

A MODEL HOG HOUSE.

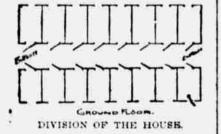

Number of Animals It Will Accom modate Is Limited Only by Length of Structure.

The plan of this house was given us by one of the most successful swine raisers in the west-a gentleman who has frequently topped the Chicago market during the past 40 years. He holds that one of the most essential things in the business is a good house, properly constructed and kept clean. His building is

CONVENIENT HOG HOUSE.

16 feet wide, with a row of pens down each side, and a four-foot alley in the middle. The pens are six by eight feet, with a gate opening from each into the alley, and a window in each. The house stands north and south, so that the sun can shine in both from the east and the west. The entrance ways are at the ends of the alleys. The foundation is built up two or three feet from the ground so that there is a free circulation of air beneath, and no chance for rats or mice to harbor. There need be no fear of cold in winter as a house of this kind. if built with any degree of care, will not freeze even in the coldest weather with a drove of sleeping swine in it. In fact some care must be ex-

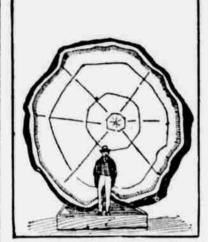

ercised to give good ventilation so that the animals will not become overheated and catch cold in the open air at meal time. A good roof that will turn snow and rain is essential. With cracks battened and tight doors and windows, the temperature can be controlled by watching the ventilators, which can be the windows, or shutters placed in the gable ends for that purpose. The number of hogs the house will accommodate will be limited by its length.

This house is designed for sleeping quarters mostly, although it may be used by sows at farrowing time. A layer of straw scattered over the floor will make sufficient bedding. This should be changed as often a it becomes dusty. If the hogs are given proper attention, there will never be other cause for cleaning out the pens. Catching an individual hog is an easy matter. Watch when he goes into the house, follow him into a side pen, drop the gate and he is yours. Loading for market, too, is an easy job. Let a chute be arranged at the end of the alley, if the elevation is not sufficient to make the floor on a level with the wagon bed. get the hogs into the pens, close one alley door and back up the wagon at the other, lift the gate, drive the hogs into the alley, then into the wagon-J. L. Irwin.

BIG BLOCK OF REDWOOD.

Its Diameter Is Nore Than Eighteen Feet and Its Circumference Exceeds Fifty-Six.

On exhibition at the American Mueum of Natural History, says the New York Herald, will soon be seen the largest section of a tree ever brought from a forest, which is considered the finest specimen of its kind in the world. The fast passing away of the giant redwood trees-due to the ax of the commercial lumberman-those majestic relies of the forest primeval and the great ice age, is rapidly going on, and it will only be a question of time when all save those standing in the

SLICE OF A GREAT TREE. of the Wonders at the New York (One Museum of Natural History.)

government and state reservation groves will be destroyed.

This huge block of redwood, now skillfully polished, forms a striking big tree exhibit, whose like cannot be seen outside of a visit to southern California. An idea of its gigantic proproportions is vividly shown in the illustration by the six-foot man standing at the base, whose figures reaches only a third of its height. The diameter is more than 18 feet and the cir cumference is 56, and it is surrounded by a fringe of cinnamon-colored bark a foot deep in some places. The specimen will be the main feature of the new wing of Forestry hall.

The tree began to grow 550 A. D., and was 13 feet in diameter when Columbus reached our shores, and when cut down it was 1,340 years old. Some of the trees in the same vicinity are said to be from 5,000 to 8,000 years old.

HABIB ULLAH KHAN.

Both England and Russia Are Pleased with Conduct of the New Ameer of Afghanistan.

Habib Ullah Khan, who succeeds Abdurrahman Khan as the ameer of Afghanistan, is the son of the late ruler, and the eidest of three brothers. The kingly houses of Afghanistan go back to remote obscurity. Its political history is inextricably entangled with that of India. The whole country was conquered in medieval times by Timur, the mogul, whose descendants retained possession of the realm for many centuries. In 1747 Nadir Shah, the Persian ruler of the country, was assas- right pieces, and engage in the teeth of this medicine in the house, essinated, and after his death Ahmad Shah confederated the provinces into a great dominion extending to Kash-

THE FARM GRINDSTONE.

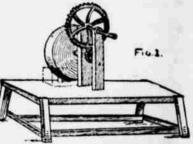

Much of Its Usefulness and dvailsbility Depends on the Way in Which it is Mounted.

