The general assembly of the Presbyterian church has declared against its members acting as attorneys for liquor dealers. All over the country and in good old Somerset county too, we find members of churches acting in the interests of those who sell that which damns both body and soul. The license annual, published by the W. C. T. U., is just out. Look for the names of the Somerset county attorneys who help this cause along as well as at the nearly 5,000 names of men "of good character" who are supporting the liquor element in this county. No wonder Somerset is a black county!

Another daring aviator, Lincoln Beachy, has fallen to his death, though he could boast that twenty million people had witnessed his daredevil stunts. A pioneer in the use of the aeroplane, he started at 18 years of age to perform feats that few air-men would even attempt. The collapse of the wings of the machine which sent him to his death has been one of the most sensational aviation disasters. A few years ago he retired, feeling he was in part responsible for the death of nine other aviators who had attempted to imitate his feats. The conquest of the air seems a certainty at this age, but like all other advancements the toll of valuable human lives has been great even at this time.

Deaths and suicides are being reported all over the country as the result of the new anti-narcotic law which became effective March 1. President Wilson receives letters by the thousands from the poor "dope" victims, so suddenly deprived of what was more than life to them, cannot exist and the president shows his sympathy when he directs physicians to take the cases in hand; but the obtaining of laudanum, morphine etc. can no longer be relied upon by the unfortunate ones whose lives have been ruined by a habit, easily started but which like "The Old Man of the Sea," crushes them at last by the weight of their indulgence. A great percentage of cases is due to the carelessness of physicians in prescribing narcotics as in only extreme cases should they be used. The law is one of the best ever made and will result in incalculable benefit to mankind.

**Carrying the Polish Jewels.**  
If the archbishop of Cracow, in his flight from the threatened city, has really taken all the sacerdotal treasure with him his load must be a heavy one. For in the cathedral, ancient Poland's Westminster abbey, were gathered rich tribute in gold and jewels from generations of Polish lords and ladies. The kings of Poland—and many of her uncrowned kings—are buried in the cathedral. Here Kosciusko sleeps. Cracow in the days of its metropolitan glory sheltered 80 churches within its walls. A third of that number remain, more than enough for the present population.—London Chronicle.

**School Children's Health.**  
Boston's health authorities have started another vigorous campaign against giving communicable diseases of children a foothold in that city. School physicians are urged to inquire at the homes of children the cause of their absence, and in an open letter to parents the authorities advise that physicians be consulted in every case where the child complains of throat affection.

**Goatskins Scarce in Mexico.**  
There is to be a shortage of goatskins from central Mexico for at least two years to come, because of the fact that breeding stock and young goats have been taken for food.

**Something Rarely Seen.**  
It is a question whether we have ever seen the full expression of a personality, except on the imaginative plane of art.—Oscar Wilde.

**Entirely Unnecessary.**  
It is probably true that Satan never takes a vacation, but there's no good reason why he should be always working overtime.—Washington Post.

**To Keep Stoppers From Sticking.**  
A very little glycerin smeared around the glass stoppers of bottles will keep them from sticking for a long time.

**The Way of Prices.**  
The news of an advance in prices travels much faster than a reduction which may follow.—Aitchison Globe.

**LIQUOR LICENSES.**

Continued from 1st page. . . . In passing on the exceptions filed to the granting of any licenses because the advertisements of the application list did not give the residences of the applicants, Judge Ruppel filed an opinion in which the exceptions are overruled. He maintains that the interests of the applicants should not be jeopardized because of any possible error that may have been made in this instance. The court in Tioga county threw out the entire list for a similar cause when applicants to dispense intoxicants were heard in that county a few weeks ago.

The following is a classified list of the court's action on all the licenses petitions

**Real Economy.**  
Economy also means that the father with a turkey wing income ought not to undertake to buy ostrich plumed hats for six daughters who regard washing dishes as drudgery and slinging the frying pan a disgrace.—Houston Post.

**Affected the Hair.**  
The fair creature's head looked like a haystack. Each separate hair stood out. "What's the matter, dear? Your hair is standing on end!" I put it up in curl papers last night, and the newspaper I used was filled with horrible crimes.

**Home-Made Paste.**  
An inexpensive paste which will be found much more satisfactory than either flour or cornstarch is made of one small potato grated fine. Add boiling water enough to make clear and boil five minutes.

**Recording Sound Waves.**  
A new German method of recording sound waves employs a lead pencil line of varying thickness, formed on a strip of paper by an electric current influenced by the vibrations.

**To Remove Butternut Meats Whole.**  
Pour hot water over the butternuts and let them stand over night. When treated in this way the nuts are much easier to crack and the meats will come out whole.

**More Fruits Should Be Used**  
It is rather strange how few people know the medicinal value of our common fruits and vegetables. What a pity more fruits and fruit juices are not used.

**Fussy Woman.**  
A fussy Atchison woman returned a bag of salt to her grocer with the complaint that its "flavor" wasn't good.—Kansas City Star.

**A Real Peach.**  
Our idea of a peach is the wife of a man who thinks she is prettier than the cashier at his favorite restaurant.—Galveston News.

**Very Easy.**  
"It is said that two people can live on less than one. How do you account for it?" "Necessity."

**Optimistic Thought.**  
Better a blush on the face than a blot on the heart.

**NEW DIET FOR ANGLER FISH.**

**Eats Ducks in Connecticut and is Caught With Ice Tonge.**

Greenwich, Conn.—A strange specimen of the angler fish was caught by Captain Palmer at South Beach, who removed from its insides two ducks from J. Kennedy Tod's Inn in Arden estate, one of which was still alive. The fish was struggling in the water when seen by Captain Palmer and was landed with a pair of ice tongs. It is a yard long, and its mouth is 8 by 8 inches. The fish has been frozen in a cake of ice at the local Mather ice plant and is exhibited in the window of the Koellmer market here.

The angler fish is described by Webster's Dictionary in this way: "A pediculate fish (Lophius piscatorius) of Europe and America, having a large, broad and depressed head, with a mouth very large. It reaches a length of from three to five feet and is said to lie partly buried in the bottom and to entice other fishes within its reach by movements of fleshy appendages on the head."

No mention is made of ducks.

**Stationary Youth.**  
Rich Father—My daughter is too young to get married. She is only eighteen. Impecunious Lover—I know, sir, but I have waited patiently for years, and she doesn't seem to get any older.

**FIVE TONS OF OINTMENT FOR SOLDIERS' FEET WEEKLY.**

An "eyewitness" at the British general army headquarters in France pays a tribute in an article given out by the official press bureau to the work of the army supply departments. He calls the ordnance department a "military universal provider." He says in part:

"The vastness of the work of maintaining a modern army may be gauged by the fact that during the past month the supplies furnished included 420 miles of telephone wire, 530,000 sand bags and 10,000 pounds of shoe blacking, while in ten days the ordnance department supplied 120,000 fur wristlets and 300,000 handkerchiefs. The average weekly issue of ointment for feet is 1 1/2 tons."

The capacity of the work is illustrated by the fact that the index of the stores in late 50,000 separate kinds of articles. Most of these still are obtained from England, but some are being manufactured by the ordnance department in its own workshops in France.
