**HINTS ON BUTTER MAKING.**

*Depth of Milk.*—Col. Pratt, of Prattsville, Greene County, formerly the celebrated tanner, now equally successful with the dairy, finds that the largest quantity of cream rises, and consequently the greatest quantity of butter is made, when the milk is one and a quarter inches in depth in hot weather—and an inch and a half in cool weather—seven or eight quart pans thus containing but two and a half quarts for the first named depth, and three quarts for the latter. The temperature is kept as nearly as possible, to 62 degrees, although in warm weather it may run up to 65 degrees, and in extreme cases to 70 degrees.

**New Way of Making Butter.**—J. Zoller, of Oswegatchie, N. Y., saves the labor of setting his milk in pans, skimming and taking care of the cream, by simply straining the milk of one day into six shurns, and churning next morning by horse power, the milk being then sour but not lapped. He thinks he also makes more butter in this way from the same quantity of milk. The milk being sour, produces butter more readily than if fresh. An experiment, carefully made, with cream from pans, and by the above method, resulted in giving ten percent more butter from the churned milk.

**Butter Washing.**—A correspondent of the *Boston Cultivator* says he has not had rancid butter in the spring for thirty years. He washes it. Not with water, which he, with most good butter-makers, regards as injurious, but with sweet skim milk, salting it afterwards. Have any of our readers ever tried this way, and with what results? There are some good butter-makers that wash their butter with water, and make a better article than some bad manufacturers who do not wash it. But equal skill, cleanliness, and careful management, would doubtless with these good manufacturers make better butter without washing.

**To Keep Butter Sweet.**—In May or June when butter is plenty, work it thoroughly two or three times, and add at the last working nearly one grain of saltpetre, and a teaspoonful of pulverized loaf sugar to each pound of butter. Pack it tightly in stone jars to within two inches of the top, and fill the remaining space with strong brine. Cover the jars tightly, and bury them in the cellar bottom, where the butter will keep unhurt for a long time.

**CLEANING MILK VESSELS.**

A correspondent of the *Cincinnati Gazette* says truly that there is no product of the farm that presents so much degeneration as butter. This arises chiefly from using vessels for holding the milk and utensils in making the butter which are soured. In my notice of the effects of having soured troughs in sugar making, I stated that acidity was fatal to good sugar making. It is not less so in butter making. Milk has a peculiar acid very easily formed, which entirely takes away that rich, sweet, fine flavor belonging to good butter. A very little soured milk or cream on vessels rapidly generates enough acid to take it away. To avoid this, great care is requisite. Cleanliness only is not sufficient, in having the vessels well washed, but they must be carefully washed in boiling hot water, and should be boiled in it also. But as cream is very apt to stick, even in good washing, when the vessels are boiled in water, *some pearl ash or soda should be put in it*, which destroys any acidity that may be about the vessels. They should then be sunned. I have known some good butter-makers who dispensed with the sunning when soda was used, but both are to be recommended.

**HOLLOW HORN IN CATTLE.**

This is not infrequently hollow stomach, and very often follows stunted fare, hard usage, and exposure to cold. We have noticed this as most prevalent among oxen that have done a severe winter's work.

**Symptoms.**—Bloody urine; swollen udder; shaking the head; eyes and head swollen; standing with the head against a fence or barn; eyes dull and sunken and horns cold.

**Remedies.**—Bleed and physic, shelter and feed properly.

Take half a pint of good vinegar, two table-spoonfuls of salt, one teaspoonful of pepper, and mix and pour into each, holding the head on one side for two minutes.

Bore with a large gimlet on the under side of the horn, three or four inches from the head; and if hollow, bore nearer the head and let out all the matter and syringe two or three times a day with salt and water, or soap suds, or salt and vinegar.

Spirits of turpentine rubbed in around the base of the horns will arrest the disease in its incipient stages.

Pour a spoonful of boiling hot brimstone into the cavity between the horns.

Pour a teacupful of boiling water on the horns holding so as to prevent injury to the other parts.

Scot and pepper, given internally are good.

**SAVE YOUR POULTRY DUNG.**—Ay! but who does it? There are many who do; but many, many more who do not. It is worth three what your stable manure is. Keep always a little earth mixed with it. This earth wants to be moist, so as to take up the ammonia, which is very strong, uniting with the humid acid of the ground. For any choice garden plot, this is the manure you want.—*Valley Farmer.*

**BLISTERED HANDS AND FEET.**—As a remedy against blistering of hands or feet, the quickest is lighting a tallow candle and putting the tallow drop in cold water, (to put out the candle,) and then rubbing the tallow on the hands and feet, mixed with brandy or other strong spirits. For mere tenderness, nothing is better than the above, or vinegar may be diluted with water.

