THE SINGER SEWING MACHINES.

Our LETTER A. FAMILY SEWING MACHINE s fast gaining a world-wide reputation It is beyond doubt the best and cheapest and most beautiful of all Family Sewing Machines yet offered to the public No other Family Sewing Machine has so many useful appliances for Hemming, Binding, Felling, Tucking, Gathering, Gunging, Braiding, Embroidering, Cording, and so forth. No other Family Sewing Machine has so much capacity for a great variety of work It will sew all kinds of cloth, and with all kinds of thread. Great and recent improvements make our Family Sewing Machine most reliable, and most durable, and most certain in action at all rates of speed, It makes the interlocked stitch, which is the best stitch known. Any one, even of the most ordinary capacity, can see, at a glance, how to use the letter A. Family Sewing Machine.—Our Family Sewing Machines are finished in chaste and exquisite style.

The Folding Case of the Family Machine is a piece of cunning workmanship of the most useful kind. It protects the machine when not in use, and when about to be operated may be opened as a spacious and substantial table to sustain the work.—While some of the Cases, made out of the choicest woods, are finished in the simplest and chastest manner possible, others are adorned and embelished in the most costly and superb manners.

It is absolutely necessary to see the Family Machine in operation, so as to judge of its great capacity and beauty.

It is fast becoming as popular for family sewing as our manufacturing machines are for manufacturing purposes

The Branch Offices are well supplied with silk twist, thread, needles, oil, &c., of the very best quality.

Manufacture of Woolen Goods!

CHAPTER I

The Manufacture of Woolen Goods, both in the household and in the factories, has become of great importance on account of its forming at present our principal articles of clothing. The nature of our climate make it neccessary, and the scarcity of Cotton has greatly increased the value of wool and Fabricks made from it: and being engaged in the business of making Cloth and Flannel, and also roll Carding, and Cloth Dressing, we have thought a few remarks with regard to handling Wool, and the proper process of Manufacture might be of service to the country, and a benefit to ourselves

The first process with the farmer who intends to make his wool into rolls for spinning and weaving at home, after washing an shearing, is assorting the qualities. This we do not expect a farmer to do as erfectly as a regular manufacturer; but by trying he will approximate towards it, and be amply paid for the little pains required, by having an even thread and smoother fabric. The fleece should be whole and be spread out on a table—the coarsest wool will be found on the skirts of the fleece, and can easily be distinguished by looking closely to the fibre Two qualities from each fleece will perhaps be close enough for ordinary purposes, but as the sheep in our country differ much in their grades of wool—the coarse part of one may do to go with the finer part of another, and thus make three or four qualities out of the lot. If it is going to the manufactory or to market, the fleece should not be torn, but after removing the tag-locks, should be rolled up compactly, skin out side Not less than one pound of laid, fresh butter or oil should be sent with every ten pounds of wool going to the carding machine.

The next thing of importance is of course to be well carded, for which we will be entirely responsible, but in the matter of spinning and weaving, we have another caution to add. Unless the yarn is evenly twisted, and beat up evenly in the loom, the cloth shrinks unevenly in fulling—making some places wide and others narrow, and if the finisher succeeds in pressing out the wrinkles, the cloth will resume its contortion again when made into a garment, and the mechanic is sometimes wrongfully blamed for a coat's becoming *lantern jawed* on a man's back. It is easily avoided by giving the wheel an equal number of turns to a given length of thread drawn out We find this difficulty increasing of late years, and have come to the conclusion that if some of the spinners do not keep better time on their pianos than on their spinning wheels we should hate dreadfully to listen to their music.

As every moment of labor should be employed to the best advantage, and every ounce of material be appropriated to the best purpose, on account of our war, we propose to write some other chapters on our branch of business after this is read sufficiently to be remembered, and shall endeavor to do our work nice enough for a balmoral skirt or a doctor's coat, and make trowsers stout enough to last a farmer through a year's campaign at least.

WHAT EVERYBODY KNOWS, viz.—

That Iron well galvanized *will not rust;*

That a *simple* machine is better than a complicated one

That a Wringer should be *self-adusting, durable, and efficient.*

That *Thumb Screws* and *Fastenings* cause *delay* and *trouble* to regulate and keep in order;

That wood soaked in hot water *will swell, shrink and split*;

The wood bearings for the shaft to run in *will wear out*;

That the Putman Wringer, with or without cog-wheels, will *not tear the clothes*;

That cog-wheel regulators are not essential;

That the Putman Wringer has *all* the advantages, and *not one* of the disadvantages above named;

That all [illegible] have tested it, pronounce it the *best* Wringer ever made;

That it will wring a *Thread* or a *Bed-Quilt* WITHOUT ALTERATION

We might fill the paper with testimonials, but have only a few to convince the skeptical, if such there be; and we say to all, *test* Putnam's Wringer THOROUGHLY with ANY and ALL others and if not entirely satisfactory, return it

Putnam Manufacturing Co:

GENTLEMEN:—*I have from practical experience that iron well galvanized, with care will not oxidize or contaminate clothes. The Putnam Wringer is as near perfect as possible, and I can cheerfully recommend it to be best in use.* Respectfully yours.
