Masufacture of Woolen Goods ! CHAPTER 1.

The Manufacture of Woolen Goods, both in the household and in the factories, has become of great household and in the factories, has become of great is portance on accountofits forming at present our principal articles of clothing. The nature of our cli-mate make it necessary, and the scarcity of Cotton has greatly increased the value of wool and Fabricks made from it and being engaged in the business of making Cloth and Flannel, and also oll Carting, and Cloth Dressing, we have thought a few remarks with regard to han dling Wool, and the proper pro-cess of Manufacture might be of service to the coun-try, and a benefit to ourselves. The first process with the farmer who intends to

The first process with the farmer who intends to make his wool into rolls for spinning and weaving at home, after washing and shearing, is assorting the qualities. This we to not expect a farmer to do as

erfectiv as a regular manufacturer, but by try ng he will approximize towards it, and he amply paid tor the little pains required, by having an even thread and smoother fabric. The fleece should be whole and be spread out on a table-th's corvest wood will be fourd on the skirts of the fleece, and wool whi be tourd on the skirts of the fleece, and fore an easily be distinguished by looking closely to the fore. Two qualities from each fleece will perhaps be close enough for ordinary purpose, but as the sheep in our country differ much in their grades of wool-the coarse pair of ane may do to go with the four part of another, and thus make three or four qualities out of the lot. If it is going to the manu-factory or to market, the fleece should not be torn. qualities out of the lot If it is going to the mana-factory or to market, the flecce should not be torn, but after removing the tag-locks, should be rolled up compactly, skin out side Not less than one pound i Sile to commence at one o'clock P. M. of latd, tresh batter or oil should be sent with every i EATON,

ten pounds of wool going to the carding machine. The next thing of importance is of cour e to be well carded, for which we will be entirely responsible, but in the matter of spinning and reaving, we have another caution to add. Unless the yarn is evenly twisted, and heat up evenly in the boom, the cloth shrinks mayerally in fulling - making some pla-ers wide and others marger as hit to be shake as cas wide and others narrow, and if the ficisher succeeds in pressing out the wrineles, the cloth will re-sume its contortion again when made into a garused, and the mechanic is sometimes wrongfully blamed for a coat s becoming lantern jaired on a blanced for a cost s becoming *lattern jawed* on a man's back. It is easily avoided 'by giving the wheel in squal number of turns te a given length of thread drawn out. We find this difficulty increasing of late years, and have come to the conclusion that if some of the spinners do not keep better time on their planos there on their spinning wheels, we should have dreadfully to listen to their music.

JAMES L. MULLISON Treasurer. Trezeurers Office, Tunk. March 31, 1894

Coupon Bonds are payable to bearer, and are more another. convenient for commercial uses. Subscribers to this loan will have the option of having their Bonds draw interest from March 1st, by payin ; the accrued interest in coin - (or in United States or the notes of National Banks, adding fifty manufacture in the world. per cent, from premium.) or receive them drawing .

interest from the di to of subscription and deposet -as theses Bond are Exempt from Municipal or State Taxation, their value is increased from one to three per cent

per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay Over Eight per Cent Interest

in currency, fand are of equal convenience as a permanent for temporary investment. It is believed that no securities offer so great inducements to lenders as the various descriptions of U.S Bouds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or separate communities only is pledge. for pryment, while for the debt of the United States the whe's property of the country, is holden to secure the parment of both principal and interest in

coin. These Bonds may be subscribed for in sums from \$50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lendor and the largest capitalist They can be converted into money at any moment, and the holder will have the bone . t of the interest.

It may be useful to state in this connection that the total Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1864, was \$768, 965, 000. The interest on this debt for the coming fiscal year will be \$15,927, 126, while the customs revenue in gold for the current fiscal year, ending June 30th, 1854, has been so far at the rate of over \$100,000,000 per annum.

It will be seen that even the present gold revenue of the Government are largely in excess of the wants of the Treasury for the payment of gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same amount of impartations, to \$150,000,000 per annum.

Instructions to the National Banks acting as loan agents were not issued from the United State i reasury until March 26, but in the first three weeks of April the subscriptions averaged more than TEN

MILLIONS A WEEK. Subscriptions will be received by the First National Bank of Philadelphia, Pa-Second National Bank of Philadelphia, Pa.

From Rev. J. Newton Brown, D. D., Editor of the Encyclopedia of Religious Knowledge.

Although not disposed to favor or recommend Pat-at Medicines in general, through distrust of their ingredients and effects, I yet know of no sufficient reasons why a mag may not testify to the benefitshe believes himself to have received from any simple preparation, in the hope that he may thus contribute to the benefit of others.

to the benefit of others. I do this the more readily in regard to Hoofland's German Bitters, propared by Dr. C. M. Jackson, of this city, because I was prejadleed ag nat them for many years, under the impression that they were chiefly an aicoholic mixture. I am indebted to my friend Robert Shocmaker, Esq., for the removal of this prejudice by proper tests, and for encouragement to try them, when suffering from great and long con-tinued debility. The use of three bottles of these Bitters, at the beginning of the present year, was followed by evident relief, and restoration to a de-gree of bodily an t mental vigor which I had not fell followed by evident reflet, and restoration to a de-gree of bodily an 1 mental vigor which I had not fell for six months before, and had almost despared of regaining I therefore thank God and my friend for directing me 'o the use of them Philap'a, June 23, 1861. J NEWTON BASWN.

DISEASES OF KIDNEYS AND BLADDER.

In Young or Aged, Male or Female, Speedily removed, and the patient restored to health.

DELICATE CHILDREN.

Those suffering from MARASMUS, wasting away, with scarcely any fresh on their bones, are eurod in a very short time; one bottle in such eases, will have a most surprising effect.

PAREN'PS Having suffering children as above, and wishing te² raise them, will never regret the day they comment -ed with these Bitters.

LITERARY MEN, STUDENTS, DIA And those working hard with their brains, should al-ways keep a bottle of Hooffand's Bitters usar them, as they will find much benefit from its use, to both mind and body, invigorating and not depressing. IT IS NOT A LIQUOR STIMULANT,

AND LEAVES NO PROSTRATION.

ATTENTION, SOLDIERS!

AND THE FRIENDS OF SOLDIERS. AND THE FRIENDS OF SOLDIERS. We call attention of all having relations or friends in the army to the fact that "HOOFLAND'S Ger-man Bitters" will cure nime tenths of the diseases in-duced by exposures and privations incident to enum-life. In the lasts, published almost daily in the news-papers, on the arrival of the sick, it will be noticed that a very large propertion are suffering from debil-ity. Every case of that kind can be readily ented by Hoofland's German Bitters. We have no hesita-tion in staing that, if these Bitters were freely used among our soldiers, hundreds of lives might be saved that otherwise would be lost. that otherwise would be lost.

The proprietors are daily receiving thankful letters from sufferers in the army and hospitals, who have been restored to health by the use of these Bitters, sent to them by their friend
