BROSIOUS BROTHERS

GLOBE WAREHOUSE

Keep These Truths in Mind:

We sell exactly as we advertise. We are never "just out" when one asks for an advertised article. Furthermore, we do not "color" our advertisements. We simply tell the plain fact; we claim our prices are lower than all others; we claim that our variety cannot be matched in Sunbury. Expensive experience elsewhere will convince you that we hardly claim too much.

THE "BEST" SYRINGE.

Its Superior Qualities, and Directions for Its Use, Together with a Common Sense Talk for Women.

This little folder is written in behalf of suffering women; in fact, it is a woman's folder. It is written by a physician seventy years of age, who has given forty years of his life to the study of women's diseases, their causes, and best means of cure. For thirty years of this time he made a specialty of treating these diseases. During all this time he felt that he was working at a disadvantage by reason of a lack of suitable appliances for their treatment and prevention at home. After much thought, study, and experience, he has formulated an instrument to meet this want.

To know that such an instrument is needed, it is only necessary to know that not more than two of every ten women are really healthy women. If this statement is correct (and the women themselves are the witnesses) it proves that there exists some common or almost universal cause which produce such conditions among women. It is the mission of this folder to note these causes and to put into the hands of our women means of alleviating their suffering. This instrument and this folder are these means.

Women and men are destined by Nature to stand or fall; to enjoy or suffer together. Both are subject alike to misfortune, sickness and suffering; hence, what is for the good of one is equally so for both. They stand or fall together.

I can think of nothing more encouraging than to see a healthy young couple join their fortunes in marriage and face life with hopes and ambitions born of healthy youthful blood. But, alas! they are untaught! I can think of a no more discouraging picture than to see this couple three to five years later—the man disheartened and the woman physical wreck—only a fit subject for the woman's hospital, where from six months to a year's treatment, at the cost of several hundred dollars is necessary to restore her health and vigor. Fortunately are they who're able to do this, and the wife returns to her home cured. But they are still untaught. The conditions remain the same, and a short time brings the same results. She is again an invalid, and their second hopes are blasted. Thus with the helpless, innocent children, whom she loves more than her life, the mother continues to drag out her dreary existence in an effort to care for them, until the pitying hand of a kind Providence relieves her suffering in an untimely grave.

But again, alas! What of the poor classes who must toil through all of their suffering for daily bread? Women of America, have you seen such, and do you think the man suffers none in all this? Verily, they are one, and must stand or fall together. But to the causes of all this trouble. Cleanliness is next to Godliness. In the matter of health it stands pre-eminent and first. These "female diseases" are essentially filth diseases. Do not let this radical statement put you out, but read on. These diseases being sexual, they affect the sexual organs. It is known to every woman that the part of her organism called the vulva, if not often cleaned, becomes covered with light-colored, sebaceous matter of offensive odor, and if permitted to remain becomes irritating, causing a disease called vulvitis. The disease, at first, is simple and easily cured by frequent cleaning and applications of weak solutions of sugar of lead, or other simple astringent.

It is also known to men that beneath the prepuce is a similar secretion, which, if not removed often causes a similar disease called balanitis. It like the former, at first is easily cured by similar means. If these conditions are neglected, they become serious, and the disease may be transmitted by sexual congress. Women may be more cleanly than men; I hope they are. Men, I know, are not as cleanly as they should be. Some neglect sexual cleaning for weeks and go to their wives in this unwashed condition. The friction of the embrace deposits within the body of the women this substance—the dead animal matter—which, in the presence of the warmth and moisture of the parts is decomposed and immediate irritation and inflammation of the vaginal mucous membrane results, followed by an ichorous, irritating, offensive discharge, which sometimes excoriates and inflames the entire parts. The woman now has leucorrhoea, or "whites." The doctor tells her it is a simple disease and only requires a simple wash with an ordinary syringe. This advice is followed but, does a cure result? Never! Why? Because first, he has not a syringe that will completely cleanse the parts, and, second, he does not instruct her as to the cause and teach her to avoid it. Time passes and the condition continues. The discharge soon causes a relaxed condition of the vaginal walls and broad ligaments. The womb, deprived of its natural supports, the broad ligaments settles down in the pelvis, causing pain in the back, dragging sensation in the hips, and a feeling that the organs would fall asunder. She now has prolapsus, or "falling of the womb," a pitiable condition which doctors fail to cure. Recovery only follows by a removal of the cause and a term at the hospital with rest, hygiene and proper treatment. Now, all of these troubles, suffering and expense may be avoided and married life made peaceful and happy. How can this be? you ask. Buy one of Dr. Ball's "BEST SYRINGES," use it, and obey the instructions of this little folder, and health will come and come to stay. A perusal of the following "Seven Points of Superiority of the Best Syringe" will convince you why this is so.

