tity of that gas, did the execrements not dry chiefly upon grain, insects and worms, while of no use whatever.

gel. Davy found in 100 parts by weight, 23 parts of substances, soluble in water, consisting of urae, urate of ammonia, common salt, per cent. of bodies soluble in water, consisting of very little urea, but of a large proportion of carbonate, sulphate, and humate of ammonia, common salt, and sulphate of potash. The other 84 parts insoluble in water consisted of coarse silicous sand, silica, phosphate of lime and magnesia, traces of alumina, and oxides of manganese and iron. The abundance of soluble substances explains the quick effect of pigeon-dung, and also shows us once more the great value of mineral manure.

readily allow geese to have access to pastures not to mention that, when the herbage is rendered foul by the execrements of these poultry, it becomes loathsome to other animonia which is so soon generated and devel-oped on decomposition. When rain happens to fall, these caustic substances are diluted, and grass grows the best in the place where

We have for several years known an elderchinery is a plague on the farm. So, at early broad acres, until he has acquired a bend in year the pressure was too strong for him .--He heard the clack of machinery all about

erms, a client of the counsel's making his appearance at the bar with his jaw terribly swollen, th udge remarked :

in a roar of laughter at the counsellor.

"My lord, I think he would make a better judge,

rebel officers who tarried there during Bragg's invavery kine; but if it was all the same to him I'd ra-
