farmer's Columu. DIRECTIONS FOR MAKING YEAST AND GOOD BREAD.

All housekeepers who desire to make good bread have only to follow the receipe given below to secure the happy resuls. I have tested the matter, and know that there is no humbug; and all the extra trouble about it is more than balauced by the superior quality of the article produced. Firstly:

To Make Yeast .- Take two handfuls of hope, 3 pints of water, 6 potatoes, and boil them all until the potatoes are soft; then pare them, mash through a culender, and strain the liquid. Put it in your preserving kettle over the fire, and add one cup of sugar, one tablespoonful of salt, and one of ginger; add flour enough to make it of the consistency of paste, and then let it boil five minutes, stirring it all the time. Turn out, and when partially cool add half a pint of good yeast. Let this stand till fermentation takes place, and the job is done. In the winter I keep it in a stone jar in the cellar, but in the summer I dry it by mixing it with corn meal, and spreading it on the table exposed to the air (not sun). Secondly:

To Make Bread. - Wash and pair 24 good potatoes; boil them with a large handful of salt till reduced to a fine pulp; strain through a cullender, add 3 pints of sweet milk, and when cool enough to bear your hand in it, stir in flour enough to make a thick batter; to this sponge add a coffee cup of the yeast, making the sponge at night. In the morn ing I add 6 quarts of new or sweet milk, and 3 gills of lime water, and kneed it into a stiff dough. In two or three hours after kneading, it will be as light and porous as honey comb; knead it down and after it has risen, mould it and put it into pans. Let it stand till it rises again; then wash the loaves over with cold water-this prevents the formation of too hard a crust-and bake in a well heated oven. When baked, wash again, wrapping it closely in your bread cloth. Give this a fair trial, and I will warrant satiefaction .- H. W. H, in County Gentleman.

HINTS TO FARMERS.

BE SYSTEMATIC .- Here we have one of the first principles of successful agriculture. Let all your transactions be conducted in a busi ness manner. Take note of every operation, whether you buy or sell, receive or disburse, sow or reap, make a promise or a bargain .-To do this it will be necessary to keep a diary, and we would say, do so, if for no other object than a ready means of comparison.

BE THOROUGH .- Never half do anything yourself, nor permit your men to glide over their labors. "If it is worth doing at all it is worth doing well," would prove a golden maxim to thousands of farmers if they would not only adopt it as a portion of their creed, but exemplify its teachings in their daily life. Away with these scratchers-men that go beneath the surface are the kind wanted.

LEATE YOUR LAND IN GOOD HEART .- It should be the object of every tiller of the soil to leave his land in good condition after the removal of a crop, and at the same time, obtain as renumerating returns as possible .-This can be done only by husbanding all the sources of fertility upon the farm and adding thereto in every available manner. This is Alpha and Omega of progressive agriculture. Never boast of a "bank account" if it is obtained at the expense of youe farm.

energy that wields the spade or holds the plow that insures success. The culture of the mind must go hand in hand with the culture of the soil. The relations of science -o the farmer's calling are intimate. Good books are aids in the attainment of knowlndge, but never pin your faith on the ipse dixit of any individual-think, experiment and judge jor yourself.

STICK TO THE FARM .- Amid your plans for ibea of bettering your condition by entering the arena of commercial life. Do not exchange a home of quiet, real enjoyment for Barter not sweet repose for visions of empty willets, nor let notes due on the morrow assume the prerogatives of the night mare .are these little realities in the commercial world. Stick to the farm. What though hard labor be the every day command, it is noble, healthful, and conducive to the full development of whole man .- Ohio Valley Far-

An English farmer recently remark. ed that " he fed his land before it was hungry, rested it before it was weary, and weeded it before it was foul."- We have seldom, if ever, seen so much agricultural wisdom condensed into a single sentence.

CULE FOR SICK HEADACHE .- Java coffee. made very strong, taken clear, and in very small quantities every few minutes, is believed an infallible remedy for that distressing complaint-sick headache. It should be taken, however before the stomach has become much rolled, otherwise it would be ejected and cf course unavailing.

A Swiss Sour .- Boil three pounds o 'potatoes, mash them well, and add slowly some good broth, sufficient for the tureen. Let these boil together, then add some spinach, a little parsley, lemon, thyme, and sage, all chopped very fine. Boil together five minutes; pepper and salt to taste. Just before taking it off the fire to serve, add two well beaten eggs.

fled bees wax in three cents' worth of pure tempt. sweet oil, by heating over a moderate fire. Apply at night before retiring. If desirable, It can be scented

Mise and Otherwise.

