Oh, yes, it can be done if you are cooking on a coal or wood stove. Half the work of the kitchen is taking care of the stove. Jabbing away with the poker to get the ashes out so it will "draw" or shoveling up ashes and lugging them outdoors. And perhaps the wood box is empty when the fire has gone out, and you have to haul up coal. All this is work—the back-breaking kind that makes you "all wore out" when the last supper dish is wiped dry.

Put a stop to it today—now. Buy a
