### HEADING LATE CABBAGES.

It sometimes happens, either through the lateness of the season, or neglect in early planting, that cabbages do not head completely before cold weather sets in. These are often fed out to cattle or thrown away, while by little care they might be made to head during the Fall and early winter. To accomplish this, proceed as follows:

First. Make a wide trench, and transplant the cabbages into it, setting them together in a triple row. At each end of the row, drive in a crotched stake, and lay a rail from one to the other, to form a ridge pole a pole a foot or more above the cabbages. Make a roof of cld boards or slabs, one end resting on the pole and the other on the ground, so as to shed water. Over this lay a little straw, six or more inches thick, and when Winter sets in, put on as many inches of earth making the surface smooth and hard so as to be nearly rainproof. At each end, of the row, leave a ventiltaing hole which must be loosely filled with straw in cold weather. Cabbages so managed will continue to grow, and will fill up their heads considerably before mid-winter. When taken out in the Spring they will be tender, crisp, and beautifully blanched.

### CRIBBING.

This disase originates from a sour stomach First caused by a habit of biting the crib whilst eating, and in so doing, the horse swallows wind, which causes the stomach to become sour. Over-eating, and drinking would aid in this disease. A horse with this disease is the same as a person, who after eating, belches up wind from the stomach, and will in time, become a dyspeptic.

CURE. Take one table-spoonful of pulverized charcoal, one teaspoonful of sal soda mix in a gill of corn meal, and give three times a week until a cure is effected, which will depend on the length of time the horse has been addicted to the habit. The horse should be fastened in the middle of the barn floor by a rope from the beam overhead, so that he cannot get hold of anything to bite, and feed him from a basket fastened on the head. It is

REMARKS .- One leading cause of the habit of cribbing, is in the irregularity of feeding, and in not satisfying the appetite of the anim al. If a horse is fed liberally and regularly, we doubt whether he will ever contract the unpleasant habit of cribbing. Is it not the neglect of this regularity and supply that occasions the sour stomach?-N. E. Farmer.

### FALL PLOUGHING.

The Rural Register says: Too little re gard is paid in this country to advantages that are to be derived from ploughing heavy lands in the fall of the year, and leaving them rough and exposed to the action of the frost throughout the winter. This winter following is of quest. great service in other respects; it tends to rid the land of weeds and of the seeds of noxious plants, which would otherwise germin ate, but which, to a very considerable extent, are destroyed by exposure to the frost. So highly is fall ploughing esteemed in Flanders that the farmers of that country make use of an instrument unknown among our agricultural implements, but which is especially adapted to elevating the soil and leaving it in ridges so that the largest possible surface may be exposed to the beneficial influence of winter frosts. The action of frost mellows even the stiffest clays, breaks down the clods, and leaves the land in the spring far more light and friable than it could possibly be made with any number of ploughings.

### FEEDING OATS TO HORSES.

The same quantity of oats given to a horse produces different effects according to the time they are administered. I have made the experiments on my own horses, and have always observed there is in the dung a quantity of oats not digested when I purposely gave them water after a feed of oats. There is, then, decidedly a great advantage in giving that!" horses water before corn. There is another bad habit, that of giving corn and hay on their return to the stable after hard work. Being very hungry, they devour it eagerly, and do eh?" not masticate; the consequence is, it is not so well digested and not nearly so nutritious .--When a horse returns from work, perspiring and out of breath, he should be allowed to rest for a time, then given a little hay, half an hour afterward water, and then oats. By this plan water may be given without risk of nal'd Agricutture.

### KEEPING FRUIT.

We all know the difference in flavor of a perfectly sound and plump fruit, and that which is withered and the flavor gone. To keep well for a long time, it should be kept as much as possible from the air, and various methods have been restored to, by packing in bran, chaff, meal, &c , with different results. Immersion in water has succeeded in some cases with much satisfaction; also burying in the earth in packages. For packing material when left above ground, nothing can excel common land plaster as ground to apply to the land. When carefully packed, and the fruit sound, it will last a long time.

### BLACK KNOT ON PLUM AND CHERY TREES.

We have repeatedly examined the fresh exdiscovering the least indication of any insect. band his hat without muttering, If the curculio were present in ninety-nine cases out a hundred, yet if I were shown conclusively that it is absent in the hundredth; pleasure from another's pain. it is hard to conceive how it should cause the excrescence in this hundredth case .- Country Gentleman.

