STAPLE FOOD FOR POULTRY Grain Will Be Used as Long as Fowls

Are Kept on Farms—Hen Must Have Certain Varieties.

Grain is the staple food for poultry, will be used for that purpose as long as fowls are kept on farms; but hens as lows are kept on rains, but mans cannot give good results on grain alone. It is beneficial to them, and will be at all times relished, but the demands of the hen are such as to call for a variety. In the shells of eggs, as well as their composition, are compared forms of minored matter and several forms of mineral matter and nitrogen, which can only be partially obtained from grain. Even though grains carry in com-position for a long time, hens will be-

position for a long time, hens will be-gin to refuse it, as they may be over-supplied from other sources. For this reason they will accept a change of food which is of itself evidence that the best results for his hens can only be obtained from a variety of food. Corn and wheat may be used as food with advantage, but must be given as a portion of the ration only, and not made exclusive articles or elet. In grain the principle articles or elet Windber, \$100.
