both sides of the street from the house to the cemstery. Nature has been kind in selecting the last resting place for President A Mosthly Journal-HUNTER-TRADER-TRAPPER tells all about hunting, trapping and Raw Fur Trading. Published by an old er-perienced hunter, trap-ple copy, 5cts. Only 50 cents a year. Address, A. R. Harding, Publish-er, Gallipolis, Ohio. McKinley. Westlawn Cemetery is on the body of William McKinley is laid to rest. The beauty of the grounds here attracted the attention of the country's best landscape gardeners, Yesterday it was doubly beautiful, with the rustling trees giving off their. first yellowed leaves of fall, and add-

ing a golden touch to the green-clad slopes. Just inside the stately entrance stands the gray stone vault, where for a time the casket will repose. Its dreary exterior was relieved by great or metal scraper of any kind, if tools masses of flowers, banked all about and above until the gray walls were shut out from view, but in due time it will be taken from the vault and committed to the little plot of ground lying further on.

the ground and a V-shaped, inverted trough is placed, as shown in the cut, and the stack built about the stakes, the air will have access to the interior of the stack, whence it will pass out at the top, if stakes sufficiently long have been used. The stakes also serve a useful purpose in giving stability to the stack when being built, and in holding it up against the effect of winds thereafter .- N. Y. Tribune.

Concerning Farm Manures.

While the fertility is kept in large measure upon the farm, and a degree of security is experienced thereby, it is interesting to calculate what percentage of this fertility actually gets back to cultivated fields upon the farms of a neighborhood and in many cases the owner of a farm would be alarmed if he knew and realized how slender a reed he leans upon when he refers to his practice of keeping the strength of his soil on the farm. Some calculation would show to many that not one-fourth of this plant-food is returned to ground that produces their plowed crops. It is business to figure on this, and to stop leaks or else supply fertility in some other way .- Farm and Fireside.

How to Keep Tools Bright.

Take crude petroleum, which is sometimes sold as lubricating oil, and any cheap mineral paint that you get for about four cents per pound, and make a mixture. Apply this by means of a brush of some kind to the parts of the tools which it is desired to protect. This will keep them perfectly free from rust, and they may be used the next spring without going to the trouble of scraping off the mixture with a brick are used shortly after the mixture is applied it of course should be applied again before they are put away .-- L. H. Callaway, in Farmers' Voice.

A farmer's back yard affords an index of the man's farm life and habits.
