Our LETTER A. FAMILY SEWING MACHINE is fast gaining a worklevil reputation. It is beyond doubt the best and sheapest and most beautiful of all Family Sewing Machines yet offered to the public No other Family Sewing Machine has so public No other Family Sewing Machine has so public No other Family Sewing Brading, Embroidering, Cording, and so forth. No other Family Sewing Machine has so much capacity for a great variety of work. It will sew all kinds of cloth, and with all kinds of thread. Great and recent improvements make our Family Sewing Machine most reliable, and most durable, and most certain in action at all rates of speed, It makes the interlocked stitch, which is the best stitch known. Any one, even of the most ordinary capacity, car see, at a glunce, how to use the letter A. Family Sewing Machine — Our Family Sewing Machine and exquisite style. OUT LETTER A. FAMILY SEWING MACHINE

and exquisite style

The Folding Case of the Family Machine is a
piece of cunning workmanship of the most useful
kind. It protects the machine when not in use, and
when about to be operated may be opened as a spacious and substantial table to sustain the work.— While some of the Cases, made out of the choicest er possible, others are adorned and embelished in ne most costly and superb manners.

It is absolutely necessary to see the Family Ma-

chine in operation, so as to judge of its great capaciand beauty.
It is fast been ming as popular for family sewing as our manufacturing machines are for manufactur-

twist, thread, needles, oil, &c., of the very best qual-THE SINGER MANUFACTURING COMPANY.

REASONABLE TERMS. REPAIRING,

PROMPTLY, NEATLY, AND CHEAPLY DONE Funkhamo k, Nov. 4, 1863 .- v3-n13. Manufacture of Woolen Goods !

CHAPTER 1. The Manufacture of Woolen Goods, both in the household and in the factories, has become of great in principal articles of clothing. The nature of our climate make it necessary, and the scarcity of Cotton has greatly increased the value of wool and Fabricks made true its and heing engaged in the husings of has greatly increased the value of wool and rabrieks made from it; and being engaged in the business of making Clorh and Flannel, and also oll Carding, and Cloth Dressing, we have thought a few remarks with regard to handling Wool, and the proper process of Manufacture, might be of service to the country, and a benefit to ourselves.

The first process with the farmer who intends to make his wood into rolls for spinding and weaving at home, after washing and shearing, is assorting the nalities. This we do not expect a farmer to do as erfectly as a regular manufacturer, but by trying ne will approximate towards it, and be amply paid

he will approximate towards it, and be amply paid for the little pains, required, by having an even thread and smoother fabric. The fleece should be whole and be spread out on a table—the coarsest wool will be found on the skirts of the fleece, and can easily be distinguished by looking closely to the fibre. Two qualities from each fleece will perhaps be close enough for ordinary purposes, but as the sheep in our country differ much in their grades of wool—the coarse part of one may do to go with the fiber part of abother, and thus make three or four qualities out of the lot. If it is going to the manufactory or to market, the fleece, should not be torn, but after removing the tag-locks, should be rolled up compactly, skin out side. Not less than one pound of lard, fresh butter or on should be sent with every ten pouncs of wool going to the carding machine.

The mexical ago of importance is of course to be well carded, for which we will be entirely responsible, but in the matter of spinning and yearing, we have another caution to all. well carded, lot wan in we will be entirely responsi-ble, but in the matter of spinning and veaving, we have another caution to add. Unless the yarn is evenly twisted, and boat up evenly in the loom, the cloth shrinks unevenly in fulling—making some places wide and others narrow, and if the fleisher suc-ceeds in pressing out the windles, the cloth will resume its contortion again when made into a gerheat, and the mechanic is sometimes wrongfully blamed for a good's becoming limitern jawed on e man's back. It is easily avoided by giving that wheel in equal number of turns to a given length of thread drawn out. We find this difficulty increasing of late years, and have come to the conclusion that if some of the spinners do not keep better time on their pianos than omtheir spinning wheels, we should hate dreadfully to listen to their music.

As every moment of laborabould be employed to the jest advantage and every concept of

he best advantage, and every ounce of material he ppropriated to the best purpose; on account of our var, we propose to write some other chapters on our ranch of business after this is read sufficiently to be emembered, and shall endeavor to do our work ince enough for a balmoral skirl or a doctor's toat. and make trowsers stout enough to last a farmer through a year's campaign at least.
