is a constitutional disease, a corruption of the blood, by which this fluid becomes vittated weak, and poor. Being in the circulation is pervades the whole body, and may burst est in disease on any part of it. No organ is from its attacks, nor is there one which it may not destroy. The serofulous taint is variously caused by mercurial disease, low living, disordered or inflictably food, impure air, filth and fifthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the conever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon

their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which in the lungs, liver, and internal organs, is termed tubercles; in the glands, awellings; and on the surface, cruptions or sores. This foul cor-ruption, which genders in the blood, depressed the energies of life, so that scrofulous constitutions not only suffer from scrofulous com-plaints, but they have far less power to withstand the attacks of other diseases; consequently vast numbers, perish, by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which deeimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or

and, indeed, or all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrotulous; their persons are invaded by this lurking in-fection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and in-vigorate it by healthy food and exercise. Such a medicine we supply in

Ague Cure,

FOR THE SPEEDY CURE OF Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Periodical Headache, or Bilious Headache, and Bilious Fevers, indeed for the whole class of diseases originating in biliary derangement, caused by the Malaria of Miasmatic Countries. We are enabled here to offer the community a

We are enabled here to offer the community a remedy which, while it cires the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where these allieting disorders prevail. This "Cure" exp. is the mussmatic poison of Feven and Ague from the system, and prevents the development of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discover d for this class of compaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in bilious districts, where Feven and Ague prevails, every body should have it and use it freely both for cure and protection. Agreat superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is that it contains no Quinisse or mineral, consequently it produces no quinism er other injurious elects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the miasmatic poison. A great variety of disorders arise from its britation, among which are Neuralgia, Rheumatism, Gout, Heanache, Blindness, Toothache, Earache, Caterrh, Asthma, Patpitation, Painful Affection of the Spleen, Hysterics, Pain in the Bowels, Colic, Paralysis and Derangement of the Stomach, all of which, when originating in this cause, put on the intermittent

res, Pain in the Bowels, Colic, Paralysis and De-rangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "CURE" expels the poison from the blood, and consequently curse them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occa-sionally or daily while exposed to the infection, that will be excreted from the system, and cannot accumulate in sufficient quantity to ripen into dis-ease. Hence it is even more valuable for prate-tion than cure, and few will ever suffer from Inter-mittents if they avail themselves of the protection this remedy affords.