HIGHLY HONOKED .- The Rev. Mr. Rogers, of New York city' tells a good story of a prous sister connected with his church in New Jersey, where he was stationed two years ago. This good sister had a good way of expressing herself in church, when anything suited her, by shouting at the top of her voice' " Glory to God ?" " Haltelujah !" etc., etc. Once she attended a Presbyterian church, and the Deacon gave her a seat near the pulpit. The minister commenced and grew more eloquent as he proceeded. At last good," and she shouted, "Glory to God !" to the great astouishment of the congregation, as well as the minister. The deacon approached her and told her that such actions were not allowed there. But she took no notice of him or what he said, but was all attention to what the "man of God!" was proclaiming and as he proceeded he waxed warmer, and the sister gave another shout at the top of her voice: "Glory, glory to Gol!" which disconcerted the minister, and he looked after the deacon, who came and told the sister that if she did not stop he would rem ve her from the house. He took his seat beside her, and the divine continued for a short time. when another "Glory to God!" Halleln!ah!" from the pious sister, started all in their seats. The worthy deacon took hold of her to put her out, but she straightened herself out and would not budge; so he called the other dea con to his assistance, and they made a chair of their arms, and set the sister thereon, and started for the door. When about half way up the middle of the aisle, she threw up her up the middle of the aisle, she threw up her Junction 2:32

arms and shouted, Glory to God!—I am Arrive at New York 5:30 more honored than my Master. He was carried by one ass, while I have two." It is needless to say that the worthy deacons dropped their load, and likewise dropped into their seats.

A GOOD EXAMPLE.

A pastor was making a call on a parishioner, an old lady, who had made an habitual rule never to speak ill of another, and had observed it so closely that she always justified those whom she heard evil spoken of .--Before the lady made her appearance in the parlor several of her children were speaking of her peculiarity, and one of them playfully

" Mother has such a habit of speaking well of everybody, ahat I believe if Satan hunseli were the subject of conversation, mother would find out some virtue or good quainy

Of course this remark elicited some smiling and merriment at the originality of the idea, in the midst of which the old lady en. & B tered the room, and on being told what had bus at Scranton. just been said, immediately and involuntarly replied --

"Well, my dear children, I wish we all had Satan's industry and perseverance.

PUZZLED FOR AN EXEUSE.

Some years since, while the cholera was prevalent in Virginia, the inhabitants, especially the negrees, were greatly alarmed .-Among others was a negro boy, who, having heard his father say the cholera would soon be along that way, left his work one day and betook himself to the woods. Here he was found by his overseer, soon after, fast asleep. Being taken to task for leaving his work, he STUAY YOTR PROFESSION .- It is not alone the excused himself on the ground that " not be- New York and Eric. ing prepared to die, he had gone to the woods to meditate."

"But," said the overseer, "how was it that you went to sleep ?"

"Well, I don't know, massa, how dat was 'zactly," responded the negro; "but I speck I must have overprayed myself!"

An unlneky cur, who was in the the habit of going on board a vessel lying at the future, never, for one moment, harbor the one end of the East River docks, annoyed the mate, by tracking up the deck with mud from the wharf. One day an old tar caught the dog and cut off h s tail. He ran off ki-yi-ing the turmoil and illusion of a city residence. in most unearthly shrill tones. What's the matter?" asked the mate, sticking his head out of the forecastle scuttle. I'ts that blasted dog again," said jack, " but he won't troub-Very poor comforters for care and anxiety le us any more, for I've unshipped his rudder, and d-n my eyes if he'll ever find his way back here with nothing to steer with !"

The Cherry Perpronounced by scientific men to be a medicine before its effects were known. inent Physicians have declared the sar my Pills, and even more confidently, a ing to certify that their anticipations

than realized by their effects upon trial.

They operate by their powerful influe internal viscera to purify the blood and sinto healthy action—remove the obstrate the stomach, bowels, liver, and other or body, restoring their irregular action to hyperregular wherever they expect the second since the stomach. by correcting, wherever they exist, such dem ments as are the first origin of disease. Being sugar-wrapped, they are pleasant to and being purely vegetable, no harm can are their use in any quantity.

For minute directions, see wrapper on the M
