

Miscellaneous.

BASE BALL.

The Brooklyn Eagle philosopher in his effort to keep up with the amusements of the age, has slipped into base ball sport.

The game is a great invention. It is easily understood. All you have to do is to keep your eye on the ball.

It is all about the ball. They also use a bat. The bat is a club built on the model of the club Barnum killed Capt. Cook with.

This is why the organization is called a club. One fellow takes a club and stands on a line, and another stands in front of him, and fires the ball back at him.

The chap with the club hits back. The ball flies in another direction.

The first fellow drops the club as though he was scared, and runs like a pickpocket with an M. P. after him.

Several fellows run after the ball; some body catches it and fires it at somebody else, when the chap who had the club stops running.

Another fellow then takes the club, and the same man, who is called "pitcher," pitches on him, fires the ball at him, and he hits back, knocks the ball, drops his club and cuts his stick for the first base.

Half a dozen fellows out on picket duty scramble for the ball.

One reliable B. B. is posted behind the club man, in case the club man misses the ball, to see that it don't go by and hit the Umpire.

When one side is out the other side goes in, and when both sides are out it is called an inning.

It is quite an intelligent game, depending entirely on the use of your legs. The first principle of the game is running.

When you are "in" you run away from the ball; when you are "out" you run after it.

It is a splendid exercise; keeps you warm; and consequently is always played in the summer time.

INTERESTING TO LADIES.

What is the difference between a mischievous mouse and a beautiful young lady? One harms the cheese, and the other charms the boys.

Why is it that the moment of popping the question is so terrible to young fellows, that they frequently cannot utter a word? Because they love the fair one beyond expression.

What is the greatest curiosity in the world? A woman.

When does a man die for love? When he dyes his red whiskers brown.

Why is love like a duck's foot? Because it often lies hidden in the breast.

Why is a marriage certificate like an article that the public could not do without? Because it is a noose-paper.

What fruit does a newly-married couple most resemble? A green pear.

Why if a fine young widow who entraps in Hymen's meshes the heir of a prosperous gentleman like the earth? Because she is wicked? No. Because she is fair, but deceitful? No. Because she comes round the sun (sun).

When is a lover like a tailor? When he presses his suit.

Why is the second wife of a widower with a small family like a Roman king? Because she is a Noma (new ma).

Why is a man who beats his wife like an exquisitely formed dog? Because he is a perfect brute.

Which is the best way of retaining a woman's affections? By not returning them.

Why is a young lady just from boarding school like a building committee? Because she is ready to receive proposals.

Why on hit a woman to prefer a brewer's drayman for a husband? Because he'll always support her.

Why is a lover who composes a pretty sonnet to the features of his "object," like a soldier? Because he knows how to write about face.

What is that process by which twenty women, assembled in one room, can be inequally handsome at the same moment? Putting out the light.

IMPORTANCE OF PUNCTUATION.—Wanted—a young man to take charge of a very fine span of horses of a religious turn of mind.

A school committee man writes: We have a school house large enough to accommodate four hundred pupils four stories high.

A newspaper says: "A child was recently run over by a wagon about three years old and crossed wearing pantaloons which never spoke another word afterwards."

Parasol—A protection against the sun used by ladies made of cotton and whalebone.

An exchange in describing a recent celebration, says: "The procession was very fine and about two miles in length as was the prayer of Dr. Perry, the Chaplain."

He who resolves to amend has God on his side.

A little girl said: "Mother is Tom a good cat?"

"Yes."

"Well, he'll go to heaven, won't he?"

"I suppose so, but if you're not a better girl, you'll never go there."

"Oh!" said the little girl, "I'll hold on to Tom's tail."

An absent-minded man's body is only a car case.

Bear your cross worthily, and it will turn to an anchor.

WANTED!

100,000

Men and Women

Call, and examine for yourselves, the new and splendid stock of

SPRING & SUMMER Goods,

—AT—

THE HEAD QUARTERS

for Good bargains.

Hallstead & Howe.

Have just opened a large and well selected stock of goods at the store formerly occupied by O. L. Hallstead & Son at

EMPIRE

SHUTTLE MACHINE

Patented February 14th, 1860.

SALESROOM 536 BROADWAY, N. Y. 200 WASHINGTON STREET, BOSTON.

THIS MACHINE is constructed on entirely new principles of mechanism, possessing many rare and valuable improvements, having been examined by the most profound experts, and pronounced to be SIMPLICITY AND PERFECTION COMBINED.

It has a straight needle, perpendicular action, makes the "Lock or Shuttle Stitch," which will "Neither Rip nor Ravel," and it is alike on both sides; performs perfect sewing on every description of material, from Leather to the finest Net or Muslin, with cotton, linen or silk thread, from the coarsest to the finest number.

Having neither "Cam nor Cog Wheel," and the least possible friction, it runs as smooth as glass, and is

EMPHATICALLY A NOISELESS MACHINE! It requires fifty per cent. less power to drive it than any other machine in the market. A girl twelve years of age can work it steadily, without fatigue or injury to health.

Its strength and "Wonderful Simplicity" of construction renders it almost impossible to get out of order and is guaranteed by the company to give entire satisfaction.

We respectfully invite all those who may desire to supply themselves with a superior article, to come and examine this "Unrivalled Machine." One-half hour's instruction is sufficient to enable any person to work this Machine to their entire satisfaction.

Religious and Charitable Institutions will be liberally dealt with.

Agents wanted for all Towns in the United States where Agents are not already established. Also for Cuba, Mexico, Central and South America, to whom a liberal discount will be given.

T. J. McARTHUR & CO. A. & Co. PRINCIPAL AGENTS ESTABLISHED Syracuse, N. Y., John H. Fowler, Phila., Searles, McKittrick & Co., Pittsburg, Earnest Axtell, and 400 First A & C.

TO THE NERVOUS, DEBILITATED AND DESPONDENT OF BOTH SEXES, A great sufferer having been restored to health in a few days, after many years of misery, is willing to assist his suffering fellow-creatures by sending (free) as the receipt of a postpaid addressed envelope, a copy of the formula of cure employed. N. J. JOHN M. DAGAN, L. B. 183 Post Office, Franklin, Pa.

Scrofula, or King's Evil,

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. What ever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which renders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla,

the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fatal malady. It is composed of the most powerful remedies that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as BRUISES AND SKIN DISEASES, ST. ANTHONY'S FIRE, ROSE, OR ERYSIPELAS, EMBELLES, ECZEMA, BLOTCHES, BLAINES AND HOT TUBERCLES, TERTIARY AND SALT RHEUM, SCALD HEAD, RINGWORM, RHEUMATISM, SYMPHITIC AND MERCURIAL DISEASES, DROPSY, DYSPEPSIA, DEMILITY, and, indeed, ALL COMPLAINTS ARISING FROM VITIATED OR IMPURE BLOOD. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

AYER'S

Ague Cure,

FOR THE SPEEDY CURE OF

Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Malaria, and other forms of this Sarapara and Bilious Fevers, indeed for the whole class of diseases originating in biliousness, indigestion, and the Malaria of Miasmatic Countries.

We are enabled here to offer the community a remedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where there is a prevalence of the miasmatic "Cure" expels the miasmatic poison of FEVER AND AGUE from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in billous districts, where FEVER AND AGUE prevail, every body should have it and use it freely both for cure and protection. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittent is that it contains no Quinine or mineral, consequently it produces no quinine or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague do not alone the consequence of the miasmatic poison. A great variety of disorders arise from its irritation, among which are Neuralgia, Rheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarrh, Asthma, F
