

Household Notes.

Scale can be removed from palms by washing them in water to which has been added a few drops of cedar oil.

Roses will revive very quickly if their stems are clipped and they are placed in hot water for a minute or two.

Medium-sized vegetables are better than the large sizes, as they can be cooked and served without so much waste.

Dried corn at 20 cents a pound goes much further than canned corn, and is much more wholesome and better in flavor.

When beating the whites of eggs be sure that there is no grease on the beater, as it will prevent the eggs from frothing.

The best material for protecting shrubs from winter winds is waterproof building paper. Make a framework of lath around the shrub and tack the paper to it.

An inexpensive kitchen convenience is a quart milk can covered, in which milk, soup, custard, or any liquid may be put into the refrigerator, taking small space.

Chicken feet, if scraped and boiled down in water, will make a delicious jelly. If desired, boiled rice may be mixed with the broth before pouring into the bowl to set.

To wash a rug, tack it securely to a bare, clean floor; next scrub with ammonia water and pure castile soaps; rinse thoroughly and leave tacked to the floor until perfectly dry.

WASHING SATIN.

Few people seem to realize how well satin washes. Use the following method and when dry, it has looked equal to new. Make a good lather of soap and warm water; wash the article in this, then rinse in clear cold water and iron when dry on the wrong side of the material.
