Zinc and Grinding Make
Devoe Lead and Zinc Paint wear twice
as long as lead and oil mixed by hand
11-21-1y.

Letter to Carbon Seebold.

Dear Sir: One coat of Devoe is better
than two of mixed paint.
The American House, at Tannersville
(Catskill Mts.), N. Y., Chas L. Wiltse,
had two coats of Mixed Paint five years
ago; last spring had two more coats of
the same.

Owner was going to use Devoe but
got his Mixed Paint a few cents less.
Right across the street, Chas. Harner
painted one coat of Devoe at the same
time—last spring.

The Harner house is the better job;
but wait five years.

The point of the story is that Wiltse
is sorry already. He has learned some-
thing that not one man in a thousand
knows—that a gallon of one kind of
paint can contain twice as much paint
as a gallon of another kind of paint.

You can't afford to put on another
paint even if you have it given to you.
At the same time, you see, that Mixed
Paint appears to have worn five years
—give the devil his due.

Yours Truly,
F. W. DEVOE & Co.

IMPURE BAKING POWDER SEIZED.

The New York Board of Health find it
Contains Alum and Rock. Declare it
Dangerous to Health and Dump
it into the River.

The New York papers report that the
Health Department of that city has
seized as dangerous to health nearly
two tons of cheap mixtures sold for
baking powder, and dumped them into
the offal scow to be destroyed. More
of the powder was found in a Sixth ave.
department store. The report of the
analysis of the Health Department
stated that it was "an alum baking
powder" containing alum and pulver-
ized rock.

The different Health authorities seem
to have different ways of repressing
the sale of bad baking powder. In
England they have prosecuted the
grocers under the general law and
broken up the traffic. In Missouri the
sale of alum baking powder is actually
prohibited by law. In New York they
seized the wholesome stuff and cast it
into the river, without any discussion.
The latter way is certainly effective.

The alum baking powders are usually
offered at a low price, ten to twenty
cents a pound, or with some prize, as
a temptation to the housewife.

Consumers can protect themselves
by buying only high-grade baking
powder of established name and rep-
utation. Do not be tempted by the
grocer to take something else as "just
as good" or "our own brand," for the
trials show that the grocer himself is
often deceived by unscrupulous makers
and is selling an alum powder without
knowing it.

There are several good powders on
the market; let the housekeeper insist
on having what she knows is right,
and not be induced to risk the life of
the family for an imaginary saving of
a few cents.

By this time Craig was stand-
ing before her, his face deathly
pale. When she came to the
end of her words, he said in a
voice low, sweet and thrilling
with emotion:
"Ah, if you only knew! Do
not make me forget myself.
You do not guess what you are
doing."
"What am I doing? What is
there to know but that you tell
me easily to go?"
She was struggling with the
tears she was too proud to let
him see.
He put his hands resolutely
behind him, looking at her as
if studying her face for the
first time. Under his searching
look she dropped her eyes, and
the warm color came slowly
up into her neck and face.
Then, as if with a sudden re-
solve, she lifted her eyes to his
and looked back at him un-
flinchingly.
He started, surprised, drew
slowly near, put his hands up-
on her shoulders, surprise giv-
ing place to wild joy. She never
moved her eyes. They drew
him toward her. He took her
face between his hands, smiled
into her eyes, kissed her lips.
She did not move. He stood
back from her, threw up his
head and laughed aloud. She
came to him, put her head up-
on his breast and, lifting up
her face, said, "Kiss me." He
put his arms about her, bent
down and kissed her lips again
and then reverently her brow.
Then, getting her back from
him, but still holding both her
hands, he cried:
"No, you shall not get I shall
never let you go!"

Design for a Proposed Soldiers' and Sailors' Monument for Snyder County
Penna., by Architect J. F. Stetler, Middleburgh, Pa.

The plans call for a monument 18 feet
square on the base and 48 feet high.
The monument contains a room inside
12 feet square, 12 1/2 feet high. The sides
are to be lined in marble, on which can
be cut the name of every soldier in the
county. In the centre of the room is
located a large square glass case with
as many departments as there are G.
A. R. Posts in the county, numbered
to correspond with No. of Post, for the
preservation of records and relics. The
room contains three windows. The
one on the right as you enter is to have
a life-size figure of Pres. Lincoln in art
glass, the one on the left, of Gov.
Curtin, the one on the rear to have the
State Coat of Arms and Angel of Peace,
all in art glass. The four branches of
service, Infantry, Cavalry, Artillery
and Navy, are represented by life-size
statuary in bronze on the four corners
of base. The dome is surmounted by a
bugler in bronze—heroic size. At the

base of the dome are four spread eagles.
Over front door is a pediment 18 inches
by 7 feet on which the name of the
monument is to be cut. This pediment
supported by two 10-inch turned and
fluted columns with Ionic capitals.
Monument also has 24 fluted pilasters
with Ionic capitals. The terrace on
which it stands is 50 feet square, lower
