## CHIEF OF ORDNANCE.

Young Man Now in Charge of Important Department.

A Few Weeks Ago William Crosler Was a Plain Captain, Now He Holds the Rank of Brigadier General in the Army.

The president recently appointed Capt. William Crozier, of the ordnance department to be chief of the bureau of ordnance of the army with the rank of brigadier general, to fill the vacancy caused by the reaccount of age.

The appointment of Gen. Crozier was made largely upon the recom-mendation of Secretary Root, who desires to suround himself with acstrated his ability in nearly every department of ordnance, and has shown a wide business, and has shown a wide knowledge of all af-He was the mintary memory at The they spray, the more dirt and bacin bringing about the agreement from the foremilk must be avoided by finally reached for more humane conduct of war.

ordnance in 1881. He became a captain in 1890, after 14 years' service. During the Spanish war he served as a major and inspector general of volunteers. During his career as ordnance officer he has given the strictest attention to guns and gun carringes, and was a joint inventor, with Gen. Buffington, who retired

#### SCIENCE IN MILKING.

Sood Cows Are Prequently Ruined by Men Who Do Not Know How to Handle Them.

Milking is an operation which requires skill, as it has an important fleet on the amount and quality of milk given. Dairymen know that there are as great differences between milkers as between cows and that cows will do much better with good milkers than with others. Indeed. good cows are often almost ruised by poor milkers.

The milker should avoid handling the cow more than is necessary, and tirement of Gen. A. R. Buffington, on he should make it a rule to de his work quickly and thoroughly. He should never go from a sick to a well has become very favorably impressed with Gen. Crozier's ability, and who should never be practiced. Some peotive men of high professional ability in the conduct of the military establisment. Gen. Crozier has demonstrated his ability in the conduct of the military establisment.

HOUSE FOR THE BEES.

A Structure Which Is Quite as tecable in the Hot Months ta Cold Weather.

It is 14x20, 12 feet to the roof, and stories. The bees are kept in the per story along the south and walls, as the north and west are favorable to face a hive. The do lines in the cut represent plank se 6 inches in back of the hives and tending 3 or 4 inches higher than hive when the super is off. Hives inches apart, 6 inches above the and 4 inches from the wall. All a around and below the hive is filled sawdust. In winter the dust is put on top the hives, but when supers are put on in spring it is moved, but that around the hive

HIVES IN BEE HOUSE.

left the same as in winter. If objected that this makes the bees warm in summer, I reply that t in the house, I use no tops and i treme warm weather I pull off theel covers ... ' thus keep them co than if the utdoors.

The of sol on the wall are n

THE THE THE THE THE THE

by naili a seantling 2x4, 4 incabove the floor along the wall, name side to the wall. The sawdust which the hive sits comes to the of this scantling. On top of this 2x4 blocks 5 inches long and as apart as the hives are wide; then top of these nail another 2x4 scant as shown by lower figure in cut. holes are thus made for each hi inches wide, 4 deep and as long the hives are broad. The weat boarding is sawed out to fit the ! The hives are pushed up tightly again these scantlings and packed arou with dust. The sun was too hot summer on the south side, so I be a little roof about 2 feet wide ab these openings for shade.

The rest of the floor room above used to store supers, frames, extra ors and the many things necession beekeeping. My object in keeping in a second story was to confor nature. In this latitude a bee, fi to itself, never seeks a home nea ground, but high up where the s pure. Keeping bees near the gr of much disease. In the lower s placed an incubator and steam by er, thinking it would help keep bees warm during the most trying of the year, but when spring camsoon as I let the little chicks ou the house through the run holes. bees went for them and stung then death. I took revenge on the bees turning the lower story into an house, which in no way seems to

feet them. The bee house has many advanta over the outdoor plan. I know of one disadvantage. By placing l so close together the young queen returning from their fecundat flights sometimes mistake their h and a swarm is lost. But I have a the house 15 years, and have had little trouble in this way .-- W. L. derson, in Farm and Home.
