I shall have to follow it through a checkered experience, in a tale commingled of great misfortunes, great follies and great glories; but from first to last through "winter and rough weather," the Army of the Petomae never gave up but made a good fight, and finally reached the goal

Of this drama there will be no other here than the Army of the Potomae itself; for it would seem that in this war of the People it was decreed there should arise no imperial presence to become the central figure and evaporer of men's eyes. Napoleon, in an outburst of haughty eloquence, exclaims that in the great armies of history the Commander was everygreat armits of history the Commander was everything. their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous com-plaints, but they have far less power to withstand-the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in
