The three hotels have been kept very busy this summer with the many tourists and automobile parties as Grantsville is centrally located on one of the greatest thoroughfares in the United States. Automobiles from every state in the Union may be seen whirling along on the wonderful old pike just as in the old stage coach days or on horseback. As we watch the autos and motorcycles of every make and description whirling past at a rate that fairly takes one's breath; we wonder what those grand old pioneers would say if they were suddenly to appear on the scene. Or try to picture to one's self the consternation of an Indian warrior were he to wander back from his "Happy Hunting grounds."

Did you ever stop to consider that Society for the use of the earth and for the use of machinery of production and distribution must pay a royalty or tax to the owners of land and machinery. Do you know that the more property that you can command the more tribute you can exact from society? Do you know, Mr. Producer, that you must save your money and become an owner if you want to be more than a mere wage earner, if you want to become wealthy, you must become an owner of property that others must use and pay you part of their earnings for the use of it. Think again;—is it a proper incentive to seek to acquire wealth from service rendered by another?
