LIGHTNING STRIKES UP.

The Earth Becomes Charged with Negative Current Which Rushes Upward.

The cause of death by lightning is the sudden absorption of the electric current. When a thundercloud, which is highly charged with positive electricity, hangs over any certain place, the earth beneath it becomes abnormally charged with the negative electric current, and a man, animal or other object standing or lying directly beneath also partakes of the law of attraction.

GLACIAL AGE NEARS END.

Force of Winds on Ice Fields Seems to be Diminishing Every Year.

European engineers have been contemplating themselves that although the coal mines may fail, they have in the Alps glaciers inexhaustible sources of energy. The melting of the glacier ice gives rise to mountain torrents which fall being utilized here and there, especially since the electric transmission of power has more nearly approached perfection.
