These notes will be convertible at the option of the holder at maturity, into six per cent, geld bearing bonds, payable not less than five nor more than twenty years from their date, as the Government may elect. They will be issued in denominations of \$50, \$100, \$500, \$1,000 and \$5,000, and all subscriptions must be for fifty dollars or some multiple of fifty dollars.

The notes will be transmitted to the awners free of transportation charges as soon after the receipt of the original Certificates of Deposit as they can be

As the notes draw interest from August 15, persons making deposits subsequent to that date must pay the interest accrued from date of note to date of deposit.

Parties depositing twenty-five thousand dollars and upwards for these notes at any one time will be

allowed a commission of one-quarter of one per cent, which will be paid by the Treasury Department upon the receipt of a bill for the amount, certified to by the officer with whom the deposit was made. No deductions for commissions must be made from the

SPECIAL ADVANTAGES OF THIS LOAN Te is a National Savings Bank, offering a higher rate of interest than any other, and the best securing Any savings bank which pays its depositors in U.S. Notes, consider that it is paying in the best circulaing medium of the country, and it cannot pay in anything better, for its own assets are either in government securities or in netes or bonds payable in

government paper.

It is equally convenient as a temporary or pelmanent investment. The notes can always be sold for within a fraction of their face and accumulated interest, and are the best security with banks as collaterals for discounts.

CONVERTIBLE INTO A SIX PER CENT, 5-20 GOLD BOND In addition to the very liberal interest on the notes for three years, this privilege of conversion is now worth about three per cent, per annum, for the purfent rate for 6-20 Bonds is not less than nine per cent, premium, and before the war the premium on six percent, U. S. stocks was over twenty per cent, It will be seen that the actual profit on this loan, at the present market rate, is not less than ten per cent per annum.

ITS EXEMPTION FROM STATE OR MUNICIPAL TAXATION But aside from all the advantages we have enumorated, a special Act of Congress exempts all bonds and make trowsers stout enough to and Treasury notes from local taxatton. On the through a year's campaign at least. average, the exemption is worth about two percent per annum, occording to the rate of taxation in various parts of the country.

ment. In all other forms of indettedness, the faith or ability of private parties, or stock companies, or seperate communities, only, pledged for payment, while the whole property of the country is held to secure the discharge of all the obligations of the United States.

While the government offers the most liberal terms for its loans, it believe dthat the very strong-est appeal will-be to the loyalty and patriotism of

he people.

Duplicate certificates will be issuel for all doposits. The party depositing must endorse upon the original certificate the denomination of notes required, and whether they are to be issued in blank or payable to order. When so endorsed it must be left with the officer receiving the deposit, to be forwarded to the Treasury Departmen.

Subreaiptions will be received by the Treasurer of the United States, at Washington, the several Asistant Treasurers and designated Depositaries, and (for some years Superintendent of the Ladies' Department in "GENIN'S BAZAAR") who will have SCRANION FIRST AND SECOND NATIONAL BANKS OF charge of their

Ma ufacture of Woolen Goods !

CHAPTER 1. The Manufacture of Woolen Goods, both in the busehold and in the factories, has become of great importance on account of its forming at present our principal articles of clothing. The nature of our cli-mate make it necessary, and the s-arcity of Cotton has greatly increased the value of wool and Fabricks made from it and being sugaged in the business of making Clorh and Flannel, and also a oll Caroling. and Cloth Dressing, we have thought a few remarks with regard to handling Wool, and the proper pro-cess of Manufacture, might be of service to the coun-try, and a benefit to ourselves

The first process with the farmer who intends to make his wool into rolls for spinning and weaving at home, after washing and shearing, is assorting the ualities. This we do not expect a farmer to do as erfectly as a regular manufacturer, but by trying

he will approximate towards it, and he amply paid for the little pains required, by having an even thread and smoother fabric. The fleece should be whole and be spread out on a table—the coarsest wool will be fourd on the skirts of the fleece, can easily be distinguished by looking closely fibre Two qualities from each floece will perhaps be close enough for ordinary purposes, but as the sheep in our country differ much in their grades of wool—the coarse part of one may do to go with the finer part of another, and thus make three or four qualities out of the lot. If it is going to the manufactory or to market, the fleece should not be torn, but after removing the tag-locks, should be rolled up compactly, skin out side. Not less than one pound of lard, fresh butter or oil should be sent with eve

en pounds of wool going to the carding machine. The next thing of importance is of cour e to be well carded, for which we will be entirely responsible . but in the matter of spinning and weaving, we have another eaution to add. Unless the yarn is evenly twisted, and heat up evenly in the loom, the cloth shrinks unevenly in fulling—making some placeeds in pressing out the wrincles, the cloth will resume its contortion again when made into a garnent, and the mechanic is sometimes wrongfully blamed for a coat, s becoming lantern jauxed on a man's back. It is easily avoided by giving the wheel in equal number of turns to a given length of thread drawn out. We find this difficulty integral. ces wide and others narrow, and if the finisher suc thread drawn out. We find this difficulty increasing of late years, and have come to the conclusion that if some of the spinners do not keep better time on their pianes than on their spinning wheels, we should hate dreadfully to listen to their music.

As every moment of labor should be employed to the best advantage, and every ounce of material be appropriated to the best purpose, on account of our war, we propose to write some other chapters on our branch of business after this is read sufficiently to be remembered, and shall endeavor to do our work amendments be preposed to nice enough for a balmoral skirt or a doctor's coat, and make trowsers stout enough to last a farmer the tenth article thereof.

From Rev. J. Newton Brown, D. D., Editor of the Encyclopedia of Religious Knowledge. Although not disposed to favor or recommend Pat ent Medicines in general, through distrust of their ingredients and effects, I yet know of no sufficient reasons why a man may not testify to the benefits he believes himself to have received from any simple

preparation, in the hope that he may thus contribute to the benefit of others. to the benefit of others.

I do this the more readily in regard to Hoofland's German Bitters, prepared by Dr. C. M Jackson, of this city, because I was prejudiced against them for many years, under the impression that they were chiefly an aicoholic mixture. I am indebted to my, friend Robert Shoemaker, Esq., for the removal of this prejudice by proper tests, and for encouragement to try them, when suffering from great and long centinued debility. The use of three bottles of these Bitters, at the beginning of the pr sent year, was Bitters, at the beginning of the pr sent year, was followed by evident relief, and restoration to a degree of bodily and mental vigor which I had not felt for six months before, and had almost despaired of regaining. I therefore thank God and my friend for directing me to the use of them.
