THE TURNING POINT.

In all lives, the highest and humblest, there is a crisis in the formation of character and in the bent of disposition. It comes from many sources and from some which on the surface are apparently trivial. It may be a book, a speech, a sermon, a great misfortune or a burst of prosperity. But the result is the same—a sudden revelation to ourselves of our secret purpose and a recognition of our perhaps long shadowed but now masterful convictions.

Aye, There's the Rub. If we had to turn our own grindstones we wouldn't have so many axes to grind.—Cincinnati Enquirer.

Our First Music Masters. Birds were our first music masters. Authorities on harmony have written volumes in search of the origin of the minor scale. If they had turned to the birds they might have discovered it without any search whatever. In every English copse the cuckoo (who has but two notes at his command) sings a perfect minor third downward. Listen to our wood thrush's melody! His cluster of three notes forms a perfect minor chord. Four hundred years before Christ, Aristophanes wrote a play entitled "The Birds," which was produced at Harvard a few years ago, the vocal part being set to music by John K. Paine.—Suburban Life.

Vegetable Silk. Paraguay has a pod bearing plant which is useful in making a vegetable silk.
