Nicholson, July 27th, 1864. Manufacture of Woolen Goods !

CHAPTER 1.

CHAPTER 1. The Manufacture of Woolen Goods, both in the household and in the factories, has become of great importance on account of its forming at present our principal articles of clothing. The nature of our cli-mate make it necessary, and the scarcity of Cotton has greatly increased the value of wool and Fabricks made from it · and being engaged in the business of making Clorh and Flannel; and also 1 oll Carding, and Cloth Dressing, we have thought a few remarks with regard to handling Wool, and the proper pro-cess of Manufacture, might be of service to the coun-try, and a benefit to ourselves try, and a benefit to ourselves

The first process with the farmer who intends to make his wool into rolls for spinning and weaving at home, after washing and shearing, is assorting the ualities. This we do not expect a farmer to do as erfectly as a regular manufacturer, but by trying he will approximate towards it, and be amply paid three three tenths per cent per annum, — principal and public three towards n, and be amply part and three three tenths per cent per annum, — principal and public tents both to be paid in lawful money. These notes will be convertible at the option of the holder at maturity, into six per cent, gold hear-
