OVERHEAD SYSTEM FOR NEW TROLLEY LINE.

The catenary overhead system and not the third rail will carry the power for the Johnstown-Somerset inter-urban railway when completed according to Engineer Wilbor of the Vandergrift company, New York, which is building the line.

This system it is pointed out, while it will not affect the matter of speed is not as dangerous as the third rail system which is always a menace when extended into the open country.

These essential features of the catenary system are a cable of steel or copper placed upon insulators by brackets or other means. Hangers carry the trolley wire at a uniform height above the rail and free from the usual sag which makes high speed impossible. This is the system that is used generally in the country.

The cars to be run over this line will be capable of making from 60 to 65 miles an hour although the running schedule will be considerably below this. For this reason the best standard of steam roadbed construction of not less than 70-lb rail standard ties, ballast and steel and concrete bridge construction will be followed.

A block signal system supplemented when necessary by telephone car despatches will be a feature of the Johnstown-Somerset line. In other words according to Engineer Wilbor, this line will be the equal of any in the country.

The Lutherans of Cairnbrook and Central City have started a movement for the erection of a new church building in Cairnbrook. The Grace church built 1871 a mile distant is the nearest house of worship in that community and it is believed that with the nucleus already there a strong branch of the denomination could be built up in the twin towns. The advisability of dividing the charge, making Grace and Cairnbrook one separate charge, is also strongly talked of, provided the new Cairnbrook project carries, and there is every indication that it will. Cairnbrook has no church buildings as yet, while Central City has two the United Brethren and the Christian churches.

A refuge for homeless children, a brick structure 50 by 34 feet designed especially for use as an orphan asylum, is being erected on the farm of Jacob D. Last Saturday was designated as the time when the patrons of the various schools were invited to meet at the school buildings and help in making whatever improvements are needed. Bushes were destroyed and weeds and unsightly things remove and everything was made smooth and straight and where needed the grounds will be drained.

Mrs. Fannie B. Thomas of Conemaugh township died a few days ago at the advanced age of 92 years. Her surviving sons and daughters are—David Thomas of Inner; Daniel Thomas, Silas Thomas, Mrs. Susan Kaufman and Miss Mary Thomas, of Conemaugh.
