Socialism would end exploitation through the ownership of private property, while at the same time it would make the ownership of private property, a possibility for every one. It would establish the principle of co-operation which makes for peace rather than the principle of competition which makes for war.

Were it not for the co-operation of the forces in nature used to produce plant life, the human race could not exist upon this planet. If you want to know more and are willing to come into touch with education that edu-

ates, attend the meetings of the Socialist branch at St. Paul, Thursday evenings.

B. & O. BADGES OF HONOR.
When the summer suits are donned this season by the uniformed forces of the Baltimore and Ohio railroad the passenger trainmen, station employes and others who come in direct contact with the public will be decorated by the management with badges of honor upon the basis of length of service and as an evidence that the company venerates them for the years spent in their employ. The coats sleeves of the uniforms will be decorated with bold bars and stars, the bars signifying five years of service and the stars twenty-five years with the road. It is the purpose in supplementing the pass regulation to extend proper recognition to its men so that the public may form an idea as to the training they have had as its employes.

Pensioned employes likewise will receive the decoration at the hands of the company. Retired trainmen and others have been asked to wear their old uniforms—which are still a fond possession of most of them—to headquarters that they may be decorated; did not require uniforms will receive fitting recognition at the same time.
