

NEWS IN GENERAL.

70 Scottish soldiers were killed and about 400 injured in a railroad wreck near Carlisle, England.

In behalf of the bishops of the Methodist Episcopal Church, Bishop Earl Cranston of Washington has made public a special "Call to Prayer," appointed to be read in all the Methodist churches. "Not once a day only nor merely when convenient, but in our every thought of God, let the cry of our hearts incessantly ascend for the peace of Europe and of the world," says the appeal.

From Germany with its millions fighting east and west reached Philadelphia port a cargo to gladden the hearts of American children celebrating the birth of the Prince of Peace. Upwards of 400 cases of Christmas toys, made by the famous toy houses of Germany, comprised the bulk of the cargo. They were made months ago, then shipped by rail to Rotterdam and loaded into the Dutch steamship Sommeldyk, which brought them to this country.

The information is given out that Germany has resumed submarine attacks upon unarmed merchant vessels. Report says that it was due solely to the bravery of those on board of a Norwegian ship, a few days ago that the passenger and crew of one of the torpedoed vessels were saved. The significance of this information as revealing the attitude of Germany toward the United States and the demands made by the president following the sinking of the Lusitania is variously estimated. Representatives of the administration profess to believe that has no bearing whatever upon the differences between the United States and Germany. The circumstances, however, do not warrant such conclusions. Immediately after the sinking of the Lusitania there was a suspension of submarine warfare by Germany.

On Sunday Italy declared war on the Austrian-Hungarian Empire with three million men, fully equipped with arms and ammunition, it is expected, will be put in the field within a month. Germany has now declared war on Italy, its former ally. Italy is the twelfth nation to plunge into the world war now in its tenth month. The empires, kingdoms and republics now fighting are: Great Britain, including Canada, India, Egypt and the Union of South Africa, Australia, New Zealand and other island possessions; Russia; France and her north Africa dependencies; Belgium; Italy; Serbia; Montenegro; Japan, which helped drive the Germans out of China and seized Germany's islands in the Pacific; Portugal, which has an army fighting Germans in Africa; Germany with her South African possessions; Austria-Hungary; Turkey; In addition Persia is overrun by Turkish troops and is helpless. China is at Japan's mercy. The whole world seems to be war-mad. Altogether there are nearly thirty million men now engaged in fighting.

DEMAND FOR COAL GREAT, BUT SHIPS ARE FEW.

John Lochrie, head of the Scalp Level Coal Mining Company and affiliated fuel interests, has returned from a trip to New York assured of a greatly increased demand in Europe for American coal. "But," said Mr. Lochrie, "the trouble is that we haven't got enough vessels to take the stuff across. All of our mines could be rushed with orders now, if we could assure European purchasers of rapid transit across the ocean and prompt delivery. It seems to be up and means as to shipping. The sinking of the Lusitania has scared the owners of many freight steamers, which makes the situation worse Italy, France, Russia, Spain and even England need coal. Until we tackle the problem of furnishing American manufacturers and exporters with a large mercantile marine, like England and Germany have had, we will not be in a position to enjoy to the utmost the boom in our trade which we have a right to expect after the war ends. More ships is the cry now.

ELECTRIC PLANTS FOR FARMS.

A complete electric light and power plant, small enough to stand on a kitchen table and complete enough to light the surrounding territory, was one of the exhibits made by the engineering students of Highland Park College, Des Moines, Ia., recently. A little steam engine which though small was run with a pressure of from 40 to 80 pounds was connected to an electric generator from which ran a transmission line of copper wire. At the other end of this line were a number of miniature electric lamps motors and even an X-ray machine operated by the current of the miniature power plant.

More skill is required to make these miniature electrical installations than to make life size, but the work was all done by students of Highland Park College of Engineers.

Five Brothers— It's a Brick

Lay in a Lot of it

You could smoke or chew FIVE BROTHERS by the hodful and you'd never get enough—it's so mellow and rich and pleasing.

Lay in a supply of it today. Keep some at home and some on the job, and it will hold you steady as a spirit-level trues a wall.

FIVE BROTHERS Pipe Smoking Tobacco

is the one perfect tobacco for the sturdy man who likes his tobacco rich, full-bodied and satisfying. Made of pure Southern Kentucky leaf, aged for three to five years, so as to bring out all its fragrant flavor and sweetness. This is what makes FIVE BROTHERS always the same. It doesn't depend upon one season's crop, like many tobaccos. We have several seasons' crops always stored away.

Take FIVE BROTHERS on the job for a week's tryout—after that you'll always carry FIVE BROTHERS in your jeans. Get a package today.