### Mise and Otherwise.

### DRAWING LOTS.

A friend of ours was traveling a day or two since in the vicinity of Buxton. While crossing the bridge he was stopped by some young men, one of whom addressed him as follows: "Say, Mister, got any whiskey with yer,

"No, sir," politely responded our young

"Don't yer never drink whiskey?"

" No, sir." "We-a-l, that is too bad. I should like mighty well to get some good whiskey, but can't get none here. Tell ye what 'tis, stranger, it's dangerous stuff they have hereabouts.

We are bound to drink it anyhow; but we draw lots to see which shall drink first. The one that draws it goes and drinks and sits down. We all wait an hour, and if he ain't dead then we all drink, if he is we try anoth-

### A CASE OF CATECHIZING.

A reverend master was lately endeavoring to enforce upon his countraband the truth of the miracles of the Bible. The poor darkey submitted with a proper humility to the recitals and explanations of his teacher, making but one answer to all, "massa b'leve 'em, I b'leve 'em," though he hesitated a little at the story of Jonah. But when the wonderous escape of Shadrach, Meshach, and Abednego was recounted, it was too much for his weak understanding.

"What! no burn he toe?"

" No."

" Not singe he wool?"

er place.—Bangor Press.

" No."

"Den," says Cuffee, "I no b'leve him-nor de fish story neider."

### SAMBO'S OCCIPUT.

It is related of a Southern slaveholder that he was wont to boast of the head endurance of a favorite house-servant. Upon the occasion of a dinner party, he bragged that Sam could not be knocked down by any blow, however severe, upon his head. An athletic man of said by those who have tried it, to be a sure the party laughed at such an idea, and as Sam was about entering the room with the candles, he stood behind the door and struck him a powerful blow on the head. The candles flickered a little, but Sam passed quietly on, merely saying-" Gemmen, be careful ob de elbows, or de lights will be distinguished."

> A Mrs. Dobb made her appearance before the drafting commissioner of Polk co., Iowa, recently, with two small infants in her arms, and followed by fourteen other children of various ages and sizes. She said she had come to plead for her husband's exemption from draft, on account of physical disability. The commissioner bashfully suggested that her large family was not very good evidence of disability, and declined to grant her re-

A Geography seems to be wanted badly down South, as well as several other things. A letter from a Sergeant in the 29th Massachusetts Regiment, nated "Near Norfolk, Va., Camp Misery, fifteen miles from the knowledge of God,' May 13th, 1862," says that Captain Tripps company was as well as could be expected, considering their

REVENGE .- A man applied to the Drafting Commissioner to have the name of another A man placed on the roll of the militia subject to draft. He said that the fellow had got his girl away from him and married her, and he "meant to get even," if it cost him fifty dollars. If he could get his rival drafted and shot, he would be contented and happy.

IT LOOKS SO .- The redoubtable X., in payment for a cigar, pulled out a little swab of gummy, greasy, filthy postage stamps.

"Can't you give me hard money?" asked the cigar lady.

"Well, Madam," responded X., "I have seen very little harder looking money than

sure and perfectly safe in its operation. This has been prepared to meet that demand, and an exten sive trial of its virtues has conclusively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient hitherto that almost every purgative medich. It is not. Many of them produce so much griping pain and revulsion in the system as to more than counterbalance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowels. Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the complaints which have been speedily cured by them, we may mention Liver Complaint, in its various former of Jaundice, Indigestion, Languor and Loss of Appetite, Listlessness, Irritability, Billous Headache, Bilious Fever, Fever and Ague, Pain in the Side and Loins; for, in truth, all these are but the consequence of diseased action in the liver. As an aperient they afford prompt and sure relief in Costiveness, Piles, Colic, Dysentery, Humors, Scrotula and Scurry, Colds with soreness of the body, Ulcers and impurity of the blood, Irregularities; in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rheumatism, Gout, Dropsy, Gravel. Erysipelas, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spring of the year, to purify the blood, and prepare the system for the change of seasons. An occasional dose stimulates the stomach and bowe Hence an occasional dose is advantageous, even though no serious derangement exists; but unnecessary dosing should never be carried too far, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their virtues are once known, the public will no longer doubt what remedy to employ when in need of a cathartic medicine. Being sugar-wrapped, they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions, see wrapper on the Br.
