MINE SUPERINTENDENT DEAD.

Thomas Cross, a former superintendent of the Boswell operations of the United Coal Company, died on Tuesday at Beatty near Greensburg, of acute tuberculosis from which he had suffered the past four months.

After having left Boswell a little more than two years ago, Mr. Cross with his family moved to West Virginia where he followed mining for a time, later going to Beatty where he was superintendent of extensive coal operations up until his death. As a mining official he was regarded as being far above the average, and his kind and considerate ways of handling men made him a favorite wherever he worked. His wife and five children survive.

THINK THIS OVER

A State Forester sends out these pointed paragraphs:

"Forest fires kill the young growth; without healthy young growth now, no good forests hereafter.

"Fires damage large trees, causing early decay.

"Fires in a few hours destroy the growth of many years.

"Fires increase taxes by reducing forest values.

"Fires cause springs and streams to dry up.

"Fires kill and drive away game.

"Nine-tenths of the fires are the result of carelessness; will you join those who are careless?"

"If you can stop a fire, do so; otherwise, notify the Forest Warden.

MOSQUITOES

Mosquitoes born now not only live all summer but each female lays according to the species about 150 eggs. These multiplied by the generations of a season would add up to millions of mosquitoes. As their breeding season has begun we must be diligent in our efforts to destroy their breeding places. Should we fail in our efforts we will be annoyed by their buzzing and by their biting and by an increase of malaria fever, and should yellow fever be introduced to our shores it would make for a serious epidemic.

The battle must begin at once. If we have to use rain barrels for our water supply, they should be carefully netted so that the mosquito cannot reach the water and lay its eggs. If fresh pools exist about our places they should be filled up or drains be laid to carry away the rain water and not permit it to collect and become stagnant. If our swamps are too large to drain and fill up they should be treated with petroleum, so that the oil will prevent the larva of the mosquito from reaching the atmosphere to breed. It will then drown for the want of oxygen.

In country places ducks, particularly mallards, will do much to keep down mosquito pests, as they are very fond of the larva and pupa.

Tomato cans, sardine boxes, broken cups—any vessel that will hold rain water will afford favorable breeding places for mosquitoes. One tomato can half full of water will be sufficient for the rearing of thousands of mosquitoes.

The saucers under the flower pots in and around our houses offer favorable breeding places. Water vessels that are set out for birds and animals are often found full of mosquito larvae. Therefore such receptacles ought to have the water changed daily, so as to destroy any eggs that may be laid in them.

Water pitchers in rooms that are only occasionally used have often been found fertile breeding places and where houses were well screened they were filled with mosquitoes, owing to the fact that they may be one or two female mosquitoes had found access to the water in these pitchers of a spare chamber.

Beware of Ointments for Catarrah that Contain Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure, be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists. Price 75c. a bottle. Take Hall's Family Pills for constipation.

Ring Agent Rush's absence the latter part of the week.

The town is in darkness due to the lightning having struck the light plant on Tuesday evening and burning out the generator. The Meyersdale Light Company has promised to turn its current on this week.

The Wild Life League of Pennsylvania has organized here and already has a large membership. The meeting held in the opera house Tuesday night was well attended.

William Bittner has been elected checkweighman by the miners at the South Side Mine. He will take the place of J. A. McKenzie, who has resigned.

Don't forget that May 8 is clean-up day, set by council. Wagons on that date will haul away rubbish which is in readiness.

The last of the series of band concerts, April 18 was a great success. The Garrett Concert band rendered a fine program assisted by Miss Lena Brant.

ALL HUNTING FOR PROFIT IS PROHIBITED

For the information of sportsmen throughout the state the Wild Life League of Pennsylvania gives the following summary of the new game code, known as House Bill, No. 119 which became a law last week.

The act is considered the most advanced and comprehensive game protective legislation ever enacted in this state, striking at the last vestige of market hunting by forbidding the sale of rabbits and squirrels killed in the state and forbidding the shipment of game except when accompanied by the shipper. It forbids the ownership, transfer, sale or transportation of ferrets except under license which only be granted by the game commission for good reasons.

It forbids the taking of bear in any way except by the use of rifle or gun, shooting only one ball and forbids the trapping of bear in any way. It prevents hunting for hire by making it illegal for any man paid as a guide or in any other way as a hunter to give, sell or present game of any kind to his employer and similarly forbids the employer receiving game from such employe or guide. It fixes the game season as follows:

Squirrels of all kinds, grouse, woodcock quail, wild turkey, mongolian ring-neck or English pheasant, blackbirds or Hungarian quail, October 15 to November 30 inclusive.

Rabbit and hare Nov. 1 to Nov. 30.

Deer, Dec. 1 to Dec. 15.

Raccoon, Oct. 16 to Dec. 31.

Bear, Oct. 15 to Dec. 15.

It fixes the bag limit as follows:

	Per	Per	Per
	Day	Per	Day
	Wk	Sea'n	
Wild Turkey	1	1	2
Deer (must be male with horns 2 inches above head)	1	1	1
Bear	1	1	1
Grouse	5	20	30
Quail	8	25	40
Woodcock	10	20	30
Hungarian Quail	4	10	20
Ring Necks	4	10	20
Squirrels	6	20	40
Rabbits	10	30	60
Hare	3	15	30

Ring-neck pheasants raised strictly in captivity may be killed by their owner on their own premises during the open season without regard to number.

It is made unlawful to shoot at any doe or fawn, the penalty being the

How Long will it Take You to Earn
\$600.00
At Your Present Salary?

We doubt very much if there is one of the contestants in the Piano Contest earning more than \$600.00 per year working from eight to ten hour per day.

Yet here is an opportunity that we are offering to these same contestants, or to any person who desires to take advantage of it, an opportunity to earn the equivalent of \$600.00 in six months working only one or two hours per day at the very most.

You cannot hope to win the Piano or many of the Grand Prizes unless You are active in the sale of Trade Books.

Remember that the sale of each book brings to the club that sells it 75,000 votes before it is ever used, and 5,000 additional when the book is turned in. Ten books would net you 760,000 votes, this would certainly give your standing a boost

Then what about the special sales? The purchase of one dollar's worth of sale merchandise on Wednesday gives the purchaser 11,000 votes.