**Wise and Otherwise.**

**A MAN WITH TOO MUCH WIFE.**

Chapman, a witty lawyer of Hartford, was busy with a case, at which a lady was present, with whom he had already had something to do as a witness.

Her husband was present—a diminutive, meek, forbearing sort of a man—who in the language of Mr. Chapman, looked like a rooster just fished out of a swill barrel; while the lady was a large portly woman, evidently the "better horse." As on the former occasion, she "balked" on the cross-examination, the lawyer was pressing the question with his usual urgency, when she said, with vindictive fire flashing from her eyes: "Mr. Chapman, you needn't think you can catch me; you tried that once before?"

Putting on his most quizzical expression, Mr. Chapman replied: "Madam, I haven't the slightest desire to catch you; and your husband looks to me as if he was sorry he had?"

The husband faintly assented.

**EXPEDITIOUS but RATHER TRYING.**

A Hibernian, fresh from the green isle, having sufficient means to provide himself with a horse and cart, (the latter a kind probably he never saw before,) went to work on a public road. Being directed by the overseer to move a lot of stones near by, and deposit them in a gully on the other side of the road, he forthwith loaded his cart, drove up to the place, and had nearly finished throwing off his load by hand, when the "boss," told him that was not the way—he must tilt or dump his load at once. Paddy replied that he would know better the next time. After loading again, he drove to the chasm, put his shoulder to the wheel, and upset the cart, horse, and all into the gully. Scratching his head, and looking rather doubtful at his horse below him, he observed: "Bedad, it's a mighty expeditious way, but it must be tried 'til the bast!"

"If I keep on dyeing my whiskers, they'll draft me for under forty five," said a perplexed citizen; "and if I leave off dyeing em, Polly won't have me. Anyhow, I calculate I'm in a tarnation fix, for I hate fighting, and can't give up Polly." That's a predicament sufficient to make anybody dye.

Jones, the other day, asked Smith the following question: Says Jones, "We have had the age of iron out which shall we call the present age?" "Why," says Smith, "licking the back of a postage stamp which was about to apply to the envelope of a letter, I think we had better call this the metallic age."

A wag was lately asked to contribute to foreign missions. "Not on any account," said he. "Why not?" asked the collector, "the object is laudable." "No, it is isn't," was the reply, "not half so many peop'le go to the devil now as ought to."

A young fellow who came up to London to see the rejoicings at the royal wedding, entered an eating house in the Strand and upon the bill of fare being handed him by the waiter, remarked, "that he didn't care 'bout reading now—he'd wait till after dinner."

"Bob, did you ever see Miss Simpson?" "No," replied Bob. "How do you know she is handsome then?" "Because the women are always running her down," replied the scamp.

**PROSPECTUS OF "The Age,"**

**A NATIONAL DEMOCRATIC NEWSPAPER**

TO BE PUBLISHED DAILY AND WEEKLY

IN THE CITY OF PHILADELPHIA.

BY A. J. GLOSSBRENNER & CO.

A. J. GLOSSBRENNER, FRANCIS J. GRUND, WILLIAM H. WELSH

"The Age" will advocate the principles and policy of the Democratic party, and will, therefore, necessarily favor the restoration of the Union as it was at the time of the Constitution of the United States, and the maintenance of the Union.

It will fearlessly criticize the public men, parties and servants, and defend the laws and constitution of individual citizens and of sovereign states, against assaults from any quarter.

It will seek to awaken the minds of the people to a proper sense of the true condition of the Republic—to present to them, truthfully, the fearful condition in which we stand as a nation—to exhibit the magnitude of the task that is before them, if they would check our downward progress—and to inspire them with the determination to apply new remedies for our national life.

In brief, it will, in all things, aim to be the faithful exponent of Democratic principles, and to render itself worthy to be an organ of the Democratic party, and to see that our country prospers "so long and so well." The restoration of the party of the Constitution and the Union—to power, in the legislative and executive government, in the branches of the States and of the Union, we believe to be the only way to prevent the utter ruin of the Republic. To contribute to that restoration will be our highest aim.

The News, Literary, Commercial, and other departments will receive due attention, and will be so conducted as to make "The Age" worthy of the support of the general reader.

The many facilities now surrounding an enterprise of the magnitude of that in which the undersigned are engaged, require them to appeal to the public for pecuniary support, and to ask for "The Age" a liberal patronage and extended circulation.

The present state of the preparatory arrangements warrants the expectation, that the first number of the paper will appear before the close of the coming month (February, 1863.) The Weekly will be issued soon thereafter.

**SARSAPARILLA**

THE WORLD'S GREAT REMEDY

**SCROFULA AND SCROFULOUS DISEASES,**

From Emery Edes, a well-known merchant of

"I have sold large quantities of your SARSAPARILLA, but never yet one bottle which failed to cure. As fast as our people try it, they agree that it has been no medicine like it before in our community."—*Emery Edes.*

Eruptions, Pimples, Blisters, Pustules, Ulcers, Sores, and all Diseases of the Skin.