First. It is made of metal that will last a life time.
Second. Its size is such as to produce sufficient dilation in many cases of itself.
Third. The dilation is made by a silk like air chamber, without pain or injury to the parts.
Fourth. The air chamber fills the double office of dilator and dam, or shield, thus obviating the necessity of pressing a pad against the perineum to prevent leakage.
Fifth. Dilation is continuous and independent of other processes and under complete control of the operator or patient.
Sixth. Cleansing and disinfecting may be done, and the application of astringent solutions made without readjusting or changing the instrument.
Seventh. It is most easily used, and the work of cleaning is absolutely sure and complete.

It is objected to this syringe that it may be used to prevent maternity. For this reason doctors object to its general use because it cuts their fees. The objection, though valid, is not against the instrument, or its proper use. The same objection is made to many useful articles which have been applied in manners for which they were not intended. But women know what they want, and that is a preventive and cure for their suffering. Besides, the objection raised carries with it a reflection which the author hereof hesitates to make.

The syringe is sold by Dr. J. Parker Ball, of Hesston, Kansas, and is sent, with full directions and a copy of this folder, all prepaid, on receipt of price, \$3.00. It is also sold by druggists and agents, and may be found at wholesale with McPike Drug Co., Atchison, Kansas, and C. E. Hotts Drug Co., of Wichita, Kansas.

The syringe will last a lifetime but some of its rubber attachments in time may need renewal. These may be had, by mail at the following prices. Air chamber 10c; 3 for 25c; bulbs, 25c each; tubing, 5c per foot. Address, DR. J. PARKER BALL, Hesston, Kansas.

Directions for using "BEST" Syringe.
First. Attach the tube of a fountain, or common bulb syringe, filled with the fluid to be used, (staid by clasp and hung on a high nail, if fountain) to the middle tube of the instrument.

Second. Pass the instrument and inflate the air chamber by forcing air from bulb into it, press the bulb with thumb and finger while bulb is refilling, to prevent air from returning to bulb, and to force bulb to refill through rear valve. Two or three inflations are sufficient. Close the clasp and hold.

Third. Unclasp the fountain and operation commences by flow through middle tube and small irrigation holes, returning through lower tube, carrying with it all mucous, or other unhealthy discharge, and leaving parts perfectly cleansed.
Cleansing, disinfecting, astringent

Laxative Bromo-Quinine Tablets
the remedy that cures a cold in one day

or medicated solutions may be thus used, either from fountain or bulb syringes. Observe that the air chamber performs the double office of dilator and dam, or turn flow, while the cleansing goes on, thus insuring the removal of all secretions of all kinds, and assuring perfect cleansing, purity and healthy condition of the parts.

We would suggest the observance of other hygienic conditions, such as a general bath, with free rubbing and spitting of the surface of the body, as often, at least, as once a week; full, frequent, deep breathing of pure air, and, if, as is so many cases in ten, the bowels are constipated, inject high up into the rectum, twice a week, two or three quarts of warm water, soapsuds or a weak solution of salt. This should be well kneaded and worked high up, thus thoroughly emptying the rectum, which is the common sewer for all refuse matter of the alimentary canal. After this cleansing of rectum, a quart of pure water should be passed into it and left there. In a few hours this water finds its way out through the kidneys, removing all refuse matter from this channel also. These hygienic measures are necessary for restoring and preserving general health.

Dr. Ball's "BEST" Syringe, recommended in this folder, is the only through, common sense, cleanser and its use the best and surest preventive and cure for these so-called

"female diseases." Secure one of the instruments at once, by remitting the price, \$3.00 to DR. J. PARKER BALL, Hesston, Kansas. Mention the Post when you write. 11-14.

The Measurement.
"Do you think a man in politics is measured by the amount of money he has?"
"Certainly not," answered Senator Sorghum. "What counts is the amount of money he spends."—Washington Star.

Overheard in Chicago.
Mrs. Flutterby—Did you ever see a sickle a woman as Mrs. Michigan? She was divorced from her husband two months ago, and now she has married him again!
Mrs. Kindly—But her second husband was such a failure!—Judge.

Easily Remembered.
One's memory may be bad, and yet, O! Christian men and brothers! It seems we never can forget The good we do to others. —Philadelphia Press.

BRAIN-FOOD NONSENSE.
Another ridiculous food fad has been branded by the most competent authorities. They have dispelled the silly notion that one kind of food is needed for brain, another for muscles and still another for bones. A correct diet will not nourish a particular part of the body, but it will sustain every part. Yet, however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. It must prepare for their appearance or prevent their coming by taking regular doses of Green's August Flower, the favorite medicine of healthy millions. A few doses of digestion, stimulates the liver to healthy action, purifies the blood and makes you feel buoyant and vigorous. You can get Dr. Green's reliable remedies at Middleburgh Drug Store. Advantages a Green's Special Almanac.