The old-fashioned home-mounted grindatone is rapidly going out of use United States Department of Agrion the modern farm. When a ballbearing stone, mounted with foot power atatchments and furnished with a seat for the operator, can be pur-

instead of buying a stone and fixtures and barrel of the dairy cow.

by foot power. The man holding the tool or object to be ground can give more attention to what he is doing when he does not have to use his feet to keep the stone turning, and can hold the tool more steadily.

To do good and speedy work in most cases the grindstone should revolve as fast as possible, and in Fig. 1 is shown a method of mounting that permits greater speed than the ordinary

MOUNTED FOR HIGH SPEED.

method. This way of hanging is best adapted to stones of not too great diameter. With too large a stone the increase of speed might be more than counterbalanced by the extra power required to turn the crank. To mount a grindstone in this manner, obtain first a two-inch plank about four feet in length and as while as possible, say 18 inches. At the center of plank mortise three holes in which to insert solidly three two by three-inch .. uprights, which serve as bearings for the young men wild over me!"

grindstone and the cog wheels. Two of the uprights are each twenty-four inches long and the other twelve inches. The two long upright pieces may be spaced spart to agree with may be spaced spart to agree with thiskness of the cog wheels and the shorter upright, at side of grindatone (not shown in illustration) may be set about four inches from the one next to it, distance depending on thickness of the stone. Procure two metal cog the stone. Procure two metal cog scribe. This is not intended as a free wheels from some piece of unused machinery, one fifteen inches and the other three inches in diameter. Have little sufferers who may not be withthe large wheel turn on an axle with in easy access of a physician. No a crank, in bearings on top of long up- [family should be without a bottle

which is kept constantly going to furnish motive power for the various works in conenction with the establishment. The incubator is said to be working well and bringing out a large percentage of ducks. This season the machine has brought from 10 to 80 per cent. and the proprietor has about 5,000 ducklings. The incubator will be watched with much interest by the American incubator men.-Journal of Agriculture.

WILLIE WALLIE ASTOR

Self-Expatriated American Million sire to Be Created a Baros by King Bdward,

Latest official report has it that WIL liam Waldorf Astor will be created Baron Cliveden of Taplow.

Mr. Astor's ennoblement is certain, ly unpopular and causes resentment even in ministerial circles. But it is said for him, half apologetically, that he contributed \$250,000 to the last tory election fund and will give as much before the next general election. The man whose tremendous fortune was made in the country that thrashed George III. is a tory of tories.

It is authoritatively said, too, that Mr. Astor will sell the Pall Mail Gazette at the moment of his ennoble.

WILLIAM WALDORF ASTOR. Former American, to Be Created Lord Cliveden of Taplow.)

ment. He does not consider the proprietorship of a newspaper to be eon. sistent with the dignity of a peer of England. Nevertheless, Lord Glenesk, proprietor of the Morning Post, is one of the ablest, most respected members of the house of lords. Lord Glenesk has never dreamed of selling his newspaper, which, however, is an extremely valuable property.

Formerly there was a legal obstacle to the creation of naturalized Englishmen as peers. This law was enacted to prevent William of Orange from making lords of a number of his Dutch friends.

Cliveden, from which Mr. Astor will take his title, is the splendid seat which he bought from the duke of Westminster several years ago. The price was then said to be \$1,250,000.

Cliveden is on the Thames, between Taplow and Cookham, about seven miles above Windsor. The famous mansion towers behind the rippling Thames for a mighty most. Long the woods of Cliveden were the resort of many a river picnic, but Mr. Aster felt compelled to close the grounds to visitors.

Cliveden house has been wetten largely in English history. Perbaps the most celebrated of its owners was George Villiers, second duke of Buckingham, the witty and profligate favorite of Charles II. The addition of the words "of Taplow" to the new title will, as usual, further individualize it. It has long been known that Mr. Astor's social and political ambitions pointed straight to the house of peers. The head of the house of axative Bromo-Quinine Tablets | Astor, he chose to expatriate himself in 1895 and take up his residence in England.

NOTES FOR SHEPHERDS.

Feed regularly as well as liberally. Give pulverized alum for scours, with wheat bran.

Have water convenient for your sheep. They drink little and often.

Keep the lambs growing from the start. If fat, sell them when they weigh 30 to 50 pounds.

Ewes that prove poor mothers, or refuse their own lambs, might as well go to the butcher.

Do not feed lambs on rape alone, but necession them to it gradually when feel with other fodder.

An authority on lambs for market says purched or high-grade lambs should not be kept beyond six about by the accession of the late Inchitles.

In feeding shredded own folder to sheep. bran and onto may be salzed with the storer to avoid any triance that may come from cover-