From Rev. Robt. Stratton, Bristol, England.

"I only do my duty to you and the public, when I add my testimony to that you publish of the medicinal virtues of your SARSAPARILLA. My daughter, aged ten, had an afflicting humor in her eyes, and hair for years, which we were unable to cure until we tried your SARSAPARILLA. She has been well for some months."

From Mrs. Jane E. Rice, a well-known and well-esteemed lady of Dennistown, Cape May (N. J.).

"My daughter suffered for a year past with a scrofulous eruption of the skin, which was cured by your SARSAPARILLA, which soon completely cured her."

From Charles M. Moore, Esq., Attorney-at-Law, of New York, Murray & Co., Manufacturers of Emery Edes' celebrated papers in New York, N. Y.

"For twelve years I had the yellow Erysipelas on my right arm, during which time I tried all the celebrated ointments, salves, and oiled liniments of dollars' worth of medicines. The doctor told me that the cornea became visible, and the doctor advised that I should be blind, if I did not make your SARSAPARILLA. I began to use your PILLS. Together they have cured me. I am now as well and sound as anybody. Being in a public place, my name is known to every body in this community, and excites the wonder of all."

From Hon. Henry Monroe, M. P. P. of Newcastle, W. Va., a leading member of the Canadian Parliament.

"I had your SARSAPARILLA a more effectual remedy for general debility, and for purifying the blood, with very beneficial results, and feel confident in recommending it to all who are afflicted with any of the diseases which you mention."

St. Anthony's Fire, Rose, Salt Rheum, Scald Head, Sore Eyes.

From Harvey Secker, Esq., the able editor of the *Tunkhannock Democrat*, Tunkhannock.

"One of my children, about three years of age, was attacked by pimples on his forehead. They rapidly spread until they formed a loadstone and without relief he became almost blind. I gave him your SARSAPARILLA, and in a few days he was cured. I have since given your SARSAPARILLA to several other children, and with the same success. The child's eyes were cured, and he is now as well as anybody. Being in a public place, my name is known to every body in this community, and excites the wonder of all."

Syphilis and Mercurial Diseases.

From Dr. Hiram Root, of St. Louis, Missouri.

"I had your SARSAPARILLA a more effectual remedy for the secondary symptoms of Syphilis, and for syphilis disease than any other we possess. The profession are indebted to you for some of the best medicines we have."

From A. J. French, M. D., an eminent physician of Lawrence, Mass., who is a prominent member of the Massachusetts Medical Society.

"DR. AYER'S PILLS have cured me of Syphilis, and the resulting secondary symptoms of this disease in some cases that were too obstinate to yield to other remedies. I do not know what we can acquire with more certainty of success, when a powerful alternative is required."

Mr. Chas. S. Van Linn, of New Brunswick, N. J., had indurated glands on his legs, caused by the abuse of mercury, or mercurial disease, which had become more aggravated for years, in spite of every remedy or treatment that could be applied, until the physician used of A. J. French's SARSAPARILLA relieved him. Few cases can be found more inveterate and distressing than this, and it took several dozen bottles to cure him.

Leucorrhoea, Whites, Female Weakness, are generally produced by internal Scrofulous Ulceration, and are very often cured by the alternate effect of this SARSAPARILLA. Some cases require, however, in addition, the use of the SARSAPARILLA, the skilful application of local remedies.

From the well-known and widely-celebrated Dr. Jacob Morrell, of Cincinnati.

"I have found your SARSAPARILLA an excellent alternative in diseases of females. Many cases of irregularity, Leucorrhoea, Internal Ulceration, and local discharges of the female system, have yielded to it, and there are few that do not, when its effect is properly aided by local treatment."

A lady, unwilling to allow the publication of her name, writes as follows:

"My daughter and myself have been cured of very debilitating Leucorrhoea of long standing, by the use of your SARSAPARILLA, the skilful application of local remedies."

**AYER'S CATHARTIC PILLS**

possess so many advantages over the other purgatives in the market, that their superior qualities are so universally known, that we need not do more than to assure the public their quality maintained equal to the best it ever has done, and that they may be depended on to do all that they have ever done.

Prepared by J. C. AYER, M. D., & Co., Lowell, Mass., and sold by

H. Stock, Tunkhannock; T. D. Spring, Laceyville; Harding & Co., Nicholson; E. J. Frear, Factoryville, and by dealers in Medicines everywhere.

**CELEBRATED STIMULATING NGUENT,**

**FOR WHISKERS AND HAIR.**

THE STIMULATING NGUENT AND INVIGORATOR will restore hair to the bald head, give new life and restore to original color gray hair, and will cause hair to grow thick. It is warranted to bring out a thick set of
