Manufacture of Woolen Goods:

CHAPTER I.

The Manufacture of Woolen Goods, both in the household and in the factories, has become of great importance on account of its forming at present our principal articles of clothing. The nature of our climate make it neccessary, and the scarcity of Cotton has greatly increased the value of wool and Fabricks made from it: and being engaged in the business of making Cloth and Flannel, and also Roll Carding, and Cloth Dressing, we have thought a few remarks with regard to handling Wool, and the proper process of Manufacture, might be of service to the country, and a benefit to ourselves.

The first process with the farmer who intends to make his wool into rolls for spinning and weaving at home, after washing and shearing, is assorting the qualities. This we do not expect a farmer to do as perfectly as a regular manufacturer, but by trying he will approximate towards it, and be amply paid for the little pains required, by having an even thread and smoother fabric. The fleece should be whole and be spread out on a table—the coarsest wool will be found on the skirts of the fleece, and can easily be distinguished by looking closely to the fibre. Two qualities from each fleece will perhaps be close enough for ordinary purposes, but as the sheep in our country differ much in their grades of wool—the coarse part of one may do to go with the finer part of another, and thus make three or four qualities out of the lot. If it is going to the manufactory or to market, the fleece should not be torn, but after removing the tag-locks, should be rolled up compactly, skin out side. Not less than one pound of hard, fresh butter or lard should be sent with every ten pounds of wool going to the carding machine.

The next thing of importance is of course to be well carded, for which we will be entirely responsible, but in the matter of spinning and weaving, we have another caution to add. Unless the yarn is evenly twisted, and beat up evenly in the loom, the cloth shrinks unevenly in fulling—making some places wide and others narrow, and if the finisher succeeds in pressing out the wrinkles, the cloth will resume its contortion again when made into a garment, and the mechanic is sometimes wrongfully blamed for a coat's becoming *lantern jawed* on a man's back. It is easily avoided by giving the wheel an equal number of turns to a given length of thread drawn out. We find this difficulty increasing of late years, and have come to the conclusion that if some of the spinners do not keep better time on their pieces than on their spinning wheels, we should have dreadfully to listen to their music.

As every moment of labor should be employed to the best advantage, and every ounce of material be appropriated to the best purpose, on account of our war, we propose to write some other chapters on our branch of business after this is read sufficiently to be remembered, and shall endeavor to do our work nice enough for a bobinet shirt or a doctor's coat, and make trowsers stout enough to last a farmer through a year's campaign, at least.

U. S. 10-40 Bonds.

These Bonds are issued under the Act of Congress of March 3th, 1864, which provides that all Bonds issued under this Act shall be EXEMPT FROM TAXATION by or under any state or municipal authority. Subscriptions to these Bonds are received in United States notes or notes of National Banks. They are TO BE REDEEMED IN COIN, at the pleasure of the Government, at any period *not less than ten nor more than forty years* from their date and until their redemption FIVE PER CENT INTEREST WILL BE PAID IN COIN, on Bonds of not over one hundred dollars annually and on all other Bonds semi-annually. The interest is payable on the first days of March and September in each year.

Subscribers will receive either Registered or Coupon Bonds, as they may prefer. Registered Bonds are recorded on the books of the U. S. Treasurer, and can be transferred only on the owner's order,—Coupon Bonds are payable to bearer, and are more convenient for commercial uses.

Subscribers to this loan will have the option of having their Bonds draw interest from March 1st, by paying the accrued interest in coin—(or in United States or the notes of National Banks, adding fifty per cent, from premium.) or receive them drawing interest from the date of subscription and deposet—as theses Bond are

Exempt from Municipal or State Taxation,

their value is increased from one to three per cent per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay

Over Eight per Cent Interest

in currency, and are of equal convenience as a permanent or temporary investment.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U.S Bonds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or separate communities only is pledged for payment, while for the debt of the United States the whole property of the country, is holden to secure the payment of both principal and interest in coin.

These Bonds may be subscribed for in sums from $50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

It may be useful to state in this connection that the total Funded Debt of the United States on which interest is payable in gold, on the 31 day of March 1 64, was $768, 965, 000. The interest on this debt for the coming fiscal year will be $45,927, 126, while the customs revenue in gold for the current fiscal year, ending June 30th, 1854, has been so far at the rate of over $100,000,000 per annum.

It will be seen that even the present gold revenue of the Government are largely in excess of the wants of the Treasury for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of importations, to $150,000,000 per annum.

Instructions to the National Banks acting as loan agents were not issued from the United State Treasury until March 26, but in the first three weeks of April the subscriptions averaged more than TEN MILLIONS A WEEK.

Subscriptions will be received by the

There are many preparations sold under the name of Bitters, put up in quart Bottles, compounded of the cheapest whiskey or comn on rum, costing from 20 to 40 cents per gallon, the taste disguised by Anise or Coriander Seed.

This class of Bitters has caused and will continue to cause, as long as they can be sold, hundreds to die the death of the drunkard. By their use the system is kept continually under the influence of Alcoholic Stimulants of the worst kind, the desire for Liquor is created and kept up, and the result is all the horrors attendant upon a drunkard's end death.

For those who desire and will have a Liquor Bitters, we publish the following receipt. A REMEDY

That will restore them to their usual health. Such has been the case, in thousands of instances, and a fair trial is but required to prove the assertion.

From Rev. J. Newton Brown, D. D., Editor of the Encyclopedia of Religious Knowledge.

Although not disposed to favor or recommend Patent Medicines in general, through distrust of their ingredients and effects, I yet know of no sufficient reasons why a man may not testify to the benefits he believes himself to have received from any simple preparation, in the hope that he may thus contribute to the benefit of others.

I do this the more readily in regard to Hoofland's German Bitters, prepared by Dr. C M Jackson, of this city, because I was prejudiced against them for many years, under the impression that they were chiefly an alcoholic mixture. I am indebted to my friend Robert Shoemaker, Esq., for the removal of this prejudice by proper tests, and for encouragement to try them, when suffering from great and long-continued debility. The use of three bottles of these Bitters, at the beginning of the present year, was followed by evident relief, and restoration to a degree of bodily and mental vigor which I had not felt for six months before, and had almost despaired of regaining. I therefore thank God and my friend for directing me to the use of them.

PHILAD'A, June 23, 1861. J. NEWTON BROWN.
