Chicks when first hatched require
neither food or drink. Indeed, such
is harmful. During the first seventy-two hours the chick's life is sus-

tained by the assimilation of the yolk,

for the embryo chick is developed from the white of the egg, and just be-fore hatching the yolk is drawn up into its system and furnishes all the

food any chick should have for the first three days of its life. It is dur-ing this period that chicks can be shipped as far as express can take

TAVERN KEY TO GRAVEYARD Gate to Cemetery of Old Church Near Berlin Bears Undesigned State-ment of Great Truth.

There is said to be an old church near Berlin, Germany, which is very attractive to tourists. The graveyard back of the church is kept locked, but on the gate is the following notice: "The key to the graveyard is to be found in the tavern."

found in the tavern."
This is an undesigned statement of a great truth. A great army of men annually find the key that opens the way for them into the graveyard by going into the tavern. They not by going into the tavern. They not only unlock the graveyard to them-selves, but oftentimes to innocent children and helpless women who are dependent upon them.—Southern Pa-

Carlisle.—After having received in his body the full charge of a telephone wire that had been torn down by a storm, Edward Weigle of Mount Holly Springs, who was thought to be dead following the accident, is now able to walk about. Physicians revived him by artificial respiration. An effort will be made to obtain a Carnegle medal for James Green, who witnessed the accident and rescued Weigle from the deadly grip of the electric current. When Weigle picked up the telephone wire Green secured a stout pole and attempted to knock the wire from the man's grasp. When he came in contact with Weigle, Green was hurled as though shot from a cannon. Several times he was catapulted through the air, but he persisted until he finally knocked the wire away from Weigle. Both of Weigle's hands were severely burned. It is thought he will completely recover from the shock.
